Kia ora Tima

Thank you for the explanation Jeff, that is much appreciated.

We actually have training happening pretty solidly between now and Election Day. The Voter Assistant (VA) training in particular is likely to happen at night and in the weekends. This is where we are trying to train on the eRoll and the new 'update' functionality in particular – but the field is finding that they are experiencing the below issue at most of their VA sessions, which means that its impacting a high number of VAs who are trying to fully understand how to use the tool.

Is it possible for any code updates to be scheduled so that they don't impact on the training? Recognising that it could be anytime, I'm wondering if we can ask Catalyst to query the [REDACTED] database so we can determine the timings of the majority of VA trainings and then schedule the updates around those?

I'd be grateful for any help with this – we're getting a lot of disconcerted trainers from the field reporting into us and would like to minimise the disruption/unexpected outcomes they are experiencing during the training.

Ngā mihi - very happy to discuss any possible solutions to this!

Adele

Subject: RE: eRoll issues over the weekend

eRoll UAT shares resources with [REDACTED] UAT Dev environment. In particular this error looks to be the Dev image server which is where signature files are saved. Most of our UAT environments, Dev included, shelve each night and come back online in the morning. There are also times during the day where it might not be available for brief spells especially if we are doing a code migration to one of the [REDACTED] environments which happens several times a day

I haven't seen any documented requirements for when eRoll training was occurring so there wasn't any indication that after hours connectivity was required and on what days. If you can please provide timings of when the training sessions are happening we can look at what can be done to support it.

Subject: RE: eRoll issues over the weekend

We are getting more and more people who are getting this error when completing training. I understand that UAT is a shared & lower spec'd environment, but we were not aware that there would be this many issues. This is impacting the training of our Voter Assistants and is troubling our trainers.

Is there a solution for this so it does not happen as often or ideally at all?

Thanks,
Bex

Subject: RE: eRoll issues over the weekend

It's a catchall for any unexpected behaviour when trying to submit the update. It could be down to a brief connection issue at the device end, a backend outage, a timeout in the response being sent back etc. Please keep in mind that the back-end here is a UAT environment that leverages shared UAT resources so in some cases the API won't be available or responding if another environment is receiving a code update.

That message occurs when eRoll can't reach the backend of the MIKE environment. If we can't reach the backend for whatever reason it will return the need an enrolment form so we can make sure we get the updated details and accurately qualify their vote later

Mōrena Aiden and Jeff,

During Voter Assistant training over the weekend, we had some people get the outcome attached when working through the two address update examples in the training presentation.
The expected outcome should have been an ordinary vote (like before) as both addresses were in the same electorate.
Could you please urgently investigate this for us?

Allison has raised this so if you have further questions about how this occurred it might be best to talk to her.

Ngā mihi,
Rebecca

Oct 04 11:45

Servicedesk Team

To Service Desk [Show all](#)

Hi Team,

Earlier today I received a call from Teresa [REDACTED] advising that they were unable to accurately perform eRoll searches on their voting place device.

It seems as though whenever they look up any user they show as a member of the "Special Vote" group as well as showing as "Enrolment" despite many of these voters already having their easy vote card.

I have tried restarting the device and having Teresa login but it made no difference, all results were still the same.

I have directed Teresa to call their electorate manager for a replacement/spare phone be sent out to them ASAP so they are able to continue on sight, but am escalating this to you guys as well for the device in question.

Jeff [redacted] (assign)

Oct 05 09:35

To Fiona [redacted] Ross [redacted] [Show all](#)

It didn't appear to have been built in. As far as I remember we never tested hitting the confirm multiple times but the app is usually pretty quick to return a response so it wouldn't have been an obvious test to add. When clicking on the confirm button there doesn't look to be any indication that anything is happening ie the button doesn't change to say 'Submitting' or anything.

The update functionality was first used at Tauranga BE and then again at Hamilton West so with a smaller number of updates it might have only happened a couple of times and not been noticed. I only noticed it when trying to identify the changes coming through and whether they were keyed and seeing duplicate person IDs in quick succession.

Jeff [redacted]

Ross [redacted]
To Service Desk, Fiona [redacted] [Show all](#)

Thanks Jeff.

Could I please clarify one thing. Are you saying that e-roll should be stopping multiples from coming through, and this functionality appears to not be working OR are you saying that that functionality was not built into e-roll (and I absolutely get why it wouldn't have been), but it is something we could look to build in after the GE?

A small point, but I think critical to know, because it clarified for me that there is NO issue with the e-roll app and functionality, this issue IS caused by user error.

Thanks mate – and thank you for getting onto this so quickly.

Ross

Hi

I picked up on this possible issue yesterday morning while looking into another supposed eRoll issue. This appears to be a combination of a few things, possible connectivity issues, voter assistant impatience and eRoll not preventing multiple submissions of the same transaction. We won't be able to fix eRoll until after the election given it is being heavily used at the moment and it doesn't look to be a simple fix. I've just asked VS to advise their voter assistants to be patient and not click the confirm button multiple times in eRoll. The transactions all seem to be submitted within a couple of seconds so its not like there is a long delay between them.

E-Updates have to be handled in the order they came in. It is to prevent updates being submitted out of order and applying the wrong final state. Unfortunately, that has to apply to all electronic updates including MDA2 transactions. There isn't something that can be changed. Please make sure that all updates are in fact the same update before discarding them as there are times where someone might have 2 legitimate updates sent through

Hopefully we'll see a decrease in these over the next few days as the message gets disseminated. The good news is its only affecting about 3% of the updates coming through

Jeff [REDACTED]

Fiona [REDACTED] (assign)

Oct 04 10:56

To Jeff [REDACTED] Ross [REDACTED] [Show all](#)

Hi Jeff

We are seeing multiple entries for the MDA2 applications.

- there were 7 entries all with the same time stamp
- 3
- up to 4

The second issue we have with these entries - is that we want to to discard the duplicates as they are not required. However we must key the first entry [REDACTED]

Then the processing team cannot discard so they need to suspend for enquiry and for the SMEs to discard.

However if there is another entry after that - they cannot suspend - it brings up an error message.

Can you investigate if the multiple entries are an IT 'issue' or how we can not received multiple entries.

Liz [redacted]

Sep 26 12:28

To Liz [redacted] [Show all](#)

Good afternoon,

The Selwyn training team are having issues with eRoll, specifically the address update section during the VA training session. We have encountered this twice now.

When participants come to the address update section of the VA training (pg52 onwards in the trainer's manual) eRoll doesn't work as expected. For each of the voters we tried to update addresses for we got an error message which stated that the address could not be updated at this time and advised us to complete an enrolment form and issue a special vote. Instead of "New address is in the same electorate. Issue Ordinary Vote." This happened on all our phones (5) with all examples during our mock training with the trainers at HQ. During our first VA training session on 23rd September (offsite at Lincoln High School) we also experienced this issue. Although it didn't happen to everyone, a good portion of participants were affected.

We are also having a lot of difficulty with participants logging in during training sessions with phones - with some phones taking upwards of 5 minutes to successfully log in while other participants just don't get in.

Do you have any advice or work arounds for these issues?

Thanks,

Liz

Kia ora team,

I've found an instruction missing in this course – in the section talking about searching for voters, there's troubleshooting for if you're unable to find them - however the instructions end "If you are unable to find the voter, tap" - and there's no more info.

(I am guessing it should be "tap refine search", but unable to tell from context as the module then moved on to a completely different topic.)

In case a link works, it was from this page of the module here - [redacted] screenshot below.

Ngā mihi,
Juliet

Well done

Jason [redacted] (assign)

Sep 06 09:56

This change was completed last night.

Looked all ok from testing.

Noting that I think the [redacted] monitoring for eRoll needs updating, can take a look at that.

Finishing this one.

Hi Ian

In terms of business approval Aidan and I have provided details of the planned change to Waldemar (Waldo) [redacted] and Ross [redacted] Ross has subsequently let Shane [redacted] and the Enrolment Community Engagement team leads know as well.

Last weeks change for eRoll UAT went well and no concerns have been raised from the business as a result.

Jeff has confirmed that he is available for testing.

Intending to go ahead with this one as scheduled from 5.30pm this evening.

- Implement redirect via [redacted]
- Testing

Jason [REDACTED] (assign)

Background

See [REDACTED]

This change involves:

- Update the eRoll App registration configuration in [REDACTED]
- Implement redirect via [REDACTED]
- Testing

See attached for proposed change details.

Timing of Change and Testing

Intending to do this outside of business hours - suggested from 5.30pm .

I have spoken to Jeff [REDACTED] and he will be available to test as well.

The business will need to be informed - I have been told by Aidan that Waldemar (Waldo) [REDACTED] is the best contact on the Voting side. Enrolment Community engagement are using the production app in a limited fashion at the moment as well so should also be informed. Hoping that Aidan can confirm with the relevant people.

I have put this as having a 2 hour outage, not expecting the app to actually be unavailable but it is more around having a change window where we don't expect users to be on there and to allow plenty of time to make the changes and test.

Details [x] eRoll load testing will be performed approximately between 27th - 31st July (Catalyst is shut on 28th and 29/30 is a weekend).

Ops required changes to support load testing - see [WR412427](#)

eRoll Load testing is done by testing the APIs using [REDACTED] library.

These are the main changes to the code-base that will require the existing load test scenarios to be extended:

1. Enrolled address updates - MDA2 correspondence,
2. Address search functionality,
3. Listing active electorates,
4. Searching with diacritic characters.

Hi Adri,
I will need some Ops time for a small configuration change.
I will need the eroll [REDACTED] to be allowed to connect to the [REDACTED] on [REDACTED]
This will allow me to Load Test eRoll via the Frontend. The eroll [REDACTED] frontends have the same spec so the results will be comparable.
This will also allow eRoll production to be available for use during the load testing period without any downtime.

#8

Hi Aidan,

An end date is hard to pin down - simply because even though load testing may be "completed", the intention is to keep monitoring things against the established baseline. Additionally, any further changes - for example the upcoming August EMS release - may have an impact on load so we need to be continually checking back on stats.

Cheers,
James

Hi

eRoll will start to be used from day one of advanced voting, note though that training is happening now. If we try a 302 we will need to be able to roll it back if there are issues and I suggest that Waldo approves the change.

It is also worth remembering that it is supposedly in use by community engagement BAU.

Jeff will be back tomorrow hopefully. That trial of [REDACTED] sound like the way forward.

Morning Aidan

A couple of things to start your day if you read this email 😊

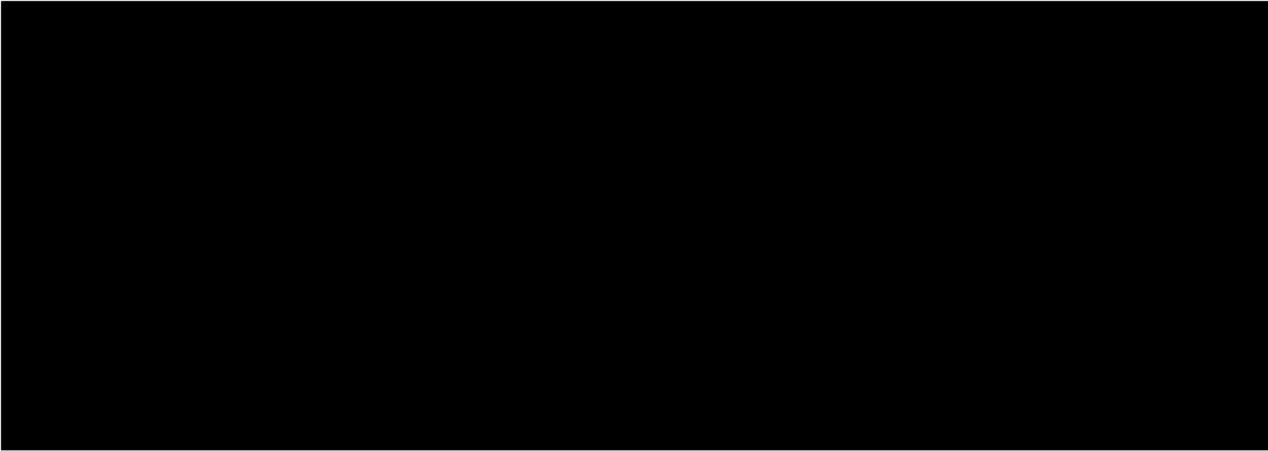

eRoll

So, Max , then myself, then finally Tim spent significant time looking at Intune and trying to get the Launcher on the phones to push out an updated eRoll link. Long story short, it no worky.

I don't think it leaves us heaps of options re the app being on the new URL and we need to do something pretty urgently. Last comment I put on the associated work request was around setting up a redirect in [REDACTED] (I guess a 302 redirection would work ok for this). If we are going to do that would want to try UAT first and then arrange a time for prod - **do you know when the field starts using it in anger?** All the new functionality for eRoll that Catalyst have released is only on the new URL:

[REDACTED]

(the above link should at least work on our internal network now as the DNS is updated)

Let me know if you want to discuss any of the above.

Cheers

Subject: [REDACTED] files -> [REDACTED] + eRoll

Hi Aidan

Couple of things

The other thing I want to highlight is the eRoll change of domain:

- I was working with Max and Jeff around testing the move from [REDACTED] -> [REDACTED]. Catalyst put in DNS update to point old to new, along with a new internal DNS entry so that the [REDACTED] version works from an office on the [REDACTED]. That works ok.
- Max was then planning to push out a new link on the phone via [REDACTED] for the updated URL. But there is an issue with the policy on the phones (a 'conflict') so it no worky for pushing out new settings. A ticket was raised for Adam to take a look but I expect he may have other things on his plate.
- We haven't done anything for the prod version as yet.

Looking for some feedback on the approach for the [REDACTED] files... and to make sure you are aware of where things are at with the eRoll change, perhaps we should discuss next steps for that.

Regards

Jason

Hello

You have been carefully selected to be part of this chat - lucky!

Catalyst have been doing some recent changes to the eroll infrastructure, basically around getting this running on an updated operating system and moving the hosting to a supported region of Catalyst Cloud as the current location is getting decommissioned.

At the same time they have updated eRoll to do be on a different domain - so instead of [REDACTED] it will be [REDACTED] for production, same kind of thing for UAT with the new one as [REDACTED]

The new versions are up and running and access is setup as per existing via [REDACTED] AD. Just noting the moment there is no DNS entry for the new version internally (so if you are on the National Office or at a ROE office the new links won't work) - will need to get Catalyst to update this. But if you are somewhere outside those offices or try guest wifi at those the new links should work.

So what we are currently looking at doing is:

- Using eroll-uat as a start, getting Catalyst to redirect things so that the old version points to new if people access it. Double checking that this doesn't cause any issues
- Then pushing out the new UAT link to phones and confirming that process works ok
- Test

If all is well then doing the same for production eroll.

Max [REDACTED] - hoping that you can be the Intune guy to push out new links to phones - I can point you to where this is configured

Allison [REDACTED] I think you are busy today by the looks but happy to discuss the above if you have questions/concerns.

2 Overview

The main goal of the load testing exercise was to provide a baseline of performance of functionality enhancements for the Public applications. A secondary objective was to find any quick wins that would provide increased throughput or response times.

[REDACTED]

The eRoll application has been recently extended to allow for limited updates to be sent back to [REDACTED] for processing. An additional address search feature has also been added. These new scenarios were incorporated in the eRoll load tests.

[REDACTED]

3 Summary

For the baseline load test run, the overall time taken to process all the scenarios was 29 minutes. A number of simple parameter changes were made to the [REDACTED] webserver configurations. The same set of scenarios were then run again and the overall time taken to process them. It was found that a single parameter change each to [REDACTED] webserver reduced the overall time to 21 minutes. This provided an increase in throughput of over 25%.

4 Test Environment

4.1 Test hosts

The secondary cluster in [REDACTED] was temporarily reconfigured to act as an independent environment for performing load testing against. This ensured that the load test results would match actual the production environment since the [REDACTED] and [REDACTED] clusters are identically configured.

Three load test runner hosts were used to execute the test scenarios in parallel against the load test environment.

4.2 Test scripts

These are the same as used in previous Public Application Load Test exercises. Although the eRoll and [REDACTED] load test scripts were enhanced to incorporate new scenarios:

- eRoll scripts had a new Address search API call added
- eRoll scripts had a person update scenario added

All these load test scripts have the following features:

- The scenario creation script extracts random data from the test database and writes out a set of test scenarios using this data.
- The load test run script performs each test scenario in parallel using a configured number of workers on the load test runner host.
- The load test script uses the [REDACTED] library to drive the application interface.
- The output files containing data about each request of every scenario from every worker are analysed by both a statistics script to generate overall statistics and a script to generate statistical graphs.

4.3 Host Statistics

Each host has data collected from it to read various aspects of the state of the host. This data is visualised through a tool called [REDACTED]. These graphs show the following states: CPU %, Network Requests, Load, Memory, Processes.

Note that this data collection is performed as standard on all Production and UAT hosts as part of standard monitoring by Catalyst.

5 Test Scenarios

5.1 [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

5.3 eRoll application

The test scenarios for [REDACTED] comprise of a user performing a selection of the following application API calls:

- Get the current set of Electorates with an election
- Perform a Lookup Address operation
- Perform a Person Search (variations include using wildcards, no midname)
- Perform some Address Completion calls
- Submit an Update to generate an MDA2 correspondence
- Perform a user Logout

The percentage of each of the above API calls between July 2022 and August 2023 was obtained from the database.

API route	%
electorates	11
enrol	2
persons	40
residential_addresses	43
lookup_address	1
logout	3
<i>Total</i>	100

The Load test runs consist of 1,000 scenarios for each runner host, with the overall number of API calls for each route matching the above percentage.

5.4 Methodology

Load Test Scenarios

A load test run is in two parts. The first part prepares a mix of all [REDACTED] scenarios for executing against the pubweb server. The second part is the 1,000 eRoll scenarios prepared for executing against the eRoll web server. These are created for all three load test runner hosts. Overall there are 24,000 scenarios executed in each full test run.

Load Test Execution

On each runner host, the [REDACTED] scenarios were started running against the pubweb server. Then, after a few minutes, on each runner host, the 1,000 eRoll scenarios were started running against the eroll web server.

6 Results

The following sections presents details from two Load test runs. The first being the baseline run using existing production configuration settings. The second run evaluates a set of configuration changes made to the public web and application services.

A number of other configuration runs were performed. The data from those are not presented here, but they helped with the choice of configuration changes presented in the second load test run.

6.1 Baseline Run

The baseline run used the existing [redacted] configurations used in production.

The total overall time to execute all 24,000 scenarios, using the three load test runners was 29.5 minutes.

Request Statistics

All responses occur under 10 seconds and generally under [redacted] and under 3s for eRoll.

Step	requests	min	median	mean	95th	max	>10s	Error
eRoll - Address completion	3,227	0.18	1.98	2.20	2.86	9.31	0	0

 15 minute : Min: 8.02 Max: 8.50 Current: 8.02

Public Webserver

6.2 Reconfiguration run

This run included the following configuration changes:

- doubled the number of [REDACTED] on the public web server
- Increased [REDACTED] on the public application server
- Increased [REDACTED] on the application server

The total overall time to execute all 24,000 scenarios, using the three load test runners was 21.5 minutes.

Request Statistics

Almost all responses occur under 10s [REDACTED] and generally under 4s for eRoll.

Step requests min median mean 95th max >10s Error

eRoll - Address completion	3,276	0.20	2.52	2.85	8.30	9.35	0	0

 15 minute : Min: 6.39 Max: 12.90 Current: 10.31

Public Webserver

6.3 Comparison

The kernel density estimate graph shows time distribution of all the [redacted] response times. The following graphs show the results from the two load test runs.

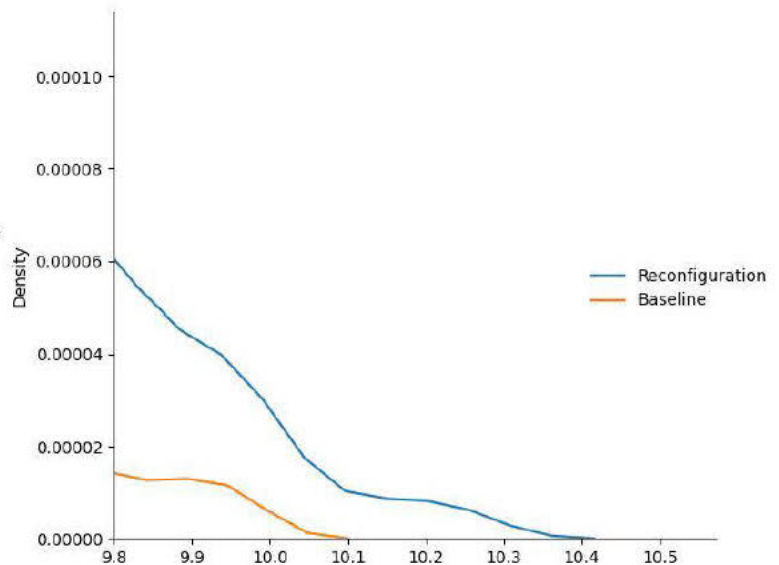

The large peak shows the majority of the [redacted] related requests and the small peak shows the majority of eRoll related requests.

The Reconfiguration run shows the reduction in response times for the [redacted] related requests with a marginal increase for the eRoll related requests. This shows why the reconfiguration reduces the overall time for all the requests from 29.5 minutes to 21.5 minutes. This is an over 25% improvement in overall response times.

The tail of the density graph (magnified) shows the times of the very small number of longer running requests.

The Reconfiguration run shows just a marginal increase in maximum request time from 10.1 to 10.4 seconds.

7 Recommendations

An over 25% reduction in overall time has been shown to be achieved with a few simple configuration changes on the Public Web and Public Application servers. A [REDACTED] ticket was raised to implement these changes prior to the general election: [REDACTED] 98483. These were applied to production in the code migration on 6th September 2023, [REDACTED]
[REDACTED]

A quick investigation into some errors in the eRoll [REDACTED] logs from the Reconfiguration were due to SSL handshaking between the eRoll webserver and the backend pubapp webserver. There are some [REDACTED] options that may help reduce the SSL processing overhead incurred and minimise these types of errors. A [REDACTED] story has been raised to investigate these options: [REDACTED] 97755.

#56661 | Voter training: How to use E-Roll course

Daniel [redacted]
To Juliet [redacted]

Hi Juliet,

Thank you for highlighting this mistake unfortunately we do not have access to update the eLearning courses. Could you please raise this with the eLearning team as they may have some follow up questions 😊.

Email: [redacted]
Phone: [redacted]

Kind regards,

Daniel [redacted] | System Administrator | **Electoral Commission** | **Te Kaitiaki Take Kōwhiri** | Wellington | [redacted] | [vote.nz](https://www.vote.nz) | [elections.nz](https://www.elections.nz)

Enrol. Vote. Be heard.

YOUR RESOURCES

While this may all seem a lot to remember, you have a number of resources to support you. Your PIM and eRoll will help you in most situations.

You will also be supplied with language guide sheets.

Please turn to page **18** in your PIM or the back of your E139-VA.

If for some reason the phone or eRoll stops working, you can still assist voters into the right queue and prepare them for voting.

In this situation, you can ask the Voting Place Manager for the reference rolls for the home general and home Māori electorates – it's like eRoll, but in paper form!

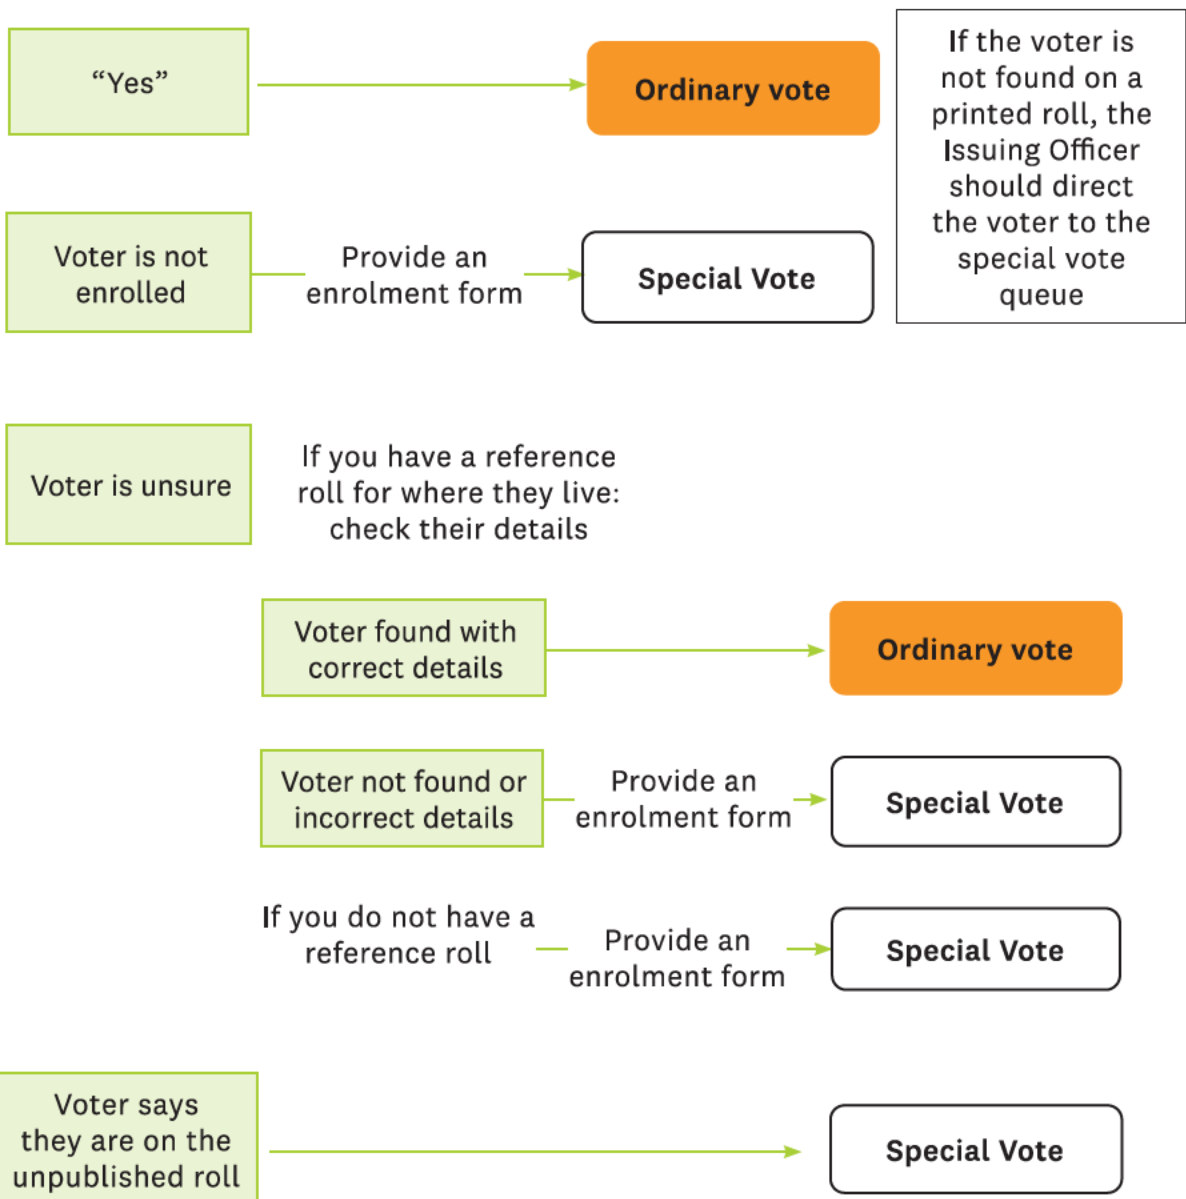

Managing queues without eRoll

Kia ora/Hello, do you have a voting card?

No

That's okay, do you know which electorate you are enrolled in?

National Support Team Communications about the issue – Saturday 14 October

Support teams are aware and investigating as a priority

Martin [REDACTED] 14/10 10:57 am
I believe eRoll is up and running again. Can this be confirmed?

Anusha [redacted] 14/10 10:59 am

Paul, can you please update on status of E-roll?

Paul [redacted] 14/10 11:01 am

IT are still investigating with Catalyst and Cloudflare - eRoll wasn't down as such it showed a spike of errors for some reason, which we need to get to the bottom of urgently. If we could hold on BCP processes for now and I will advise as soon as we have clarity

Paul [redacted] 14/10 11:14 am

Looks like we have a capacity issue on the eRoll app server, working with Catalyst operations to address as I type. Also questioning sizing for other apps, to make sure nothing else will suffer similar volume related impacts

14/10 11:16 am

Martin [redacted] - We are still getting a significant number of calls with the issue - so not resolved.

Natalie [redacted] 14/10 11:17 am

The National Party need a response on this - they have sent 3 emails through which we are forwarding through to returns

Anusha [redacted] 14/10 11:17 am

Natalie [redacted] 14/10/2023, 11:17 am
The National Party need a response on this - they have sent 3 emails through which we are forwarding through to returns

How did they find out, Natalie

Paul [redacted] 14/10 5:29 pm

[redacted] And an update on eRoll just to show that we have now exceeding prior volumes and continues to perform

Processing volumes now in excess of previous peaks (Thursday and Friday). Green and Blue are good. Higher the better.

👍 3

Paul [redacted] 14/10 5:50 pm

[redacted] eRoll FYI - we have seen a number of spikes in errors between 5:15 and 5:40 but transactions are still getting through at much higher volumes than Thursday and Friday but we did see some errors which would have resulted in performance slowness for some users. at 5:40 errors dropped again completely. Seems like a 25 minute drop off but now ok. Still investigating and monitoring closely

Subject: ERoll

Kia ora all,
Are you OK with the following response:

We are currently experiencing issues with our electronic version of the electoral roll. We are working to resolve it and are using manual processes that were used prior to 2020 **before introducing the electronic roll into voting places**.
People can still vote, and ~~for~~ this will have no impact on most people’s voting experience, although it may cause slight delays at some of our busiest voting places.
[ENDS]

Once you’re all happy with it,
I’ll send to Karl and Anusha for approval.
Ngā mihi
k

Foreword

Nau mai, haere mai ki te Kaitiaki Take Kōwhiri- Welcome to Te Kaitiaki Take Kōwhiri Electoral Commission.

Ko te whakatinanatanga o te Pōtitanga-ā-motu ka taea ina ka ngātahi te mahi, tēnā e whakamiha ana kāutau kua tūhono mai ki te whakatutuki i tēnei pōtitanga.

E tūhonotia mai kāutau ki tētehi rōpū manawanui ki ngā taumata me tā mātau aronga matua. Koinā te huarahi whāia kia tika, kia pono, kia haumarū nō hoki te pōtiationa o tēnei tau.

He hiahia nō mātau te whakahaere i tētehi pōtiationa kia mīharo a Aotearoa whānui otinō kia manawanui katika i tō urunga mai.

Mō mātau ake, ka arō tōtika ki te aronga matua, kia whakapono a Aotearoa whānui, kia tika, kia whai wāhi te katoa ki ngā pōtiationa ā-pāremata.

Ka whakamahia ngā taumata hei arataki i te tūtukitanga o te aronga matua, ā kei te pokapū o ā mātau mahi katoa ko ngā tāngata i Aotearoa nei.

E tāwharau ana ngā taumata i ā tātau mahi tiaki i te pūnaha pōtiationa, nā he motuhake nō tō whai wāhitanga mai hei whakakanohi i te manapori o tō hapori.

He hiahia nō mātau kia hora i ngā pārongo katoa hei whakatūtukitanga māu, kia hākoakoa nō tō urunga mai.

Nā ēnei tuhinga ka aratakina kāutau kia whai wāhi mai i tēnei tau.

Tēnā kāutau te hāpai tahi i te kaupapa nei

Ngā mihi

The 2023 General Election can only happen with all of us playing our part, so we appreciate you joining our team to help us deliver the election.

You're joining a dedicated and motivated team that lives by our values and purpose. It's the way we'll deliver a safe, reliable and trusted election this year.

We want to deliver an election that the people of Aotearoa New Zealand can be proud of, and that you're proud of being a part of!

For us, that means looking to our purpose that all New Zealanders trust, value and take part in parliamentary elections.

We use our values as a guide to make sure we can achieve our purpose and put the people of Aotearoa at the centre of everything we do.

Our values are underpinned by our role as kaitiaki (guardians) of the electoral system and your role is an important part of that, as the face of democracy to your community.

We want to make sure you have all the information you need to do that and enjoy playing your part.

This manual provides you with the guidance and information you need to help people have their say this year.

Thank you for joining us in this journey.

Karl Le Quesne

Āpiha Pōti Matua
Chief Electoral Officer

Introduction

Keep votes and other materials safe

- **All staff are responsible for the security of information and voting materials.** Do not leave voting materials unattended at any time, including when transporting them in vehicles
- Marked, uncounted ballot papers should always be transported by two staff members
- **All staff should be aware of where voting materials are in the voting place.** When going on a break, log out of the voting place phone and give it to the Voting Place Manager
- **All voting materials must be accounted for at all times.** Watch that voters do not leave the voting place with their ballot paper. Even if they do not wish to vote, they must place their ballot paper in the appropriate ballot box. If a voter has spoiled their ballot paper then they must return it to the Issuing Officer who issued the paper for a replacement
- If you think anyone has tampered with voting materials or has accessed information they are not permitted to have, contact your Electorate Manager immediately, either directly, or through your Voting Place Manager.

Be security conscious

- **Be aware of what is happening in and around the voting place**
- Be alert to the verbal and non-verbal cues of the person you are dealing with. If you are concerned about the behaviour of any person, advise your Voting Place Manager
- Pay attention to your surroundings. If you notice any suspicious or unattended bags or packages in or around the voting place advise your Voting Place Manager.

Keep yourself and voters healthy

- **Stay at home if you are unwell.** Call your electorate HQ to let them know as soon as possible if you cannot work because you are sick.
- Masks and hand sanitiser are available to staff and voters.

Incident Management Handbook

- There is an Incident Management Handbook located in the drop file next to the Voter Assistant's station to help with any incidents and emergencies in the voting place.

The rights of the voter

- **Every person has the right to cast their vote in a safe environment**
- Your voting place should be welcoming and supportive to all voters. Keep your focus on the voter in front of you, even when the voting place is busy and you feel under pressure. Offer help where needed and ensure voters feel respected – ask yourself how you would like to be treated
- Only the voter can decide if they want to vote, and only the voter can decide who to vote for. No-one can cast a vote for another person
- Voters can get help from anyone they choose such as a support person or a voting place staff member
- Be clear on the difference between helping the voter and influencing the voter's choice. You can help the voter but you cannot make the choice for them.

Privacy

- **All staff are responsible for keeping voters' information private**
- Do not answer questions from a member of the public about whether another person is enrolled, if they have voted, or their personal details
- Only use the information you have access to for your duties to issue votes
- Do not discard EasyVote cards and Special Vote slips. Stamp and keep them for return to electorate headquarters, or return them to the voter if asked.

Secrecy

- **All staff are responsible for maintaining the secrecy of the vote**
- Do not answer any questions from media. Only pre-arranged visits from journalists or film crews are allowed
- Do not take photos, blog or post on social media about what is happening in a voting place
- If voters attempt to film or take photos in a voting place, ask the Voting Place Manager to show them the poster asking them not to. If they do, you cannot stop them. You can ask them not to post or use what they have recorded to maintain the secrecy of the vote and to protect people's privacy.

The security of staff and voters are the first priority and always take precedence over the security of voting materials

Roles in the voting place

Voter Assistants are responsible for managing voters as they arrive, they:

- help voters to get into the right queue to vote, with the correct information
- assist voters to enrol or update their enrolment details

Issuing Officers are responsible for issuing votes accurately & efficiently, they:

- are welcoming and supportive to voters
- follow instructions in their Personal Instruction Manual (PIM) and from the Voting Place Manager.

Issuing Support Officers are present in busy or complex voting places, they:

- help manage vote issuing, including filling in for Issuing Officers and the Voting Place Manager during their breaks
- support the Voting Place Manager in end of day processes

The Voting Place Manager has overall responsibility for the voting place, they:

- manage staff and ensure votes are issued correctly
- are your first port of call after this manual for any questions or concerns.

Security Guards are responsible for safety in the voting place, they:

- help keep voting place staff and voters safe
- help keep the ballot boxes and other voting materials safe
- help with queue management.

Scrutineers

Scrutineers are not electoral staff, but are appointed by candidates to observe the issuing of votes. They are an important part of the electoral process and we welcome their presence in voting places.

✓ Scrutineers are permitted to:	✗ Scrutineers cannot:
Sit and observe in the designated area of the voting place.	Handle any voting materials such as ballot papers or EasyVote cards, or use an Issuing Officer's table
Photograph the lists of persons who have voted and give these details to their campaign team. A mobile phone, laptop or tablet can be used	Film or take other photos in voting places in order to maintain the secrecy of the vote and out of respect for people's privacy
Ask an Issuing Officer to question a voter suspected of voting more than once, or as somebody else	Communicate directly with voters
Wear a party lapel badge or rosette with the party's name, slogan or logo Wear clothing in party colours	Wear or display any items with the candidate's name Wear or display any item, other than a party lapel badge or rosette, with the party name, slogan or logo

At the voting place

Voters will either make an ordinary or a special vote. It is the responsibility of voting place staff to ensure that the voter has the opportunity to enrol or update their enrolment details and to be issued the correct type of vote and for the correct electorate. If a voter is not enrolled correctly or does not receive the correct ballot paper, their vote may not count.

The key question is: “Is the voter’s name on a printed roll in the voting place?”
If “Yes” - then the voter will be issued with an ordinary vote
If “No” - then the voter will be issued with a special vote

Electoralates

New Zealand has 65 general electoralates and 7 Māori electoralates. Each electoralate is a geographical area that has been defined for voting purposes. Every part of the country is in both a general and a Māori electoralate.

The election

Voters have two votes on their ballot paper — a party vote and an electoralate vote.

The party vote is for the political party the voter wants to be in government.

The electoralate vote is for the candidate the voter would like to be the member of Parliament for the area they live in.

No-one who wants to vote is turned away!

Enrolment

If voters are not enrolled or have changed their address details, they will be able to complete an enrolment form while they are in the voting place.

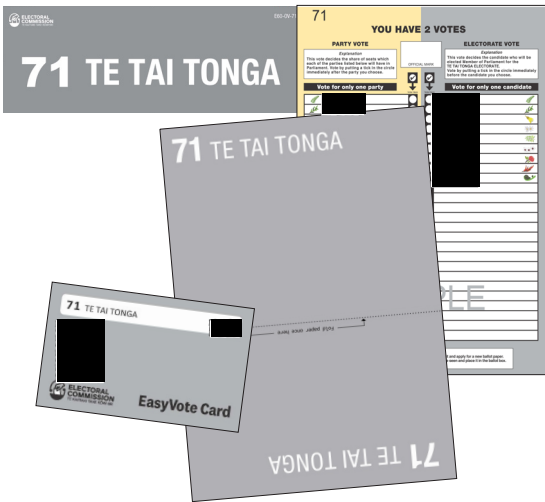

Any questions from voters about enrolment that are not covered in the PIM should be referred to the Voting Place Manager, or to the enrolment helpdesk (0800 36 76 56).

A screenshot of a web-based enrolment form titled "Get ready to vote". The form is divided into several sections: "Step 1: Personal details", "Step 2: Residential address", "Step 3: Contact details", "Step 4: Electoralate", and "Step 5: Comments". It includes various input fields for text, checkboxes, and a "Save" button. The form is designed to be completed by voters at a voting place.

Māori and general rolls

Your voting place will be issuing ordinary votes for both your home general electorate and your home Māori electorate. Colour coding helps you to distinguish these: grey for Māori electorates and orange for general electorates. **Never assume which roll a voter is on.**

Grey materials:
Māori electorates

Orange materials:
general electorates

Voting information

Most voters will receive voting information in the mail. Many voters will bring this to the voting place.

EasyVote card:

- Voter's name appears on a printed roll
- Gives the voter's name, address, electorate and the page and line number from the electoral roll.

Special Vote slip:

- A voter who enrolled after the rolls were printed or is on the unpublished roll may have been sent a Special Vote slip
- This gives the voter's name and electorate, and
 - if the voter enrolled after the rolls were printed shows their residential address
 - if the voter is on the unpublished roll then the slip states "ADDRESS NOT REQUIRED"

These voters are always issued a special vote.

Voting place card:

- If a voter does not bring their EasyVote card to vote, a purple voting card may be created at the voting place to help the Issuing Officer correctly issue the vote
- You will determine what to write on the card using an electronic roll (eRoll) that searches for the voter's details.

Tasks during voting

No matter how big or small the voting place, the Voter Assistant (VA) is the first staff member that a voter meets and will set the tone for the voter's experience. Be warm and welcoming, even at the end of a tiring day.

A Voter Assistant has 4 main tasks:

The number of Voter Assistants in the voting place will determine how these tasks are allocated.

One Voter Assistant

In voting places with fewer expected voters, one Voter Assistant should be able to manage all tasks, assisted by the Voting Place Manager when required.

Busier voting places should have more than one Voter Assistant; it is important to work together to ensure that voters have a smooth experience.

Two Voter Assistants

If there are two Voter Assistants, the tasks are recommended to be split by:

Tasks:

- Direct voters to the correct queue in front of Issuing Officers
- Provide enrolment forms as required and assist voters who need help to complete them

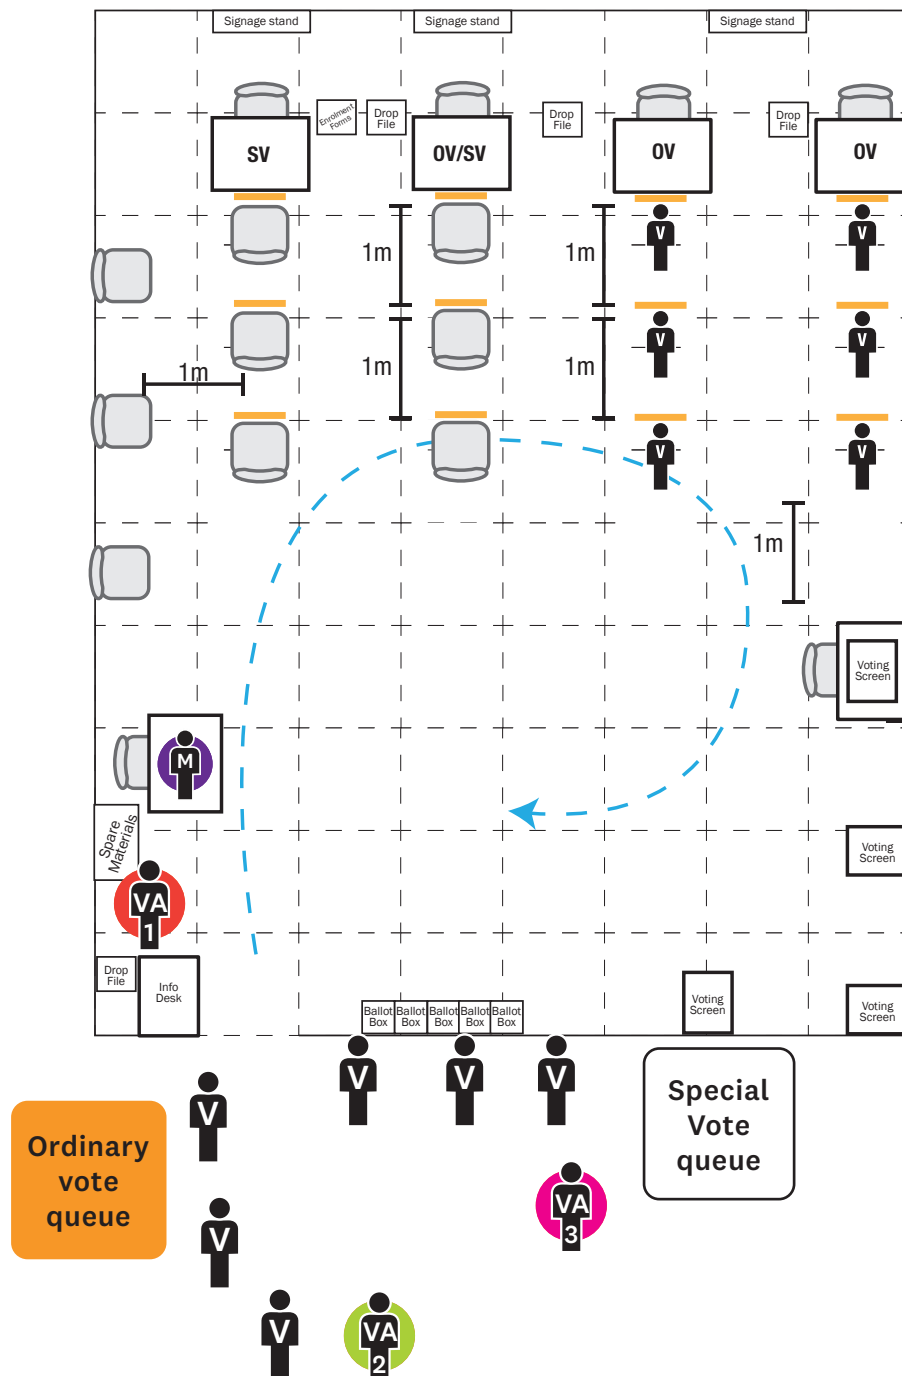

- Manage voters into queues as they arrive at the voting place. Depending on space, queues may be indoors or outdoors
- Use eRoll to prepare voting cards for voters who need one
- Identify voters who need extra help and assist them.

If there is a third Voter Assistant:

- VA3 will either work alongside VA2 in directing people into the correct queue voting place, or
- assist voters with their enrolment forms, depending where the need is greatest, as agreed with the Voting Place Manager.

Here is an example layout of a voting place and location of the Voter Assistants.

Where there are multiple Voter Assistants, they may rotate through the inside and outside tasks during the day.

1. Manage the VA station

Send to the correct queue

Kia ora/Hello, do you have a voting card?

Send the voter to the correct queue

Voters should have an EasyVote card, Special Vote slip, or a purple voting card created by a Voter Assistant. This will make it easier to direct them to the correct queue in the voting place and will speed up the issuing process.

Use the tape marks on the floor to help manage flows in the voting place.

Provide an enrolment form

If a voter requires an enrolment form, they will receive it from the Voter Assistant with a clipboard. Explain to the voter why, e.g. “As we don’t seem to have your current details, we need you to complete an enrolment form to get you enrolled. Then an Issuing Officer will give you a declaration form to get your voting papers”.

Indicate the fields on the enrolment form as you say to the voter:

Please fill in as much of this form as you can, at least:

1. your full name
2. your date of birth
3. current home address, and that you’ve lived at your address for at least one month. If you haven’t, also fill in your previous address and move date on the back of the form **[show Box 2A]**
4. tick the statement that applies to you
5. sign the declaration box and write the date.

Give the enrolment form and voting card to the Issuing Officer when it’s your turn.

Let me know if you need any help with the form.

2. Manage queues

After welcoming the voter

1. Your first priority is to identify who can receive an ordinary vote. These should be the majority of voters and most bring their EasyVote card with them to vote. Know which ordinary vote electorates your voting place is issuing for
2. Your next priority is to identify voters who have:
 - an EasyVote card for an electorate that your voting place is not issuing ordinary votes for, or
 - a Special Vote slip for any electorate

Explain to these voters that they need to complete a special vote and this takes just a bit longer
3. eRoll can be used to update voter's details who have moved within their electorate so they can receive an ordinary vote.
4. The final group of voters are those who are unsure about their electorate or are not enrolled. Use eRoll to determine the voter's enrolment status. If they are not enrolled or need to update their details, they can fill in an enrolment form and receive a special vote.

Special
Vote
queue

Ordinary
vote
queue

Special
Vote
queue

 Do	 Don't
Give voters an estimate of how long they will be waiting in the queue	Keep asking voters the same questions eg: "What electorate are you in?" "Have you got your EasyVote card?"
Thank voters for their patience if there is a queue	Apologise for queues
Check with voters if they need any help with their forms if you have time to do this	Lose awareness of who else is arriving at the voting place; getting voters into the right queue is your first priority.
Give clear instructions about what the voter needs to do or where to stand	

Priority voters

Some voters may be physically unable to wait in a queue. Bring these voters into the voting place to the front of the queue with an Issuing Officer. The Voting Place Manager can help if needed.

Managing queues with eRoll

Kia ora/Hello, do you have a voting card?

Yes

Direct to the appropriate queue

That's okay, let's look up your details.

No

What is your:

- first name
- last name
- month of birth

[search on eRoll to find possible match to the voter]

Could you please confirm your address [check for match]

If the voter gives you another address that is different to the one in eRoll

I'm sorry, but I can't see that address. Have you lived at another address in [give the suburb/town of the address in eRoll]

If the voter gives you a previous address that matches the one in eRoll, tap on the record

Okay, as you have a new address, let's see if we can update it electronically

Using eRoll - troubleshooting

1

If there are no results that match the voter's details, ask the voter:

- if you have the correct spelling
- if they are known by any other names
- if they could be on the unpublished roll. If yes, tap **Unpublished**.
- if you still are unable to find the voter, tap **Enrolment**.

First Name(s) Surname Address

Ask the voter to confirm their full date of birth. Does it match:

No Yes

Using eRoll - update address

5

Ask the voter for their mobile phone number.

Note: if the voter does not want to give their phone number or doesn't have a mobile phone select Voter has provided no additional contact info.

The 'Update Details' screen features a 'New Search' button on the left and a 'Back to Address' button on the right. Below these is a 'Voter Details' section with three input fields: 'First Name(s)', 'Surname', and 'Address', each containing a blacked-out value. A confirmation question follows: 'Ask the voter to confirm their full date of birth. Does it match: 06 April 1974?' with 'No' and 'Yes' buttons. Below that is another question: 'Ask the voter for their mobile phone number in case they need to be contacted about their enrolment:' with a text input field containing 'Enter voter's mobile phone number ...' and a checkbox labeled 'Voter has provided no additional contact info.'.

6

Ask the voter to check their details on the screen, read the declaration and sign on the screen

Tap

The 'Confirm Details' screen has a 'New Search' button on the left and a 'Back to Details' button on the right. A pink message box states: 'New address is in the same electorate. Ask the voter to sign to confirm the change to their current home address.' Below this are several input fields: 'First name:', 'Last name:', 'Date of Birth:', 'Previous home address:', and 'Current home address:', all with blacked-out values. A 'Phone number:' field is partially visible at the bottom. A declaration box contains the text: 'I declare that: • I am eligible to enrol at the address I provided in this application • All the information I have provided is true and correct, and • I understand that giving false or misleading information is a criminal offence.' Below the declaration is a 'Signature:' field with a blacked-out signature and a 'Clear signature' link. At the bottom is a 'CONFIRM' button.

Using eRoll - update address

7

Copy the information shown on screen to a purple card and give it to the voter.
Then direct them to the queue for ordinary votes.

Tap 

Note: If the voter does not meet the criteria to complete an electronic update, the voter can fill in a paper enrolment form and receive a special vote

Update Complete

 - 选票放入选票箱后，选票将放入选票箱。

Voter care

Follow the guidance below to provide assistance to voters.

Do

Don't

To help a voter:

Speak slowly and carefully

Ask short questions that require Yes/No answers or a shake of the head

Use hand gestures, for example, point to a voting screen or an EasyVote card

Shout or talk loudly at a person with language, visual or hearing difficulties

Use technical terms or jargon

Explain everything in detail, unless the voter requires that

Be patient and listen attentively

Know what languages are spoken by other staff members

Pretend to understand if you do not

If the voter is unsteady, bring them to the front of the queue, offer them a chair and consider how you can make voting easier
e.g. bring the table top screen to them while still maintaining the privacy of the vote

If a voter with a visual impairment needs guiding, offer your arm rather than grabbing theirs

Make eye contact with a person with a hearing impairment to communicate with them, or communicate in writing

Assist a person with a physical disability unless asked

Tap a person with a hearing impairment on the shoulder to get their attention

Helping a voter understand how to cast a vote

You can advise voters that they have two votes on the ballot paper: one for a party and one for a candidate

You cannot influence the voter's choice about who or what to vote for

Frequently asked questions

Enrolment

"I turn 18 on Election Day. Can I still vote?"

Yes, you can. If you are not already enrolled, you can enrol up to and including on Election Day.

"Can I tick that I am of Māori descent?"

For enrolment purposes, Māori descent means that you are descended from a NZ Māori. This includes Chatham Island Māori, but not Cook Island Māori.

Voters of Māori descent who are enrolling for the first time can choose to enrol on the Māori roll or the general roll.

"What is the difference between choosing the Māori roll and the general roll?"

Your choice affects your electorate vote but not your party vote. On the Māori roll you'll vote for a candidate in a Māori electorate. On the general roll you'll vote for a candidate in a general electorate. You can vote for the same list of political parties whichever roll you are on.

"I am unsure if I am enrolled" or "I am not enrolled"

We can check your details on our eRoll or a printed roll. If we cannot find you, you can fill out an enrolment form and receive a special vote. You can enrol up to and including on Election Day to vote in this election.

Roll changes since the last election

"When can I make my roll choice?"

If you are Māori, you choose which electoral roll you want to be on when you enrol for the first time. You can change your roll type at any time, except in the 3 months before a general election is being held

"Why can't I change in the 3 months before the election?"

There are times when voters can't change between the Māori and general rolls, including in the 3 months before a general election. The times when voters cannot change rolls is set out in the legislation passed by Parliament in November 2022.

"What's changed for Māori voters?"

Previously, once enrolled, Māori voters could change rolls during a 4-month Māori Electoral Option period held every 5 or 6 years. In November 2022, Parliament changed the law so Māori voters could change roll types at any time, except in the 3 months before a general election.

IMPORTANT: You must not direct or instruct someone of NZ Māori descent on which type of roll (general or Māori) they should enrol on, or promote one roll over the other.

If a person of NZ Māori descent is not sure which roll they want to enrol on, advise them that they can take the enrolment form away to talk with their whānau (family).

However, a voter cannot take voting papers issued to them outside of the voting place: they cannot decide to return their papers and vote later.

Home address

“What do I use as my home address?”

Your home address is the place you choose to make your home because of family, domestic or personal reasons.

Your home address does not change if you sometimes live away from home for work or education (or because of your partner’s work or education).

“My home doesn’t have a full address - what do I write?”

If your home doesn’t have a full address, for example, your house isn’t numbered or your street doesn’t have a name, write as much information as you can about where your home is located and include any details such as names of neighbours or who lived in the house before you, if you know this.

Please provide your contact details such as an email address or phone number so we can contact you later if we need to follow up.

“I am a student living away from home”

If you are studying and living away from your family home, you will have chosen when you enrolled to use either your family home or your current address. If you do not have an EasyVote card, we can search for your details on our eRoll or in a printed roll.

If you wish to change your enrolment to your current home address, you can do this with an enrolment form and be issued with a special vote.

“I have more than one house”

You can only enrol to vote in one electorate. Use the address where you choose to make your home because of family, domestic or personal reasons.

In temporary accommodation or without a fixed address

“I don’t have an address”, “I live in a campervan”, “I’m homeless”

This includes if a voter is living in a shelter, hotel, motel, camping ground, public space, or living with other people temporarily. It also includes if the voter’s home is a campervan, motorhome or car that is not permanently in one place.

Use the address you last lived at least 1 month, even if that is some time ago.

If you are unable to provide this, then you can use the address where you spend a lot of your time.

We will need a postal address on the enrolment form to send mail to you. The postal address could be a PO Box, or the address of a friend, family member, church or support group. Whoever is at the address needs to be someone who will agree to hold your mail for you to collect.

“I live on a ship or boat”

If your home is on a ship or boat that is permanently in a harbour, use the address of that ship or boat.

If your home is on a travelling ship or boat, use the last New Zealand address you lived at for at least 1 month, even if that is some time ago.

We will need a postal address on the enrolment form to send mail to you. The postal address could be a PO Box, or the address of a friend, family member, church or support group. Whoever is at the address needs to be someone who will agree to hold your mail for you to collect.

Overseas

“I have recently returned from overseas”

If you will have lived at your NZ address continuously for at least one month by Election Day, you are qualified to vote in the electorate at that address.

If less than one month, then the NZ address where you last lived for at least one month is used to determine your electorate.

*If you are temporarily visiting NZ and need to enrol or update your details, then you also fill in **Step 2B** on the back of the enrolment form.*

Help to complete the enrolment form or special vote declaration

“Can you help me fill out my enrolment form or special vote declaration?”

You can assist a voter with a physical impairment to complete the forms.

If the voter is physically unable to sign an enrolment form or special vote declaration, then you can sign the form and write next to the signature box

‘Voter with physical impairment — signed by their direction’

Note that for a person with a mental impairment, there are different requirements for enrolling which include the person completing the form to have an enduring power of attorney or be the person’s appointed welfare guardian. It is best in these situations to refer the person to the enrolment helpdesk on 0800 36 56 76.

Different name

If the voter verbally gives a different name to what is on the printed roll.

Ask the voter if they are known by any other names, or what name they may have used to enrol with. Check if the voter uses their names in a different order or may have changed their name after marriage or by deed poll. If this gives you a match to the name on the roll and the voter confirms that the name on the roll is theirs, then continue to issue the ordinary vote.

The voter’s details could also be searched for on the electronic roll if you have access to one.

If it is still unclear, then the voter should complete an enrolment form and be issued with a special vote.

A voter has someone else's EasyVote card

If it appears the voter has someone else's EasyVote card.

Ask the voter why that might be.

If the voter has brought the wrong EasyVote card in error:

- Stamp the front of the card
- Put the card in an Issuing Officer's disposal box, do not give it back to the voter
- Offer to find the voter's name on eRoll or the printed roll.

If a voter intends to vote on behalf of another person.

Explain that no one, not even a person with power of attorney can cast a vote on behalf of the voter. Even if a voter has asked someone else to do that, doing so would be an offence. If a voter cannot get to a voting place, they can request another person to bring a takeaway vote to them, which can be returned to any voting place.

Takeaway vote

"My cousin has asked me to pick up his voting papers as he's sick and can't leave home"

Ask the Voting Place Manager to assist the agent with a takeaway vote to take to the voter.

If the Manager is busy, ask the agent to wait in the special votes queue until the Manager is available.

"Can I return voting papers for my neighbour?"

Anyone can return a takeaway vote for another person.

They will put the voter's envelope with the voting papers into the special votes box.

If the agent brings back the voter's ballot paper and declaration without the outer envelope:

- ask the Voting Place Manager for an E79 (takeaway) envelope
- check the declaration for the voter's electorate, not the voting papers, to maintain the secrecy of the vote
- write the name of the voter's electorate on the envelope
- ask the agent to seal the declaration and ballot papers inside
- the agent can put the envelope in the Special Vote box.

Unpublished roll

“I am on the unpublished roll” or “I am on the private roll”

There are a number of reasons why a voter may be on the unpublished roll. Only the Registrar of Electors has access to this information. These voters cast a special vote.

Voters on the unpublished roll may have a Special Vote slip which gives their name and the electorate they are enrolled in, but states ‘ADDRESS NOT REQUIRED’.

Always communicate quietly with these voters to provide some level of privacy.

“How do I enrol on the unpublished roll?”

Provide a copy of the brochure “Concerned About Your Personal Safety?” (ROE47B) to the voter.

Leaving the voting place with papers issued to a voter

“I want to take my voting papers home and return them later”

“I’ve decided that I don’t want to vote today”

If a voter has been issued with their ballot papers, whether an ordinary or a special vote, they cannot leave the voting place with them, or return them to a voting place staff member, to vote on another day.

Allow the voter time to think how they might want to vote.

The voter must put their ballot papers into the ballot box before leaving the voting place. If they choose to vote again, they will likely be investigated for dual voting and their votes could be disallowed.

Disruptive behaviour

What if someone is behaving inappropriately or disturbing other voters?

People should only be in a voting place when they are voting or supporting someone who is voting. If a person is finished voting, or is not voting or supporting a voter, inform your Voting Place Manager who can ask them to leave a voting place.

If a person becomes disruptive, the Voting Place Manager will take the appropriate steps using guidance from the Incident Response Handbook that is supplied to each voting place.

Voter being influenced

If a support person is influencing a voter

It is an offence to communicate and/or influence a voter in a voting place. A support person should only provide general directions on how to vote and, for example, assist with naming the candidates in alphabetical order (if the voter has reading or sight issues).

If it appears that the voter is being influenced, the Voting Place Manager should explain to the support person what they are allowed to do and ask the voter if they require assistance.

Reading or marking a ballot paper for a voter

If a voter needs someone to read the information on the ballot paper or needs help marking the ballot paper

- Move to an area where you cannot be overheard
- Unless the voter knows who they want to vote for, you must read out the complete lists of all candidates and parties on the ballot paper
- You must mark the choice the voter has indicated to you
- You must not provide information about any of the candidates or parties other than what is written on the paper.
- Check that the voter's choice has been correctly marked
- Change the option marked if the voter agrees it has been incorrectly marked
- Don't allow an interpreter or any support person assisting the voter to:
 - interfere with the voter's choice about who to vote for
 - provide information that may influence their decision.

Photos taken in voting place

What happens if someone takes a photo in the voting place or outside the voting place? (e.g. in a mall)

If they do, you cannot stop them. You can ask them not to post or use what they have recorded to maintain the secrecy of the vote and to protect people's privacy.

Two forms

“Why do I have to fill in two forms?”

The enrolment form and special vote declaration are processed separately and currently the law does not allow one form to be used for both purposes.

Before leaving home

Check that you have:

- Enough time to get to the voting place.
For your first day of voting you will be advised when you need to arrive to set up, but expect that it will take up to 90 minutes
- Chosen clothes and shoes for comfort and warmth, that would not be considered inappropriate or politically biased.
As a Voter Assistant you will be on your feet for most of the day and could be outdoors, working with queues of voters
- Packed food and drink for the day
- Packed reading glasses (if required)
- Packed this manual

All voting place staff will be given an orange vest by the Voting Place Manager to wear with their ID card. There are two sizes of vests.

All voting place staff must wear their vest and ID card at all times when working in the voting place. You should question any person who is handling materials such as ballot paper pads who is not wearing a vest and ID card.

Your own vote

You may vote in your voting place at any time during opening hours. Check with the Voting Place Manager who will cover your duties while you vote.

Before voting starts

Check that you have:

- Signed in with the Manager on Form S
- Been shown where all the facilities are such as toilets and break rooms
- Received a briefing from the Manager about emergency procedures, the Incident Management Handbook, hazards and security
- Introduced yourself to other staff members and any scrutineers if present. Find out what languages other staff speak
- Know when your break times will likely be
Note: break times may need to change at short notice if the voting place is busier than expected
- Switched off your personal mobile phone or other electronic devices
- Checked that you have all the materials you need for your role: ask the Voting Place Manager for the mobile phone, log into eRoll and check that it is working
- Reviewed the Voter Assistant processes in this manual for your role.

Dropfile

You will have a dropfile at the Voter Assistant station at the entrance to the voting place. Locate it where it is available to you, but away from public access.

Put the following materials in the dropfile:

- enrolment form pad(s)
- cardboard clipboards (can be reused between voters)
- black pens for use with enrolment forms
- language support sheets in different languages
- spare E139-PURPLE cards for the mobile phone
- Incident Management Handbook

Integrity checks

On the first day of voting you will be asked to:

- 1 Get the sealed box that contains key voting materials and the tracking note from the Voting Place Manager

- 2 Break the tamper evident tape

- 3 Remove the materials and separate into piles by electorate

- 4 Check the quantity of each of the materials against the tracking note

E.g. 1 roll for Hutt South, 7 rolls for Mana, 1 roll for Ōhāriu, 2 ballot paper pads for Hutt South, 25 ballot paper pads for Mana.

ELECTORAL COMMISSION
TE MATIANGA TAKE Kōwhiri

Voting Place Employee Timesheet

M37-VPTIME

After voting finishes

1 At closing time bring in all of the signs from outside of the voting place.

2 The Voting Place Manager will give you the following from their supplies:

- All envelopes
- All ballot paper pads and declarations packs and cover sheets
- Takeaway votes satchel
- Scissors
- Plastic bags

3 Cut the cable ties that link the ballot boxes together and spread them out. Do not open the ballot boxes.

4 For the ordinary votes ballot box...

From each P4 envelope unpack and match to the correct ballot box:

- Reconciliation Form A and Form G
- Form J
- Voting Material Marker Cards (M14-VMMARKER)
- And the packing instructions (M14-PACKOV).

Place them separately in front of the ballot box as pictured.

5 For the special votes ballot box...

From the S6 envelope, unpack the:

- Reconciliation Form B
- Voting Material Marker Cards (M14-VMMARKER)
- And packing instructions (M14-PACKSV).

Place them separately in front of the special vote ballot box as pictured.

Place the Takeaway votes satchel in front of the special votes ballot box.

Continued

6 Ask Issuing Officers to place their materials in separate piles in front of the appropriate ballot box as indicated by the marker cards:

- fully used
- part-used
- unused
- electoral rolls.

Check the materials have been placed on the correct marker card.

Issuing Officers will also place their S7 spoilt materials envelope in front of the special vote ballot box.

For shared ballot boxes make sure the materials are kept separate for each electorate.

7 Put the other materials from the Voting Place Manager on the marker card in front of the appropriate ballot box.

8 Assist the Voting Place Manager as directed with the reconciliation. You will be asked to:

- count the number of pads and declarations packs in each pile
- document the date and that number on the corresponding Voting Material Marker Cards (M14-VMMARKER) for each pile.

Then for:

Ordinary votes

- record the last two digits of the next remaining ballot paper in every part-used pad on the part-used Voting Material Marker Card

Special votes

- count the number of remaining declarations in each part-used pack and record on the part-used Voting Material Marker Card

9 Advance voting

- Pack up materials as directed by the Voting Place Manager

On Election Day

10 Assist the Voting Place Manager as directed with the preliminary count.

11 Once the votes are counted, work with the Issuing Officers to use the packing instructions (M14-PACKOV & M14-PACKSV) to pack the envelopes.

On the packing instructions, tick off each item 'Packed'.

Troubleshooting

1. Spoilt enrolment form

If a voter spoils their enrolment form

1	Write across the enrolment form: 'Spoilt by voter and a fresh enrolment form issued' and initial this
2	Give the spoilt enrolment form to an Issuing Officer for them to put in their Envelope S7
3	Issue a fresh enrolment form.

2. More complex situations

Most situations are routine. However a few may be more complex.

If there are any doubts, the Voting Place Manager should call the Electorate Manager using the voting place mobile phone.

The Voting Place Manager must contact the Electorate Manager if:

- There is an accident in the voting place (write the details in M33-INCIDENT Incident, Near Miss and Injury Report)
- There are concerns from a staff member or the public about candidate advertising or activities in or around the voting place, particularly if voters are hindered in their access.

If you are calling your Mobile Support or Electorate Manager to report a problem or incident, provide the following information:

- **Who:** your name & number
- **When** it happened
- **Where** it happened (address/description)
- **What** happened
- **What** you did
- **What** you intend to do next

Glossary

Agent	A person appointed by a voter to collect a takeaway vote on their behalf
Ballot box	Box used for voter to place their completed ballot paper
Ballot paper	Paper on which the voter indicates their preferred candidate and political party
EasyVote card	Card posted to every voter on the printed electoral roll, providing their details from the roll
Election Day	The day of the election
Electoral roll	The printed roll used to issue ordinary votes
Electorate	Geographical area defined for voting purposes
Electorate Manager	Person responsible for the management of an electorate
Electorate headquarters	The building from which a Electorate Manager runs their electorate
Enrolment form	The application form used to enrol to vote or to update enrolment details
eRoll	An electronic version of the roll
General electorate	Electorate for voters on the general roll
Issuing Officer	Person responsible for issuing votes
Issuing point	Where votes are issued within a voting place
Issuing Support Officer	Person who fills in for other staff on breaks and supports the VPM with end of day tasks
Māori electorate	Electorate for voters on the Māori roll
Mobile Support	Person responsible for visiting voting places to ensure processes are being followed and supplies are appropriately stocked
Ordinary vote	A vote cast by a voter who is on an electoral roll at the voting place they attend
Reconciliation	Process to account for every used and unused ordinary ballot and voting paper and special vote declaration

Reference roll	A roll that is not used to issue votes from, also known as a composite roll
Registrar of Electors	Person responsible for the management of an electoral roll(s)
Scrutineer	Person who observes the conduct of the election on behalf of candidates
Security Guard	Person who is employed to assist with maintaining a safe and secure voting place
Special vote	A vote cast by a voter whose name is not on an electoral roll at an voting place (may also be referred to as a 'special declaration vote')
Special Vote slip	A tear-off slip from the letter mailed to a voter who enrolled after the electoral roll was printed, or who is on the unpublished roll, providing their details from the electoral roll and how to vote
Takeaway vote	A type of special vote that can be completed outside of a voting place
Unpublished roll	A roll containing the names of voters whose personal details are not released publicly
Voter Assistant	Person who helps to manage queues of voters and the enrolment process in a voting place
Voting Place	A physical site where voting takes place
Voting Place Manager	Person responsible for managing a voting place

Notes:

HEALTH AND SAFETY

Keep yourself and others safe in the voting place.

Tell your Manager immediately if you notice anything that could be a hazard or could hurt you or someone else.

A hazard could be:

- An electrical cord lying across the floor or hanging loose from the wall
- A rip in the carpet or a raised piece of flooring
- A puddle of water on the floor.

Your Manager will look for ways to deal with the hazard, by either removing it, isolating it, or otherwise ensuring that it is no longer a problem.

When lifting heavy items, keep a straight back and bend your knees. Ask for help if you need it. Help others with lifting heavy or awkwardly shaped items, including at the end of the day when loading voting materials into vehicles.

Accidents, other incidents and near misses

- Tell the Voting Place Manager if you have an injury during the day, even if it is minor. The Manager has a first aid kit, and you may be asked to complete an incident form.
- If an accident happens to someone else, you may be asked to help with the response or with contacting others. After the situation is resolved, you may be asked to help with completing an incident form.
- Report serious non-injury incidents or near misses. For example something safety related that the building owner should know about.

You are likely to be very tired at the end of a long day at the Voting Place, and for some, a long drive home may be unsafe for you. Make a plan during the day of what you will do to get home safely, if you find yourself in this situation.

If there is a threat to people, materials or property - call 111

Before voting begins:

- Get familiar with the voting place including the location of the evacuation assembly point
- Make sure you know at least two ways out of the building
- Be aware of where the Incident Management Handbook is located in the voting place

If you need to leave the voting place as a result of an emergency:

- Leave all elections material behind
- Go straight to the assembly point
- Continue with your own personal evacuation plans once you have reported to your Manager.

REMEMBER:

People are the priority.

Ensure you and those around you are safe.

DO NOT

- X** Try to take elections material with you
- X** Re-enter the building once you have left

REMAIN CALM

LEAVE THE VOTING PLACE QUICKLY

Electorate Manager's phone number

Managing queues with eRoll

 Kia ora/Hello, do you have a voting card?

 Yes

Direct to the appropriate queue

 No

That's okay, let's look up your details.
 What is your:

- first name
- last name
- month of birth

[search on eRoll to find possible match to the voter]
 Could you please confirm your address [check for match]

If the voter gives you another address that is different to the one in eRoll

I'm sorry, but I can't see that address. Have you lived at another address in [give the suburb/town of the address in eRoll]

If the voter gives you a previous address that matches the one in eRoll, tap on the record

Okay, as you have a new address, let's see if we can update it electronically

Electorate: 33 OHĀRIU

Updating a voters address with eRoll

Tap Update

Ask the voter the questions as prompted on the eRoll screen

Address change within their current electorate: ask the voter to check their details and sign on screen. Provide the voting card and direct to OV

I declare that:

- I am eligible to enrol at the address I provided in this application
- All the information I have provided is true and correct, and
- I understand that giving false or misleading information is a criminal offence.

Signature:

Clear signature CONFIRM

Address change outside of their current electorate

Unfortunately your new address is outside of your current electorate. So I will need to get you to complete an enrolment form to update your details

Provide an enrolment form, clipboard and pen. Provide a voting card and direct to the special vote queue

Update Complete

New address is in a different electorate. Provide enrolment form and issue special vote.

Electorate: 42 REMUTAKA

Ordinary vote
 Special vote
 Not on printed roll
 Out of electorate
 Enrolment

Multiple addresses / different date of birth / not an address in eRoll

We can't update your details on our device today, but you can complete an enrolment form and complete a special vote

Provide an enrolment form, clipboard and pen. Provide the voting card and direct to SV

Update Complete

New address cannot automatically be linked to an electorate. Provide enrolment form and issue special vote.

Update Complete

The voter has multiple addresses that do not match eRoll. Provide an enrolment form and issue a special vote.

Update Complete

The voter's declared date of birth doesn't match the record being updated. Provide the voter an enrolment form and issue a special vote.

Managing queues without eRoll

No

That's okay, do you know which electorate you are enrolled in?

"Yes"

Ordinary vote

If the voter is not found on a printed roll, provide an enrolment form and special vote declaration

Voter is not enrolled

Provide an enrolment form

Special Vote

Voter is unsure

If you have a reference roll for where they live: check their details

Voter found with correct details

Ordinary vote

Voter not found or incorrect details

Provide an enrolment form

Special Vote

If you do not have a reference roll

Provide an enrolment form

Special Vote

Voter says they are on the unpublished roll

Special Vote

[REDACTED]

[14/10 9:10 am] William [REDACTED]

[REDACTED]

[14/10 9:23 am] Sam [REDACTED]

Morning team, just had a call from Beka [REDACTED] at the [REDACTED] electorate, she's advised eRoll on one of the voting place phones is completely inaccessible. I checked her sign-in logs and the error shows the phone is not [REDACTED] compliant. I looked up the device in [REDACTED] and found the below:

[REDACTED]

would this require a re-image of the phone or would it be fine for us to wait?

[14/10 10:01 am] Vincent [REDACTED]

Hi there, Sam - looking into this

[14/10 10:03 am] Tim [REDACTED]

Hi, [REDACTED] shows the device is compliant (now) and Beka successfully authorised at 9:05am

[14/10 10:05 am] Tim [REDACTED]

Sam, can you confirm if this is still an issue please?

[14/10 10:08 am] Zak [REDACTED]

Hi Tim, i'll call the user and confirm this.

[14/10 10:18 am] Zak [REDACTED]

Zak [REDACTED]

Hi Tim, i'll call the user and confirm this.

All resolved, closing on our end.

[14/10 10:20 am] William [REDACTED]

eRoll is down team

[14/10 10:20 am] Zak [REDACTED]

Hi team mass calls for Eroll application not being able to select electorates reported as of 2 minutes ago

[14/10 10:27 am] William [REDACTED]

we're advising users the following: "we are enabling the BCP process for when Eroll down - please go to your voter assistance Pim, and go to page 18. it will guide you on what you need to do"

[14/10 10:27 am] Vincent [redacted]

Thanks William - thanks team -

will keep you posted - under investigation but no ETA at this stage

[14/10 10:37 am] William [redacted]

we're getting some calls advising eRoll is back up and working. only some at this stage

[14/10 10:42 am] William [redacted]

Anahera [redacted] has called in from the [redacted] High School, [redacted] Electorate. They apparently dont have any paper rolls to use. So they cant do BCP. Calling the EM now, just an FYI

[14/10 10:46 am] William [redacted]

well its kinda sorted. EM emailed them some paper enrollment forms and they're printing them out now. Hopefully no more issues.

[14/10 10:56 am] Henry [redacted]

How are call volumes now - calming down?

[14/10 10:56 am] William [redacted]

248

[14/10 10:56 am] William [redacted]

calming down now, but eRoll hit us pretty hard

[14/10 11:00 am] Zak [redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[redacted]

[14/10 11:08 am] William [redacted]

any updates with eRoll?

[14/10 11:10 am] Vincent [redacted]

under investigation - looking at resource capacity (connections) - the major spike that caused the major impact has decreased but may be VP going to BCP -

[14/10 11:10 am] Henry [REDACTED]

it is with Catalyst and [REDACTED]. EC will advise when staff can resume using it

[14/10 11:11 am] Vincent [REDACTED]

Henry -- adding to you to Incident Management call -

[14/10 11:19 am] Vincent [REDACTED]

Hi team - Incident Management team are working through issue - looks to be a traffic capacity bottleneck - looking to scale up (doubling the number of connections) in the first instance - will look at when this proposed change will take place

[14/10 11:22 am] Henry [REDACTED]

Hi Vincent, looks like still a large number of calls coming in for this. can VS send another etext update to all staff at all?

[14/10 11:22 am] Bliss [REDACTED]

[REDACTED]

[14/10 11:25 am] Vincent [REDACTED]

Henry [REDACTED]

Hi Vincent, looks like still a large number of calls coming in for this. can VS send another etext update to all staff at all?

We have started to make some changes to increase the traffic capacity (non-disruptive change) -

We are seeing if this has made a difference - will update shortly

[14/10 11:26 am] William [REDACTED]

appreciate the prompt updates

[14/10 11:27 am] Vincent [REDACTED]

This connections uplift has shifted the bottleneck load to the next server (database server is now under load) -

[REDACTED]

[14/10 11:42 am] Vincent [REDACTED]

Just an update on e-Roll major incident to this thread -

Currently investigating traffic (worker) connections and server resource capacity loads with change proposals underway to scale up capacity where needed -

This may require a database server reboot to apply the upscale in capacity/resources to handle load - will let you know if this does go ahead -

[14/10 11:57 am] Henry [REDACTED]

how are calls looking?

[14/10 12:00 pm] William [REDACTED]

303

[14/10 12:34 pm] William [REDACTED]

Vincent [REDACTED]

Just an update on e-Roll major incident to this thread - Currently investigating traffic (worker) connections and server resource capacity loads with change proposals underway to scale up capacity where needed - This may require a database server reboot to apply the upscale in capacity/resourc...

can we get another update with eRoll?

[14/10 12:36 pm] Mark [REDACTED]

William [REDACTED] still discussing changes to improve service ... decision imminent on Code change with no outage, resource change with outage ruled out for now

[14/10 12:39 pm] Mark [REDACTED]

ok change approved to update code ... micro outage,,, right now

[14/10 12:40 pm] Mark [REDACTED]

should be back online already

[14/10 12:41 pm] Mark [REDACTED]

can get users to test now ... testing on our side looks like it may be resolved

[14/10 12:42 pm] Mark [REDACTED]

please confirm with users ...

[14/10 12:42 pm] William [REDACTED]

we are calling users back now

[14/10 12:42 pm] Mark [REDACTED]

wait for a few minutes

[14/10 12:42 pm] William [REDACTED]

lol too late

[14/10 12:42 pm] Mark [REDACTED]

we need to send out coms our end .. from VS

[14/10 12:42 pm] William [REDACTED]

we've already started, I'll tell everyone to wait tho haha

[14/10 12:43 pm] Mark [REDACTED]

yeah if users call in they can retry .. dont call back quite yet

[14/10 12:43 pm] Mark [REDACTED]

we want to manage the load -- dont want all users back in at once

[14/10 12:51 pm] William [REDACTED]

we've only called 4 users at this stage, and they have ALL confirmed its working.

[14/10 12:52 pm] Mark [REDACTED]

thanks mate!

[14/10 1:01 pm] Henry [REDACTED]

how are calls looking now

[14/10 1:02 pm] Enize [REDACTED]

Eroll still down, the user who confirmed 5 min ago advise now again that it is doing the same thing it was earlier

[14/10 1:02 pm] William [REDACTED]

Henry [REDACTED]

how are calls looking now

353

[14/10 1:03 pm] Mark [REDACTED]

ok will tell the team

[14/10 1:09 pm] Mark [REDACTED]

investigations underway again ... i'll update you as information comes in

[14/10 1:10 pm] Sam [REDACTED]

cheers Mark

[14/10 1:22 pm] William [REDACTED]

Mark [REDACTED]

investigations underway again ... i'll update you as information comes in

could we get some comms sent out advising eRoll is down again, we're getting alot of calls regarding it.

[14/10 1:23 pm] Mark [REDACTED]

i dont beleive they sent out comms yet to say its back online ...

[14/10 1:23 pm] William [REDACTED]

William [REDACTED]

could we get some comms sent out advising eRoll is down again, we're getting alot of calls regarding it.

okay, relatively not that many calls - probably around 30 since 1pm

[14/10 1:23 pm] William [REDACTED]

users are saying they have

[14/10 1:23 pm] Mark [REDACTED]

Ah ok . will have that checked ...

[14/10 1:30 pm] Mark [REDACTED]

changes have been made and it looks like there is an improvement -please keep an eye on the call queues and let us know how it goes, we will send out coms once confirmed officially

[14/10 1:35 pm] Mark [REDACTED]

We believe this should now be resolved . please monitor and advise if it reoccurs

[14/10 1:36 pm] Enize [REDACTED]

Shall we start calling users back now?

[14/10 1:36 pm] Mark [REDACTED]

whats the load like ?

[14/10 1:37 pm] Mark [REDACTED]

they will get offical coms from VS so no need

[14/10 1:37 pm] Bliss [REDACTED]

Currently only one person taking a call

[14/10 1:39 pm] Mark [REDACTED]

William [REDACTED]

353

is that for the day or waiting to be answered ?

[14/10 1:40 pm] Bliss [REDACTED]

391 for the day now, none in queue waiting to be answered

353 would've been the total for the day at that time

[14/10 1:40 pm] Enize [REDACTED]

One user has confirmed now that it is working. We will keep you updated

[14/10 1:40 pm] William [REDACTED]

Mark [REDACTED]

is that for the day or waiting to be answered ?

definitely for the entire day!

[14/10 1:55 pm] Vincent [REDACTED]

e-Roll Major Incident - Update

Subsequent to the initial change implemented at 12:45, we have applied a further emergency change which has shown improvements to e-roll performance - Continuing to maintain close watch and monitoring

[14/10 1:59 pm] William [REDACTED]

yup looks really good so far

[14/10 2:00 pm] William [REDACTED]

we're slowly calling users to advise. very slowly at this stage

[14/10 2:20 pm] William [REDACTED]

any updates with eRoll? Should we start calling more users to test?

[14/10 2:25 pm] Mark [REDACTED]

the VC coms went out - there should be no need for a call back . but yes its considered resolved

[14/10 3:26 pm] Sam [REDACTED]

Sam [REDACTED] [REDACTED]

Morning team, just had a call from Beka [REDACTED] at the [REDACTED] electorate, she's advised eRoll on one of the voting place phones is completely inaccessible. I checked her sign-in logs and the error shows the phone is not Intune compliant. I looked up the device in [REDACTED] and found the...

Hi team, had another user Theresa [REDACTED] call through with this same issue since the morning. Device name: [REDACTED]. Would you be able to sort this one out as well? Cheers team

[14/10 3:27 pm] William [REDACTED]

hey team, just double checking will there be a standup at 3:30 today?

[14/10 3:30 pm] Vincent [REDACTED]

Hi team - we have one at 4pm

[14/10 3:54 pm] Mark [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 5:08 pm] Henry [REDACTED]

Hi, how are the tickets looking now?

[14/10 5:09 pm] William [REDACTED]

hey henry, they're looking good. [REDACTED]

[14/10 5:25 pm] William [REDACTED]

we've got 2 users on the line with eRoll issues. Same as earlier

[14/10 5:25 pm] William [REDACTED]

hopefully level 1 resolves it

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] 😊

[REDACTED]

[14/10 5:40 pm] Bliss [REDACTED]

Had another user call up with the same issue but during the call it came back with the Electorates able to be selected, but just searched very slowly

[14/10 5:40 pm] Jordan [REDACTED]

Hey guys. I have escalated the E-Roll slowness issues to the Apps team. They are looking into this as a priority right now. Will update you guys as soon as I can

[14/10 5:41 pm] Jordan [REDACTED]

Thanks Bliss. What's the name of the user and where are they located?

[14/10 5:41 pm] William [REDACTED]

looks like the issues earlier in the day have returned. Not as bad but we're getting calls about it

[14/10 5:41 pm] Bliss [REDACTED]

Jordan [REDACTED]

Thanks Bliss. What's the name of the user and where are they located?

Brent [REDACTED], working in [REDACTED] Electorate at [REDACTED] Primary School

Can be contactable on [REDACTED]

[14/10 5:45 pm] Jordan [REDACTED]

Thanks for the information guys. Issue is across different areas so safe to say that issues have picked back up. Thankfully just slow and not completely down

[14/10 5:48 pm] Mark [REDACTED]

seems to have gotten better on the back end how many calls are you getting

[14/10 5:48 pm] William [REDACTED]

not many at all. 4 calls

[14/10 5:48 pm] Mark [REDACTED]

was dodgy for 515 -- to 545

[14/10 5:49 pm] Mark [REDACTED]

still investigating

[14/10 5:49 pm] Mark [REDACTED]

keep me posted if you get more

Paul [redacted] 14/10 5:19 pm

I have fielded a number of questions around whether the end of day reconciliation app is likely to suffer load related issues like eRoll this am, so thought I'd put a quick update here and happy to answer any questions online/offline. Essentially we (IT) have more confidence that this app will perform as expected at end of day. That confidence is based on 2 factors 1. The app is serviced from our Microsoft Azure infrastructure and as such has significant scale and capability. 2) Load Testing performed in May 22 that I have been able to locate today demonstrates that the app has been tested under peak load, as follows:

High level Summary Metrics

Maximum concurrent users	2800
Total Throughput(bytes)	9401069140
Average Throughput	24,629.687
Total Hits	112350
Average Hits Per Second	15.158

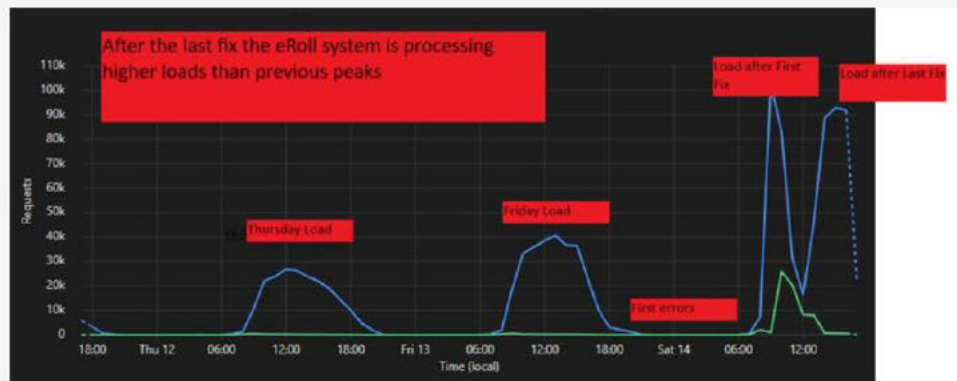

Transaction Response Times (Seconds)

Transaction Name	90th Percentile	Minimum	Maximum
EC_Recon_T01_LaunchURL	4.568	1.627	6.405
EC_Recon_T02_ClickSignin	1.234	0.334	1.368
EC_Recon_T03_ClickSubmit	1.586	0.035	1.763

Paul [redacted] 14/10 5:29 pm

P [redacted]

And an update on eRoll just to show that we have now exceeding prior volumes and continues to perform

Processing volumes now in excess of previous peaks (Thursday and Friday). Green and Blue are good. Higher the better.

👍 2

Paul [redacted] 14/10 5:50 pm

P [redacted]

eRoll FYI - we have seen a number of spikes in errors between 5:15 and 5:40 but transactions are still getting through at much higher volumes than Thursday and Friday but we did see some errors which would have resulted in performance slowness for some users. at 5:40 errors dropped again completely. Seems like a 25 minute drop off but now ok. Still investigating and monitoring closely

Paul [redacted] 14/10 8:45 pm

P [redacted]

End of Reconciliation app holding up pretty well so far, processed over 60,000 requests, 26 errors (0.043%) mostly mobile connectivity related. Over 2100 users connected, 1200 peak concurrency.

👍 2

2023-10-24 12:48

#29 [REDACTED] does not run regular scheduled job concurrently if they are detected as still running. No evidence of multiple job runs in the scheduled_job-instance table for these two jobs. The job scheduler will wait until no job of that name is running before starting another.
a month ago
by [Andrew \[REDACTED\]](#)
2023-10-14 20:59 Will need to analyze further why these jobs are now taking much longer than they used to.

I saw that they have been taking longer to run in the month or so leading up to the election so it is not a sudden jump in execution time today only.

#28 I'm not sure it is the culprit but its clearly not great when a job that normally takes 2 minutes to complete and runs every 15 minutes is taking closer to an hour. I've updated the Generate Suspicious Session Data and Generate Suspicious IP Data jobs to run every 3 hours with the next runs after 8pm.
a month ago
by [Jeff \[REDACTED\]](#)
2023-10-14 18:53

The suspicious session data job has been running approximately every 90 minutes today so I'd be a little surprised if that was the ultimate cause.

#27 Looking like the culprit may be some query related to a regular job that checks for suspicious IP activity.
a month ago
by [Shannon \[REDACTED\]](#)

██████████
2023-10-14 18:45 The job was starting to take longer than 15 minutes and may have been running multiple times concurrently, causing issues.

Jeff was apparently considering modifying the frequency from running every 15 minutes.

That process is also running against the primary database server, and could be run against a secondary instead.

#26
a month ago
by [lan](#) ██████████
2023-10-14 18:42

Hi Shannon,

Could you provide the update please? Thanks, lan.

#25
a month ago
by [Shannon](#)
██████████
2023-10-14 18:03

New batch of 500 and 502's reported and visible in ██████████ dashboard for:

17:10 - 17:40

Investigation into those ongoing.

#24

by [Andrew](#)
██████████
2023-10-14 13:06

Noting that for eRoll Load Testing that was undertaken to have identified this as a bug - every load test query would need to have used a 'fake' IP address.

This bug still existed at GE 2020 but with far fewer API calls due to more limited eRoll functionality - I assert that the load never got critical

#20
a month ago
by [Shannon](#)
██████████
2023-10-14 12:56

Noting that post the change to the code on pubapp, the DB server load halved from 18 to 9.

502 Response codes for eroll stopped, and 200 codes went from ~40/minute to up near 1000/minute.

#19

Electoral Commission Cyber Security Warning: This email originated from outside of the Commission. Please take extra care when clicking links or opening attachments. When in doubt, contact the IT Service Desk.

Kia ora Karl,

I'm writing to follow up on a conversation I had with Dean a few minutes ago about the software issues the Commission is experiencing, and the impact on people's ability to vote. Dean was very helpful, and provided an assurance that the Commission was aware of the software issues and are working to fix it as soon as possible.

We're now receiving multiple reports from different electorates of voting queues that are lasting up to 45 minutes, potentially due to these issues, with people leaving the line before casting a ballot (examples are Kieburn School, Kelston Boys High School, St Leonards Primary School).

We are very concerned by reports that people are leaving voting lines due to the length of time they have to wait, and that they may have been discouraged from voting at all by the experience.

Could I please get an urgent update on how the Commission is managing this situation so that nobody is prevented or discouraged from voting due to the software issues and length of waiting time?

In the event that the software issues and lines persist past 1pm, could we please also get an assurance that the Commission will be putting out extensive, proactive communications to assure people that they'll all have a reasonable opportunity to vote?

Ngā mihi,

Hi all

Adele assures me that E-roll issues is not the cause of the long queues. It was expected that we will have a rush on election day. She says that every voting place has the hard copy rolls which they can use to check if someone is on the roll.

Ngā mihi

Just in standup back in 5

[14/10 2:20 pm] Ian [REDACTED]

Closed this meeting for now - thanks all

14/10 2:25 pm Meeting ended: 1h 23m 8s

Summary

TEAMS thread Further eroll issues
Start time 14/10/23, 5:34:10 PM
End time 14/10/23, 6:43:20 PM

Participants

Ian [REDACTED], Morgan [REDACTED], Mark [REDACTED] Matthew [REDACTED], Jeff [REDACTED], Paul [REDACTED], Adam [REDACTED], James [REDACTED], Shannon, Godfrey, Andrew

Messages

[14/10 5:34 pm]

Ian [REDACTED] named the meeting Further eroll issues.

14/10 5:34 pm Meeting started

[14/10 5:48 pm] Andrew [REDACTED]

I can hear you but you can't hear me

[14/10 5:51 pm] Andrew [REDACTED]

I rejoined but you still cannot hear me.

[14/10 5:51 pm] Andrew [REDACTED]

can you hear me?

[14/10 5:51 pm] Morgan [REDACTED]

Yes we can hear you, there is a lot of background noise that's quite loud

[14/10 5:52 pm] Mark [REDACTED]

ive muted you due to the feedback

[14/10 6:12 pm] Andrew [REDACTED]

thanks

[14/10 6:12 pm] Andrew [REDACTED]

Sorry about the mic noise

[14/10 6:39 pm] shannon [REDACTED]

Hey, latest from me, is that we're still investigating but a "regular job that checks for suspicious IP activity" may be involved as a culprit. It normally runs every 15 minutes, but was taking longer than 15 minutes to run and may have overlapped.

14/10 6:43 pm Meeting ended: 1h 9m 10s

[14/10 6:44 pm] Ian [REDACTED]

could that be caused by commenting out the code which logged IPs do you think?

[14/10 6:50 pm] shannon [REDACTED]

Don't think so, as they are using different database tables, but I've asked Andrew to confirm

[14/10 6:59 pm] shannon [REDACTED]

Jeff has changed to job to every 3 hours now

[14/10 7:02 pm] Jeff [REDACTED]

the job has been taking more than 15 minutes for the entirety of advanced voting won't be helping things

[14/10 7:15 pm] shannon [REDACTED]

Andrew also confirms that the early change isn't directly related to the suspicious ip check

[14/10 7:16 pm] shannon [REDACTED]

eroll traffic has basically disappeared now btw

Summary

TEAMS thread GE2023 Election Day - IT Task activities (incl. Ext partners)

Start time 14/10/23, 7:48:00 AM

End time 14/10/23, 9:30:00 PM

[14/10 7:48 am]

Vincent [REDACTED] changed the group name to GE2023 Election Day - IT Task activities (incl. Ext partners).

[14/10 7:48 am] Vincent [REDACTED]

Good morning everyone - the following chat thread will be covering off task activities throughout the day 😊 Participants on this chat includes key external partners - Catalyst, One, CCL-Cello

[14/10 10:20 am] Vincent [REDACTED]

VS just dropping in - issue with e-Roll - calls coming into NST unable to lookup E-Roll - calling Jeff & Matthew to investigate

[14/10 10:22 am] Vincent [REDACTED]

Matthew is looking into now -

[14/10 10:23 am] Stephen [REDACTED]

The Task Force are aware of the issue and I informed them we are aware and working on it

[14/10 10:23 am] Matthew [REDACTED]

Eroll seems to be working for me but it does seem slow

[14/10 10:24 am] Henry [REDACTED]

SD is getting quite a few calls. what is the advice to end users- go to BCP?

[14/10 10:27 am]

Matthew [REDACTED] added Jeff [REDACTED] to the chat and shared all chat history.

[14/10 10:28 am] Morgan [REDACTED]

There's an increase in HTTP 502 errors in [REDACTED] logs for eRoll

[14/10 10:28 am] Vincent [REDACTED]

Correct Henry [REDACTED] - Voting Services is sending out e-text to advise users to refer to the BCP step

[14/10 10:30 am] Matthew [REDACTED]

jeff looking at eRoll logs and not seeing anything weird happening on that end

[14/10 10:33 am] Morgan [REDACTED]

From Cloudflare I can see the eRoll API paths are have the issue with the 502 errors:

Traffic for election.govt.nz

Paths

[14/10 10:34 am] Ian [REDACTED]

Vincent [REDACTED] is going to set up a separate call on this folks

[14/10 11:38 am] Vincent [REDACTED]

Just an update on e-Roll major incident to this thread -

Separate Incident management - technical conference channel in place with Catalyst

Currently investigating traffic [REDACTED] connections and server resource capacity loads with change proposals underway to scale up capacity where needed -

CCL Service Desk been closely updated - they are still receiving calls related to this incident

Voting Services NST have sent out an e-TXT to advise to go to BCP

[14/10 12:06 pm] Ian [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Current work:

+ Urgently working through a P1 issue with Catalyst on eRoll performance.

Next scheduled update:

+ After 4:45pm, when [REDACTED] OR P1 eRoll issue resolved.

[14/10 12:49 pm] Vincent [REDACTED]

e-Roll Major Incident -

Approved emergency change has been applied to resolve SQL query lag

- Early indications are showing positive significant signs in performance & traffic metrics for e-Roll

- Maintaining close watch and monitoring

[14/10 1:53 pm] Vincent [REDACTED]

e-Roll Major Incident - Update

Subsequent to the initial change implemented at 12:45, we have applied a further emergency change which has shown improvements to e-roll performance - Continuing to maintain close watch and monitoring

[14/10 1:55 pm] Stephen [REDACTED]

Vincent [REDACTED] how do we know there are improvements if people have been told not to use it?

[14/10 1:56 pm] Vincent [REDACTED]

VS have started to advise the user community to start to use it again

[14/10 1:56 pm] Ian [REDACTED]

We're currently monitoring progress vs previous peak on Friday

Summary

TEAMS thread Chief Information Officer and Senior Manager IT Services conversations on election day

Start time 14/10/23, 6:09:00 AM

End time 14/10/23, 7:37:00 PM

[14/10 6:09 am] Paul [REDACTED]

Morena - looks like we are all set for the day with systems. Can you create the Teams channel for the day and include all IT, Lucy and key relationship managers - Catalyst, Cello, One, CCL and anyone else you think and then start posting the updates on key tasks - can you also let me know before 8 if there is anything of significance to update taskforce.

[14/10 6:57 am] Ian [REDACTED]

yep doing it now

[14/10 6:59 am] Paul [REDACTED]

Thanks

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 7:11 am] Ian [REDACTED]

Vince is just creating the TEAMS channel

[14/10 7:15 am] Pau [REDACTED]

Cool

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

we're missing a "Size for GE day volumes" across the apps

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 11:27 am] Ian [REDACTED]

guess we're going to have take everything down and scale it all up

[14/10 11:28 am] Ian [REDACTED]

as I don't like the wait and see where the bottleneck goes to approach from Shannon

[14/10 11:29 am] Paul [REDACTED]

Nope

[14/10 11:29 am] Paul [REDACTED]

Can you keep me posted

[14/10 11:30 am] Ian [REDACTED]

now doubling another set of connections further into the system

[14/10 11:32 am] Ian [REDACTED]

there was load testing performed as recently as September last month

[14/10 11:32 am] Ian [REDACTED]

just finding out a bit more

[14/10 11:36 am] Ian [REDACTED]

I'm going to hold off changing server capacity until I have your okay because it involves bringing the service down completely for a minute or two

[14/10 11:37 am] Ian [REDACTED]

if you could ask for business approval on that front if you're able then that'd be much appreciated in order to get this fixed quickly.

[14/10 11:45 am] Ian [REDACTED]

just checking outage < 10 mins

[14/10 11:46 am] Ian [REDACTED]

discussing how much to increase database server config by - to make sure they have thought it through and aren't been too cautious

[14/10 11:59 am] Ian [REDACTED]

brilliant point by Vince

[14/10 11:59 am] Paul [REDACTED]

I missed it!

[14/10 12:00 pm] Ian [REDACTED]

here to help

[14/10 12:00 pm] Pau [REDACTED]

brilliant

[14/10 12:48 pm] Paul [REDACTED]

Wellington on how are we looking????

[14/10 12:48 pm] Ian [REDACTED]

yep really good

[14/10 12:48 pm] Ian [REDACTED]

I've found out the reason why not picked up earlier

[14/10 12:50 pm] Paul [REDACTED]

How are we looking

[14/10 12:50 pm] Ian [REDACTED]

Great no issues

[14/10 12:50 pm] Ian [REDACTED]

go for it

[14/10 12:50 pm] Ian [REDACTED]

Will continue to monitor obviously

[14/10 12:55 pm] Ian [REDACTED]

unscientific reasons why this wasn't picked up previously:

+ it is a branch of inefficient code that is triggered by a new request from a different IP to the previous one. Looks like load testing only happened from a single IP therefore the code didn't go down that branch.

+ peak request got up to 350,000 hour this morning - previous peak on advance voting period was 54,000 so didn't create enough transactions for the system to get overloaded.

This is only speculation, I will need to do more investigation on the load testing plus we need to check when that inefficient code was put in.

[14/10 12:58 pm] Ian [REDACTED]

Morgan is picking up a reoccurrence of the 502 errors

[14/10 12:58 pm] Ian [REDACTED]

more to follow

[14/10 1:07 pm] Paul [REDACTED]

can you share the live graph with me so i can show Karl

[14/10 1:07 pm] Ian [REDACTED]

Morgan will call you now directly

[14/10 1:07 pm] Paul [REDACTED]

have we got an update from Catalyst

[14/10 1:07 pm] Ian Henry

and share it

[14/10 1:08 pm] Ian [REDACTED]

I've got Catalyst on the line at the moment - they're unable to provide an update until Shannon turns up

[14/10 1:10 pm] Paul [REDACTED]

Fab! Do we need to get some over there to man mark them

[14/10 1:11 pm] Ian [REDACTED]

I don't think they're onsite

[14/10 1:11 pm] Paul [REDACTED]

Interesting not what Godfrey said!!

[14/10 1:11 pm] Ian [REDACTED]

Shannon is definitely at home

[14/10 1:11 pm] Ian [REDACTED]

unless he's brought his kid to work with him

[14/10 1:12 pm] Paul Jepson

right

[14/10 1:13 pm] Paul [REDACTED]

I think we need a whiteboard session to work through this

[14/10 1:15 pm] Ian [REDACTED]

Neither Shannon, Godfrey or James are in the office

[14/10 1:21 pm] Ian [REDACTED]

commenting out the successful login update itself to see if that reduces contention

[14/10 1:22 pm] Ian [REDACTED]

we're starting to get to the point where we should say no more stick to BCP - this is soaking up time and I don't like this patch as we go approach

[14/10 1:22 pm] Ian [REDACTED]

checking the effects of the change now

[14/10 1:23 pm] Ian [REDACTED]

green shoots of recovery

[14/10 1:23 pm] Paul [REDACTED]

does that mean working?

[14/10 1:24 pm] Ian [REDACTED]

yes but need to see it operating okay as the full load comes on

[14/10 1:25 pm] Paul [REDACTED]

do we need a controlled release? got to be careful confidence is shot, we don't need any further damage - a big ask i know

[14/10 1:25 pm] Ian [REDACTED]

I think lets see it run okay for 10 minutes and then review

[14/10 1:25 pm] Ian [REDACTED]

we've already made that change

[14/10 1:26 pm] Ian [REDACTED]

the issues seem to be related to the number of different IPs being used by eRoll and how the system is logging that

[14/10 1:26 pm] Paul [REDACTED]

ok - risk?

[14/10 1:26 pm] Paul [REDACTED]

bad design then

[14/10 1:26 pm] Ian [REDACTED]

low risk - no change to function or other apps

[14/10 1:27 pm] Ian [REDACTED]

Paul [REDACTED] - bad design then

I would think so - especially given the use case is for use out in the field by thousands of users simultaneously

[14/10 1:28 pm] Ian [REDACTED]

morgan is sending you a visual

[14/10 1:28 pm] Ian [REDACTED]

that shows second fix being applied

[14/10 1:28 pm] Ian [REDACTED]

so you can use with Karl if need be

[14/10 1:28 pm] Paul [REDACTED]

please im still here

[14/10 1:30 pm] Paul [REDACTED]

via email

[14/10 1:30 pm] Ian [REDACTED]

he is changing to email now - about 2 mins away

[14/10 1:30 pm] Paul [REDACTED]

do we want full load back on

[14/10 1:31 pm] Paul [REDACTED]

Adele will need to comms out when we are ready

[14/10 1:32 pm] Ian [REDACTED]

Yes please - Catalyst are saying logs are looking good. Cloudflare showing similar.

Catalyst are saying unlikely that this particular issue will reoccur

Yes please go ahead with full load.

[14/10 1:32 pm] Ian [REDACTED]

email is with you now

[14/10 1:34 pm] Ian [REDACTED]

There were reports of [REDACTED] running slowly for Enrolment - Jeff has investigated thoroughly - there were less than 5 users affected intermittently.

[14/10 1:34 pm] Ian [REDACTED]

so no relation or significant problem there

[14/10 1:34 pm] Paul [REDACTED]

probably related

[14/10 1:34 pm] Ian [REDACTED]

I don't think so

[14/10 1:34 pm] Ian [REDACTED]

just watercooler chat

[14/10 1:35 pm] Paul [REDACTED]

adele has instructed full load

[14/10 1:35 pm] Paul [REDACTED]

with Jeff

[14/10 1:37 pm] Ian [REDACTED]

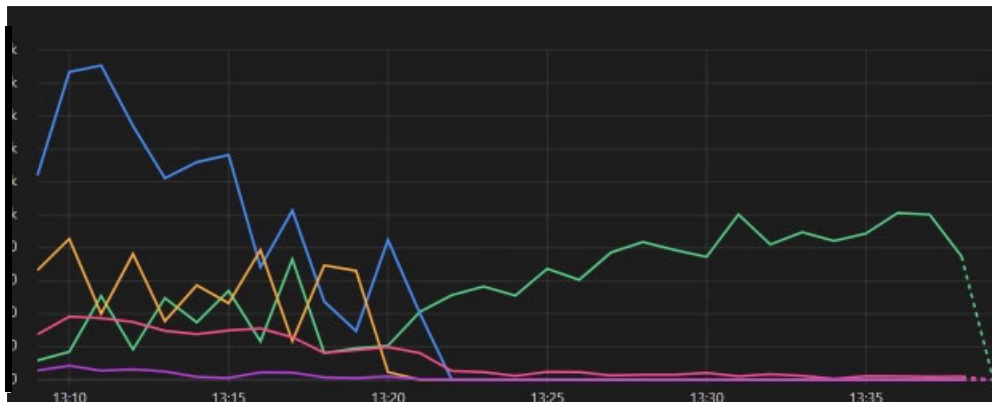

no issue so far

[14/10 1:39 pm] Ian [REDACTED]

Service desk queues are now clear

[14/10 1:40 pm] Ian [REDACTED]

[REDACTED] just now - GREEN is good - all other colours are bad - ignore the dotted line

[14/10 1:40 pm] Ian [REDACTED]

any feedback from the field now?

[14/10 5:06 pm] Ian [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 5:06 pm] Paul [REDACTED]

OK can you message morgan to send me those stats or graph or whatever on eroll so can do an update and close out.

[14/10 5:08 pm] Ian [REDACTED]

he's on this call but have messaged Mark [REDACTED]

[14/10 5:15 pm] Ian [REDACTED]

have given up on Mark [REDACTED]

[14/10 5:15 pm] Ian [REDACTED]

Morgan doing graph for me now

Processing volumes now in excess of previous peaks (Thursday and Friday). Green and Blue are good. Higher the better.

[14/10 5:31 pm] Ian [REDACTED]

Morgan just said it is seeing issues again

[14/10 5:31 pm] Ian [REDACTED]

stand by caller

[14/10 5:33 pm] Ian [REDACTED]

doesn't seem absolutely as bad - is generating some calls to SD

[14/10 5:33 pm] Ian [REDACTED]

I'll reset up the call with Catalyst

[14/10 5:34 pm] Paul [REDACTED]

you're kidding

[14/10 6:13 pm] Ian [REDACTED]

no further reoccurrence - Shannon will keep looking at logs and update at 6.30 on progress to finding what the issue was

[14/10 7:37 pm] Ian [REDACTED]

How about:

People can still vote. However, we are currently experiencing issues with our electronic version of the electoral roll. We are working to resolve it and are using manual processes that were used prior to 2020 before introducing the electronic roll into voting places.

This will have no impact on most people's voting experience, although it may cause slight delays at some of our busiest voting places.

Kia ora Karl,

We've had queries from most major media outlets about our electronic electoral roll.

Are you OK with the following response:

We are currently experiencing issues with our electronic version of the electoral roll. We are working to resolve it and are using manual processes that were used prior to 2020 before introducing the electronic roll into voting places.

People can still vote, and this will have no impact on most people's voting experience, although it may cause slight delays at some of our busiest voting places.

Subject: FINAL STATEMENT

Voting continues today with a large number of people coming out to vote. There was an issue with the electronic version of the electoral roll at voting places which has now been fixed. The app is used to look up people who don't have their EasyVote card or don't know which electorate they are in. The issue has had no impact on most people's voting experience but caused some delays for people casting a special vote at some of our busiest voting places. Separate to this, there have been queues at some voting places today due to high demand and additional staff have been brought in to support our busiest voting places. Between 11am and 2pm are usually the busiest times to vote on election day.

Anyone in line at a voting place at 7pm, will be able to vote.

More than 2,300 voting places are open until 7pm today which is a similar number to previous elections.

In the South Island, two voting places are closed due to the weather.

The Adventure Bike Park at Cracroft, Banks Peninsula, was closed due to high winds, which meant that the voting place located there closed too. Alternative voting places to the Bike Park are Te Hāpua Halswell Centre, Thorrlington School Hall, Somerfield School Hall, and Pioneer Recreation and Sport Centre.

Tikiraki North Loburn School is currently closed due to fallen trees and flooding from a broken water tank. The nearest alternative voting place is Loburn School Te Kura Aromauka.

Hi all – is this statement correct and able to be used to respond to political parties, the media and social media?
Thanks, Clare

We are working hard to resolve an issue with the electronic version of the electoral roll.
The electronic version of the electoral roll is used to look up people who don't have their EasyVote card or don't know which electorate they are in.
The issue has had no impact on most people's voting experience but is causing some delays for people casting a special vote at some of our busiest voting places.
Separate to this, there have been queues at some voting places today due to high demand. Between 11am and 2pm are usually the busiest times on election day.

Anyone in line at a voting place at 7pm, they will be able to vote.

In the South Island, two voting places are closed due to the weather.

The Adventure Bike Park at Cracroft, Banks Peninsula, was closed due to high winds, which meant that the voting place located there closed too. Alternative VPs to the Bike Park are Te Hāpua Halswell Centre, Thorrrington School Hall, Somerfield School Hall, and Pioneer Recreation and Sport Centre.

Tihiraki North Loburn School is currently closed due to fallen trees and flooding from a broken water tank. The nearest alternative voting place is Loburn School Te Kura Aromauka.

Tēnā koe party secretaries

Voting continues today with a large number of people coming out to vote.

There was an issue with the electronic version of the electoral roll at voting places which has now been fixed. The app is used to look up people who don't have their EasyVote card or don't know which electorate they are in.

The issue has had no impact on most people's voting experience but caused some delays for people casting a special vote at some of our busiest voting places.

Separate to this, there have been queues at some voting places today due to high demand and additional staff have been brought in to support our busiest voting places. Between 11am and 2pm are usually the busiest times to vote on election day.

Anyone in line at a voting place at 7pm, will be able to vote.

More than 2,300 voting places are open until 7pm today which is a similar number to previous elections.

In the South Island, two voting places are closed due to the weather.

The Adventure Bike Park at Cracroft, Banks Peninsula, was closed due to high winds, which meant that the voting place located there closed too. Alternative voting places to the Bike Park are Te Hāpua Halswell Centre, Thorrington School Hall, Somerfield School Hall, and Pioneer Recreation and Sport Centre.

Tihiraki North Loburn School is currently closed due to fallen trees and flooding from a broken water tank. The nearest alternative voting place is Loburn School Te Kura Aromauka.

Ngā mihi

Nationwide outage of the Electoral System. Started about an hour ago. Beyond a joke and no excuses for it on Election Day @ElectoralCommNZ #nzpol

 1   1  276  

  Oct 14 ...

What system is down? Isn't it paper ballots and getting your name ticked off the printed list?

 2    155  

 **Electoral Commission | Te Kaitiaki Take Kōwhiri**  @ElectoralCommNZ ...

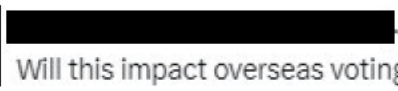

Kia ora, the issue we have been experiencing with the electronic version of the electoral roll will have no impact on most people's voting experience, although may cause some delays for people casting a special vote at some our busiest voting places.

Will this impact overseas voting?

 1   1  134  

 **Electoral Commission | Te Kaitiaki Take Kōwhiri**  @ElectoralComm · Oct 14 ...

Kia Simon - this issue has now been resolved. It didn't impact overseas voting.

   2  123  

Public tweet:

  Oct 14 ...

What's going on @ElectoralCommNZ?
There are reports of people being held up from casting their vote due to system failures?
Those without ezy vote cards especially.
What will happen if there are still ques of people trying to exercise their democratic right to vote after 7pm

 11  3  34  774  

Electoral Commission | Te Kaitiaki Take Kōwhiri ✓
@ElectoralCommNZ

Kia ora, this issue has been resolved. While it was still a problem, we used the manual processes that were used prior to 2020 before introducing the electronic roll into voting places.

14 Oct 2023, 12:04

Kia Ora, what is the plan when the electoral apps go down at the voting stations?

14 Oct 2023, 14:39

Kia ora we have a manual process which is what we used prior to 2020 before introducing the electronic roll into voting places. Our electronic system is back up now.

Ngā mihi and appreciate the feedback 🙌 keep up the great work e hoa mā

Date Created	Correspondence #	Message Body	Notes
Oct-23		<p>1 Name [REDACTED] Email [REDACTED] From site elections.nz Subject Voting Type Complaint</p> <p>Message I would like to lodge a formal complaint to the commission about the following two incidents on election day. 1. the lack of voting booths at Auckland City Hospital on election day. My mother was in hospital and many patients and staff in her ward were expecting to be able to vote at the voting station set up on the level 5 foyer. However this station, while there for the week prior was not there on the actual election day. This meant no patients, visitors or staff could vote. This is unacceptable that the commission did not account for the hospital population who needed to vote ON election day. 2. After not being able to vote at the hospital I drove to three kings where, due to the website fault and all regular voters having to make special votes there were no statutory declaration forms left for people to make special votes (I was voting out of electorate). I waited for 25 minutes until forms were available and in that time I saw 6 people get up and leave-time is a privilege. These two issues, both on election day are unacceptable and expect the commission to explain why it thought 1. No voting station at New Zealand's largest hospital on voting was acceptable 2. The estimate votes that were not taken due to the commission's inability to keep online systems in place</p>	
Nov-10		<p>2 Kia ora [REDACTED]</p> <p>We wanted to let you know we are still investigating your complaint (Reference [REDACTED] and will endeavour to get back to you as soon as possible.</p> <p>Thank you for your patience.</p> <p>Ngā mihi, Heather</p> <p>Heather Customer Services Electoral Commission Te Kaitiaki Take Kōwhiri PO Box 190 Wellington 6140 Phone 0800 36 76 56</p>	
Dec-05		<p>3 Kia ora [REDACTED]</p> <p>Thank you for your feedback.</p> <p>Our voting places have to follow specific rules set out in legislation. This particularly applies to voting places open on election day.</p> <p>On election day, we have to complete the count of votes where they were taken. To do this, we need a locked room in which we can conduct the count, away from the public. Because voting places in hospitals are in large, open areas, we cannot complete our count securely.</p> <p>We also work with hospital staff according to their circumstances. It's often not possible to operate a voting place until 7pm in a hospital because this conflicts with visiting hours for the public.</p> <p>Thanks for your feedback.</p>	
Oct-15		<p>1 Mr Le Quesene</p> <p>You have some real questions to answer.</p> <p>While spending your time pursuing a bunch of woke, flowery, racist objectives, you haven't delivered on the really basic stuff like running an election successfully (making sure everyone gets their voter pack on time, or making sure the voter ID works).</p> <p>This kind of failure is pervasive in government - and things are now about to change for the better.</p> <p>You have been part of the problem. Time to resign.</p> <p>[REDACTED] (retired high-school maths teacher)</p>	
Oct-16		<p>2 Dea [REDACTED]</p> <p>Thank you for your interest in the electoral process. The delivery times for EasyVote packs are largely determined by timelines set down in law. These, the NZ Post delivery schedule, and our communication of the timelines to the public will be examined in our post-election report, which will identify ways to improve the timeliness of information getting to voters. We will also investigate the causes of the temporary outage of the eRoll app on Election Day. Manual backup processes were in place to issue voting papers while the app was not working.</p> <p>Yours sincerely Ethan [REDACTED]</p>	
Oct-15		<p>1 Name [REDACTED] Email [REDACTED] From site elections.nz Subject Parties and candidates Type Complaint</p> <p>Message This is my own personal complaint to all at the EC, from top down, of your incompetence at your handling of all things voting this year. From your lack of support for one new Party, namely, NZ Loyal, to leaving their party name off one of the Northland voting papers, to not getting voting papers out in time to some of your electronic systems failing on election day! Shit! You all should be sacked and decommissioned for such incompetence in your roles! I advise you all be replaced by people who know how to do their job properly!</p>	No response as there is no request included.
Oct-14		<p>1 Caller [REDACTED] at a VP in Ohakune - unable to enter elector's address in eRoll as it was a new build. Have had [REDACTED] add AP in MIKE so this can be updated by VP staff.</p>	
Oct-14		<p>1 Hi</p> <p>I went to vote at Napier surf club booth, Marine Parade, about 1 30 pm.</p> <p>There was a queue of 6-8 people all waiting while one person filled out special voting papers. The app was down, the other officer didn't know what to do, one person from tukituki electorate couldn't vote as they had no papers for that electorate, and didn't know what to do. Other people wanting to do special votes couldn't for the same reasons.</p> <p>It was incompetent and undemocratic.</p> <p>You have had 3 years to sort this, and you had one job...</p> <p>Regards [REDACTED]</p>	
Oct-14		<p>2 Kia ora [REDACTED]</p> <p>Thank you for your enquiry.</p> <p>We would like to investigate this issue, but we will require more information from you before we can do that. Please provide us with</p> <p>Phone number (if you wish to be contacted further about this) Name of voting place staff member the issue concerns Have you voted? If not, why. What happened? Other details Do you wish to be contacted further about this issue?</p> <p>Ngā mihi, Tiana Customer Services Electoral Commission Te Kaitiaki Take Kōwhiri PO Box 190 Wellington 6140 Phone 0800 36 76 56</p>	
Oct-18		<p>3 Thanks for getting back to me.</p> <p>I don't need to be contacted. I did vote. There were only two staff on, one was away on lunch break. I don't know their names. English accent. They were telling people they'd run out of tukituki papers and didn't know what to do. Also, they didn't know what to do with unenrolled people. The app was not working. 4 or 5 people left without voting. Hopeless</p> <p>Regards [REDACTED]</p>	
Oct-14		<p>1 We received this complaint about a voting place.</p> <p>Name of enquirer not given Is the complaint on behalf of someone else? Yes If so, who? a friend who was voting at the same time as her Contact information (if you wish to be contacted further about this) N/A Electorate where issue occurred Rotorua Voting Place where issue occurred Glenholme School Hall, 149 Ranolf Street Date/Time of incident (be as precise as possible) 14 October, around 12 30-12 45 Name of voting place staff member the issue concerns/who they spoke to not taken Have you voted? Yes If not, why. What happened? Other details Caller advised that the person on the door at this voting place is directing everyone to complete a special vote, which is causing unnecessary queues. Her friend, who is in the electorate and on the printed roll was directed to the special vote queue as he didn't have an EV card. She advised her friend that this was incorrect, and told him to stand in the ordinary vote line, where he was looked up and marked off the printed roll, and given his voting paper. She wanted feedback to be given that people who are enrolled in electorate but don't have EV card should not be directed to special vote line. She mentioned the app being down, so this is related to eRoll and perhaps the workaround being used is not efficient. Do you wish to be contacted further about this issue? No</p>	
Oct-14		<p>1 Received this complaint about a voting place - marked as urgent as he hasn't voted, but hopefully we have found a way for him to vote.</p> <p>Name of enquirer [REDACTED] Is the complaint on behalf of someone else? No If so, who? Contact information (if you wish to be contacted further about this) N/A Electorate where issue occurred Whanganui Voting Place where issue occurred Presbyterian Centre, 35 Argyle Street Date/Time of incident (be as precise as possible) Around noon, 14 October Name of voting place staff member the issue concerns/who they spoke to Unknown lady who he thought may have been Indian Have you voted? No If not, why. What happened? [REDACTED] went in to the voting place, after waiting in line for half an hour, was then told he needed to fill out a "boarding pass" and then was sat at a desk for another 20 minutes without being seen. He said people who came in after him were standing up and filling out "boarding passes" behind him, but he was just left sitting there. [REDACTED] has social anxiety and advised he felt like he was being treated differently. Eventually he had an anxiety attack and had to get up and leave. He called us from the car outside the voting place. Other details Found another voting place at Ramanui School that [REDACTED] can get to. He was worried about the same thing happening again. I called through to electorate HQ to discuss his situation, have asked them to let them know at Ramanui School VP that [REDACTED] will be coming in, he has already had a bad experience and to try to treat him with some sensitivity. Was unsure what the "boarding passes" were, but as eRoll is down, I'm assuming they were enrolment forms [REDACTED] only updated his enrolment details yesterday, and they wouldn't have been able to look him up. I confirmed [REDACTED] enrolment over the phone, and confirmed he is enrolled and does not need to enrol. I also asked for this to be passed on to VP at Ramanui School, so he can bypass the enrolment form, as he will be telling them this also. I have told him that he will need to cast a special vote, so he may need to wait, which will involve him being sat down without anything to fill out. This may be what happened at the first voting place, but his perception was that he was being treated differently. We also discussed a takeaway, but he has nobody to pick papers up for him. Do you wish to be contacted further about this issue? No</p>

[14/10 9:23 am] Sam [REDACTED]

Morning team, just had a call from Beka [REDACTED] at the [REDACTED] electorate, she's advised eRoll on one of the voting place phones is completely inaccessible. I checked her sign-in logs and the error shows the phone is not [REDACTED] compliant. I looked up the device in [REDACTED] and found the below:

[REDACTED]

would this require a re-image of the phone or would it be fine for us to wait?

[14/10 10:01 am] Vincent [REDACTED]

Hi there, Sam - looking into this

[14/10 10:03 am] Tim [REDACTED]

Hi, [REDACTED] shows the device is compliant (now) and Beka successfully authorised at 9:05am

[14/10 10:05 am] Tim [REDACTED]

Sam, can you confirm if this is still an issue please?

[14/10 10:08 am] Zak [REDACTED]

Hi Tim, i'll call the user and confirm this.

[14/10 10:18 am] Zak [REDACTED]

Zak [REDACTED]

Hi Tim, i'll call the user and confirm this.

All resolved, closing on our end.

[14/10 10:20 am] William [REDACTED]

eRoll is down team

[14/10 10:20 am] Zak [REDACTED]

Hi team mass calls for Eroll application not being able to select electorates reported as of 2 minutes ago

[14/10 10:27 am] William [REDACTED]

we're advising users the following: "we are enabling the BCP process for when Eroll down - please go to your voter assistance Pim, and go to page 18. it will guide you on what you need to do"

[14/10 10:27 am] Vincent [REDACTED]

Thanks William - thanks team -

will keep you posted - under investigation but no ETA at this stage

[14/10 10:37 am] William [REDACTED]

we're getting some calls advising eRoll is back up and working. only some at this stage

[14/10 10:42 am] William [REDACTED]

Anahera [REDACTED] has called in from the [REDACTED] High School, [REDACTED] Electorate. They apparently dont have any paper rolls to use. So they cant do BCP. Calling the EM now, just an FYI

[14/10 10:46 am] William [REDACTED]

well its kinda sorted. EM emailed them some paper enrollment forms and they're printing them out now. Hopefully no more issues.

[14/10 10:56 am] Henry [REDACTED]

How are call volumes now - calming down?

[14/10 10:56 am] William [REDACTED]

248

[14/10 10:56 am] William [REDACTED]

calming down now, but eRoll hit us pretty hard

[14/10 11:00 am] Zak [REDACTED]

[REDACTED]

[14/10 11:08 am] William [REDACTED]

any updates with eRoll?

[14/10 11:10 am] Vincent [REDACTED]

[14/10 11:42 am] Vincent [REDACTED]

Just an update on e-Roll major incident to this thread -

Currently investigating traffic [REDACTED] connections and server resource capacity loads with change proposals underway to scale up capacity where needed -

This may require a [REDACTED] server reboot to apply the upscale in capacity/resources to handle load - will let you know if this does go ahead -

[14/10 11:57 am] Henry [REDACTED]

how are calls looking?

[14/10 12:00 pm] William [REDACTED]

303

[14/10 12:34 pm] William [REDACTED]

Vincent [REDACTED]

Just an update on e-Roll major incident to this thread - Currently investigating traffic [REDACTED] connections and server resource capacity loads with change proposals underway to scale up capacity where needed - This may require a [REDACTED] server reboot to apply the upscale in capacity/resourc...

can we get another update with eRoll?

[14/10 12:36 pm] Mark [REDACTED]

William [REDACTED] still discussing changes to improve service ... decision imminent on Code change with no outage, resource change with outage ruled out for now

[14/10 12:39 pm] Mark [REDACTED]

ok change approved to update code ... micro outage,,, right now

[14/10 12:40 pm] Mark [REDACTED]

should be back online already

[14/10 12:41 pm] Mark [REDACTED]

can get users to test now ... testing on our side looks like it may be resolved

[14/10 12:42 pm] Mark [REDACTED]

please confirm with users ...

[14/10 12:42 pm] William [REDACTED]

we are calling users back now

[14/10 12:42 pm] Mark [REDACTED]

wait for a few minutes

[14/10 12:42 pm] William [REDACTED]

lol too late

[14/10 12:42 pm] Mark [REDACTED]

we need to send out coms our end .. from VS

[14/10 12:42 pm] William [REDACTED]

we've already started, I'll tell everyone to wait tho haha

[14/10 12:43 pm] Mark [REDACTED]

yeah if users call in they can retry .. dont call back quite yet

[14/10 12:43 pm] Mark [REDACTED]

we want to manage the load -- dont want all users back in at once

[14/10 12:51 pm] William [REDACTED]

we've only called 4 users at this stage, and they have ALL confirmed its working.

[14/10 12:52 pm] Mark [REDACTED]

thanks mate!

[14/10 1:01 pm] Henry [REDACTED]

how are calls looking now

[14/10 1:02 pm] Enize [REDACTED]

Eroll still down, the user who confirmed 5 min ago advise now again that it is doing the same thing it was earlier

[14/10 1:02 pm] William [REDACTED]

Henry [REDACTED]

how are calls looking now

353

[14/10 1:03 pm] Mark [REDACTED]

ok will tell the team

[14/10 1:09 pm] Mark [REDACTED]

investigations underway again ... i'll update you as information comes in

[14/10 1:10 pm] Sam [REDACTED]

cheers Mark

[14/10 1:22 pm] William [REDACTED]

Mark [REDACTED]

investigations underway again ... i'll update you as information comes in

could we get some comms sent out advising eRoll is down again, we're getting alot of calls regarding it.

[14/10 1:23 pm] Mark [REDACTED]

i dont beleive they sent out comms yet to say its back online ...

[14/10 1:23 pm] William [REDACTED]

William [REDACTED]

could we get some comms sent out advising eRoll is down again, we're getting alot of calls regarding it.

okay, relatively not that many calls - probably around 30 since 1pm

[14/10 1:23 pm] William [REDACTED]

users are saying they have

[14/10 1:23 pm] Mark [REDACTED]

Ah ok . will have that checked ...

[14/10 1:30 pm] Mark [REDACTED]

changes have been made and it looks like there is an improvement -please keep an eye on the call queues and let us know how it goes, we will send out coms once confirmed officially

[14/10 1:35 pm] Mark [REDACTED]

We believe this should now be resolved . please monitor and advise if it reoccurs

[14/10 1:36 pm] Enize [REDACTED]

Shall we start calling users back now?

[14/10 1:36 pm] Mark [REDACTED]

whats the load like ?

[14/10 1:37 pm] Mark [REDACTED]

they will get offical coms from VS so no need

[14/10 1:37 pm] Bliss [REDACTED]

Currently only one person taking a call

[14/10 1:39 pm] Mark [REDACTED]

William [REDACTED]

353

is that for the day or waiting to be answered ?

[14/10 1:40 pm] Bliss [REDACTED]

391 for the day now, none in queue waiting to be answered

353 would've been the total for the day at that time

[14/10 1:40 pm] Enize [REDACTED]

One user has confirmed now that it is working. We will keep you updated

[14/10 1:40 pm] William [REDACTED]

Mark [REDACTED]

is that for the day or waiting to be answered ?

definitely for the entire day!

[14/10 1:55 pm] Vincent [REDACTED]

e-Roll Major Incident - Update

Subsequent to the initial change implemented at 12:45, we have applied a further emergency change which has shown improvements to e-roll performance - Continuing to maintain close watch and monitoring

[14/10 1:59 pm] William [REDACTED]

yup looks really good so far

[14/10 2:00 pm] William [REDACTED]

we're slowly calling users to advise. very slowly at this stage

[14/10 2:20 pm] William [REDACTED]

any updates with eRoll? Should we start calling more users to test?

[14/10 2:25 pm] Mark [REDACTED]

the VC coms went out - there should be no need for a call back . but yes its considered resolved

[14/10 3:26 pm] Sam [REDACTED]

Sam [REDACTED] [REDACTED]

Morning team, just had a call from Beka [REDACTED] at the [REDACTED] electorate, she's advised eRoll on one of the voting place phones is completely inaccessible. I checked her sign-in logs and the error shows the phone is not [REDACTED] compliant. I looked up the device in [REDACTED] and found the...

Hi team, had another user Theresa [REDACTED] call through with this same issue since the morning. Device name: [REDACTED]. Would you be able to sort this one out as well? Cheers team

[14/10 3:27 pm] William [REDACTED]

hey team, just double checking will there be a standup at 3:30 today?

[14/10 3:30 pm] Vincent [REDACTED]

Hi team - we have one at 4pm

[REDACTED]

[REDACTED]

[14/10 5:08 pm] Henry [REDACTED]

Hi, how are the tickets looking now?

[14/10 5:09 pm] William [REDACTED]

hey henry, they're looking good. [REDACTED]

[14/10 5:25 pm] William [REDACTED]

we've got 2 users on the line with eRoll issues. Same as earlier

[14/10 5:25 pm] William [REDACTED]

hopefully level 1 resolves it

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] 😊

[REDACTED]

[14/10 5:40 pm] Bliss [REDACTED]

Had another user call up with the same issue but during the call it came back with the Electorates able to be selected, but just searched very slowly

[14/10 5:40 pm] Jordan [REDACTED]

Hey guys. I have escalated the E-Roll slowness issues to the Apps team. They are looking into this as a priority right now. Will update you guys as soon as I can

[14/10 5:41 pm] Jordan [REDACTED]

Thanks Bliss. What's the name of the user and where are they located?

[14/10 5:41 pm] William [REDACTED]

looks like the issues earlier in the day have returned. Not as bad but we're getting calls about it

[14/10 5:41 pm] Bliss [REDACTED]

Jordan [REDACTED]

Thanks Bliss. What's the name of the user and where are they located?

Brent [REDACTED], working in [REDACTED] Electorate at [REDACTED] Primary School

Can be contactable on [REDACTED]

[14/10 5:45 pm] Jordan [REDACTED]

Thanks for the information guys. Issue is across different areas so safe to say that issues have picked back up. Thankfully just slow and not completely down

[14/10 5:48 pm] Mark [REDACTED]

seems to have gotten better on the back end how many calls are you getting

[14/10 5:48 pm] William [REDACTED]

not many at all. 4 calls

[14/10 5:48 pm] Mark [REDACTED]

was dodgy for 515 -- to 545

[14/10 5:49 pm] Mark [REDACTED]

still investigating

[14/10 5:49 pm] Mark [REDACTED]

keep me posted if you get more

Attachments: [signature.asc](#)

Kia ora Karl, Lucy and Paul

At time of writing this email the eRoll app connectivity issues are resolved and have been for a number of hours. What follows is very early analysis based on my sitting next to some of the people resolving the issue and following our internal conversations. As well as discussions with Godfrey and James.

Issues began just after 10am as can be seen from graphs showing connection requests. At that point we experienced request loads of in excess of [REDACTED]/hour. The 2020 peak load experienced was [REDACTED]/hour.

Our operations and application teams were working on the response immediately and engaging in constant communications with EC. Remediation attempts began right away including upping the [REDACTED] and [REDACTED] limits. Each change we made was communicated to EC and approved or not after a brief risk assessment.

The initial changes helped but didn't solve the root cause which was deep in the way the app connects to the backend system. A change to a database query was identified and implemented at 12:45. There was still some Tidy-up activity carried on for another 30 minutes. We haven't seen any problems since that completed.

The root cause of the problem is behaviour that has been encoded in the system since it was first developed and released prior to 2020. It has worked without issue for that GE and in the early voting period.

Today's issue would not easily have been identified in the standard load tests that we always run as it related to the individual identities (IP addresses) of [REDACTED] of devices in the field. It was triggered by the extra load *probably* a result of more people voting on the day and the app being used for more tasks.

I'd like to thank all the EC staff, lead by Paul, for their role in supporting our activities and providing input to our analysis. Decisions were made quickly and coherently. This allowed our team to focus on continuing to work on solutions rather than waiting for long periods of time.

If you have any further questions please don't hesitate to contact me by email or phone.

Ngā mihi
Don

Hi Paul,

Another change was made (around 1:22) that appears to have fixed the issue. In the below graph the successful connections are shown by the green and pink lines:

We are monitoring eRoll closely.

Best regards,

Morgan [redacted] | Cyber Security Analyst | [Electoral Commission](#) | Te Kaitiaki Take Kōwhiri

Ian [REDACTED], Morgan [REDACTED], Mark [REDACTED] Matthew [REDACTED], Jeff [REDACTED], Paul [REDACTED], Adam [REDACTED], James [REDACTED], Shannon, Godfrey, Andrew

Messages

[14/10 5:34 pm]

Ian [REDACTED] named the meeting Further eroll issues.

14/10 5:34 pm Meeting started

[14/10 5:48 pm] Andrew [REDACTED]

I can hear you but you can't hear me

[14/10 5:51 pm] Andrew [REDACTED]

I rejoined but you still cannot hear me.

[14/10 5:51 pm] Andrew [REDACTED]

can you hear me?

[14/10 5:51 pm] Morgan [REDACTED]

Yes we can hear you, there is a lot of background noise that's quite loud

[14/10 5:52 pm] Mark [REDACTED]

ive muted you due to the feedback

[14/10 6:12 pm] Andrew [REDACTED]

thanks

[14/10 6:12 pm] Andrew [REDACTED]

Sorry about the mic noise

[14/10 6:39 pm] shannon [REDACTED]

Hey, latest from me, is that we're still investigating but a "regular job that checks for [REDACTED] activity" may be involved as a culprit. It normally runs every 15 minutes, but was taking longer than 15 minutes to run and may have overlapped.

14/10 6:43 pm Meeting ended: 1h 9m 10s

[14/10 6:44 pm] Ian [REDACTED]

could that be caused by commenting out the code which logged IPs do you think?

[14/10 6:50 pm] shannon [REDACTED]

Don't think so, as they are using different database tables, but I've asked Andrew to confirm

[14/10 6:59 pm] shannon [REDACTED]

Jeff has changed to job to every 3 hours now

[14/10 7:02 pm] Jeff [REDACTED]

the job has been taking more than 15 minutes for the entirety of advanced voting won't be helping things

[14/10 7:15 pm] shannon [REDACTED]

Andrew also confirms that the early change isn't directly related to the [REDACTED] check

[14/10 7:16 pm] shannon [REDACTED]

eroll traffic has basically disappeared now btw

Summary

TEAMS thread GE2023 Election Day - IT Task activities (incl. Ext partners)

Start time 14/10/23, 7:48:00 AM

End time 14/10/23, 9:30:00 PM

[14/10 7:48 am]

Vincent [REDACTED] changed the group name to GE2023 Election Day - IT Task activities (incl. Ext partners).

[14/10 7:48 am] Vincent [REDACTED]

Good morning everyone - the following chat thread will be covering off task activities throughout the day 😊 Participants on this chat includes key external partners - Catalyst, One, CCL-Cello

[14/10 10:20 am] Vincent [REDACTED]

VS just dropping in - issue with e-Roll - calls coming into NST unable to lookup E-Roll - calling Jeff & Matthew to investigate

[14/10 10:22 am] Vincent [REDACTED]

Matthew is looking into now -

[14/10 10:23 am] Stephen [REDACTED]

The Task Force are aware of the issue and I informed them we are aware and working on it

[14/10 10:23 am] Matthew [REDACTED]

Eroll seems to be working for me but it does seem slow

[14/10 10:24 am] Henry [REDACTED]

SD is getting quite a few calls. what is the advice to end users- go to BCP?

[14/10 10:27 am]

Matthew [REDACTED] added Jeff [REDACTED] to the chat and shared all chat history.

[14/10 10:28 am] Morgan [REDACTED]

There's an increase in HTTP 502 errors in [REDACTED] logs for eRoll

[14/10 10:28 am] Vincent [REDACTED]

Correct Henry [REDACTED] - Voting Services is sending out e-text to advise users to refer to the BCP step

[14/10 10:30 am] Matthew [REDACTED]

jeff looking at eRoll logs and not seeing anything weird happening on that end

[14/10 10:33 am] Morgan [REDACTED]

From [REDACTED] I can see the eRoll API paths are have the issue with the 502 errors:

[14/10 10:34 am] Ian [REDACTED]

Vincent [REDACTED] is going to set up a separate call on this folks

[14/10 11:38 am] Vincent [REDACTED]

Just an update on e-Roll major incident to this thread -

Separate Incident management - technical conference channel in place with Catalyst

Currently investigating traffic [REDACTED] connections and server resource capacity loads with change proposals underway to scale up capacity where needed -

CCL Service Desk been closely updated - they are still receiving calls related to this incident

Voting Services NST have sent out an e-TXT to advise to go to BCP

[14/10 12:06 pm] Ian [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Current work:

+ Urgently working through a P1 issue with Catalyst on eRoll performance.

Next scheduled update:

+ After 4:45pm, when [REDACTED] OR P1 eRoll issue resolved.

[14/10 12:49 pm] Vincent [REDACTED]

e-Roll Major Incident -

Approved emergency change has been applied to resolve SQL query lag

- Early indications are showing positive significant signs in performance & traffic metrics for e-Roll

- Maintaining close watch and monitoring

[14/10 1:53 pm] Vincent [REDACTED]

e-Roll Major Incident - Update

Subsequent to the initial change implemented at 12:45, we have applied a further emergency change which has shown improvements to e-roll performance - Continuing to maintain close watch and monitoring

[14/10 1:55 pm] Stephen [REDACTED]

Vincent [REDACTED] how do we know there are improvements if people have been told not to use it?

[14/10 1:56 pm] Vincent [REDACTED]

VS have started to advise the user community to start to use it again

[14/10 1:56 pm] Ian [REDACTED]

We're currently monitoring progress vs previous peak on Friday

Summary

TEAMS thread Chief Information Officer and Senior Manager IT Services conversations on election day

Start time 14/10/23, 6:09:00 AM

End time 14/10/23, 7:37:00 PM

[14/10 6:09 am] Paul [REDACTED]

Morena - looks like we are all set for the day with systems. Can you create the Teams channel for the day and include all IT, Lucy and key relationship managers - Catalyst, Cello, One, CCL and anyone else you think and then start posting the updates on key tasks - can you also let me know before 8 if there is anything of significance to update taskforce.

[14/10 6:57 am] Ian [REDACTED]

yep doing it now

[14/10 6:59 am] Paul [REDACTED]

Thanks

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 7:11 am] Ian [REDACTED]

Vince is just creating the TEAMS channel

[14/10 7:15 am] Pau [REDACTED]

Cool

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

we're missing a "Size for GE day volumes" across the apps

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 11:27 am] Ian [REDACTED]

guess we're going to have take everything down and scale it all up

[14/10 11:28 am] Ian [REDACTED]

as I don't like the wait and see where the bottleneck goes to approach from Shannon

[14/10 11:29 am] Paul [REDACTED]

Nope

[14/10 11:29 am] Paul [REDACTED]

Can you keep me posted

[14/10 11:30 am] Ian [REDACTED]

now [REDACTED] another set of connections further into the system

[14/10 11:32 am] Ian [REDACTED]

there was load testing performed as recently as September last month

[14/10 11:32 am] Ian [REDACTED]

just finding out a bit more

[14/10 11:36 am] Ian [REDACTED]

I'm going to hold off changing server capacity until I have your okay because it involves bringing the service down completely for a minute or two

[14/10 11:37 am] Ian [REDACTED]

if you could ask for business approval on that front if you're able then that'd be much appreciated in order to get this fixed quickly.

[14/10 11:45 am] Ian [REDACTED]

just checking outage < 10 mins

[14/10 11:46 am] Ian [REDACTED]

discussing how much to increase [REDACTED] server config by - to make sure they have thought it through and aren't been too cautious

[14/10 11:59 am] Ian [REDACTED]

brilliant point by Vince

[14/10 11:59 am] Paul [REDACTED]

I missed it!

[14/10 12:00 pm] Ian [REDACTED]

here to help

[14/10 12:00 pm] Pau [REDACTED]

brilliant

[14/10 12:48 pm] Paul [REDACTED]

Wellington on how are we looking????

[14/10 12:48 pm] Ian [REDACTED]

yep really good

[14/10 12:48 pm] Ian [REDACTED]

I've found out the reason why not picked up earlier

[14/10 12:50 pm] Paul [REDACTED]

How are we looking

[14/10 12:50 pm] Ian [REDACTED]

Great no issues

[14/10 12:50 pm] Ian [REDACTED]

go for it

[14/10 12:50 pm] Ian [REDACTED]

Will continue to monitor obviously

[14/10 12:55 pm] Ian [REDACTED]

unscientific reasons why this wasn't picked up previously:

+ it is a branch of inefficient code that is triggered by a new request from a different IP to the previous one. Looks like load testing only happened from a single IP therefore the code didn't go down that branch.

+ peak request got up to [REDACTED] hour this morning - previous peak on advance voting period was [REDACTED] so didn't create enough transactions for the system to get overloaded.

This is only speculation, I will need to do more investigation on the load testing plus we need to check when that inefficient code was put in.

[14/10 12:58 pm] Ian [REDACTED]

Morgan is picking up a reoccurrence of the 502 errors

[14/10 12:58 pm] Ian [REDACTED]

more to follow

[14/10 1:07 pm] Paul [REDACTED]

can you share the live graph with me so i can show Karl

[14/10 1:07 pm] Ian [REDACTED]

Morgan will call you now directly

[14/10 1:07 pm] Paul [REDACTED]

have we got an update from Catalyst

[14/10 1:07 pm] Ian Henry

and share it

[14/10 1:08 pm] Ian [REDACTED]

I've got Catalyst on the line at the moment - they're unable to provide an update until Shannon turns up

[14/10 1:10 pm] Paul [REDACTED]

Fab! Do we need to get some over there to man mark them

[14/10 1:11 pm] Ian [REDACTED]

I don't think they're onsite

[14/10 1:11 pm] Paul [REDACTED]

Interesting not what Godfrey said!!

[14/10 1:11 pm] Ian [REDACTED]

Shannon is definitely at home

[14/10 1:11 pm] Ian [REDACTED]

unless he's brought his kid to work with him

[14/10 1:12 pm] Paul Jepson

right

[14/10 1:13 pm] Paul [REDACTED]

I think we need a whiteboard session to work through this

[14/10 1:15 pm] Ian [REDACTED]

Neither Shannon, Godfrey or James are in the office

[14/10 1:21 pm] Ian [REDACTED]

commenting out the successful login update itself to see if that reduces contention

[14/10 1:22 pm] Ian [REDACTED]

we're starting to get to the point where we should say no more stick to BCP - this is soaking up time and I don't like this patch as we go approach

[14/10 1:22 pm] Ian [REDACTED]

checking the effects of the change now

[14/10 1:23 pm] Ian [REDACTED]

green shoots of recovery

[14/10 1:23 pm] Paul [REDACTED]

does that mean working?

[14/10 1:24 pm] Ian [REDACTED]

yes but need to see it operating okay as the full load comes on

[14/10 1:25 pm] Paul [REDACTED]

do we need a controlled release? got to be careful confidence is shot, we don't need any further damage - a big ask i know

[14/10 1:25 pm] Ian [REDACTED]

I think lets see it run okay for 10 minutes and then review

[14/10 1:25 pm] Ian [REDACTED]

we've already made that change

[14/10 1:26 pm] Ian [REDACTED]

the issues seem to be related to the number of different IPs being used by eRoll and how the system is logging that

[14/10 1:26 pm] Paul [REDACTED]

ok - risk?

[14/10 1:26 pm] Paul [REDACTED]

bad design then

[14/10 1:26 pm] Ian [REDACTED]

low risk - no change to function or other apps

[14/10 1:27 pm] Ian [REDACTED]

Paul [REDACTED] - bad design then

I would think so - especially given the use case is for use out in the field by thousands of users simultaneously

[14/10 1:28 pm] Ian [REDACTED]

morgan is sending you a visual

[14/10 1:28 pm] Ian [REDACTED]

that shows second fix being applied

[14/10 1:28 pm] Ian [REDACTED]

so you can use with Karl if need be

[14/10 1:28 pm] Paul [REDACTED]

please im still here

[14/10 1:30 pm] Paul [REDACTED]

via email

[14/10 1:30 pm] Ian [REDACTED]

he is changing to email now - about 2 mins away

[14/10 1:30 pm] Paul [REDACTED]

do we want full load back on

[14/10 1:31 pm] Paul [REDACTED]

Adele will need to comms out when we are ready

[14/10 1:32 pm] Ian [REDACTED]

Yes please - Catalyst are saying logs are looking good. [REDACTED] showing similar.

Catalyst are saying unlikely that this particular issue will reoccur

Yes please go ahead with full load.

[14/10 1:32 pm] Ian [REDACTED]

email is with you now

[14/10 1:34 pm] Ian [REDACTED]

There were reports of [REDACTED] running slowly for Enrolment - Jeff has investigated thoroughly - there were less than 5 users affected intermittently.

[14/10 1:34 pm] Ian [REDACTED]

so no relation or significant problem there

[14/10 1:34 pm] Paul [REDACTED]

probably related

[14/10 1:34 pm] Ian [REDACTED]

I don't think so

[14/10 1:34 pm] Ian [REDACTED]

just watercooler chat

[14/10 1:35 pm] Paul [REDACTED]

adele has instructed full load

[14/10 1:35 pm] Paul [REDACTED]

with Jeff

[14/10 1:37 pm] Ian [REDACTED]

no issue so far

[14/10 1:39 pm] Ian [REDACTED]

Service desk queues are now clear

[14/10 1:40 pm] Ian [REDACTED]

[REDACTED] just now - GREEN is good - all other colours are bad - ignore the dotted line

[14/10 1:40 pm] Ian [REDACTED]

any feedback from the field now?

[14/10 5:06 pm] Ian [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[14/10 5:06 pm] Paul [REDACTED]

OK can you message morgan to send me those stats or graph or whatever on eroll so can do an update and close out.

[14/10 5:08 pm] Ian [REDACTED]

he's on this call but have messaged Mark [REDACTED]

[14/10 5:15 pm] Ian [REDACTED]

have given up on Mark [REDACTED]

[14/10 5:15 pm] Ian [REDACTED]

Morgan doing graph for me now

Processing volumes now in excess of previous peaks (Thursday and Friday). Green and Blue are good. Higher the better.

[14/10 5:31 pm] Ian [REDACTED]

Morgan just said it is seeing issues again

[14/10 5:31 pm] Ian [REDACTED]

stand by caller

[14/10 5:33 pm] Ian [REDACTED]

doesn't seem absolutely as bad - is generating some calls to SD

[14/10 5:33 pm] Ian [REDACTED]

I'll reset the call with Catalyst

[14/10 5:34 pm] Paul [REDACTED]

you're kidding

[14/10 6:13 pm] Ian [REDACTED]

no further reoccurrence - Shannon will keep looking at logs and update at 6.30 on progress to finding what the issue was

[14/10 7:37 pm] Ian [REDACTED]

[REDACTED]

#30 Incident report with EC.
a month ago Remediation work to follow.
by [Shannon \[REDACTED\]](#)
2023-10-24 12:48

#29 [REDACTED] does not run regular scheduled job concurrently if they are detected as still running. No evidence of multiple job runs in the [REDACTED] table for these two jobs. The job scheduler will wait until no job of that name is running before starting another.
a month ago
by [Andrew \[REDACTED\]](#)
2023-10-14 20:59 Will need to analyze further why these jobs are now taking much longer than they used to.

I saw that they have been taking longer to run in the month or so leading up to the election so it is not a sudden jump in execution time today only.

#28 I'm not sure it is the culprit but its clearly not great when a job that normally takes 2 minutes to complete and runs every 15 minutes is taking closer to an hour. I've updated the [REDACTED] and [REDACTED] jobs to run every 3 hours with the next runs after 8pm.
a month ago
by [Jeff \[REDACTED\]](#)
2023-10-14 18:53

The [REDACTED] job has been running approximately every 90 minutes today so I'd be a little surprised if that was the ultimate cause.

#27 Looking like the culprit may be some query related to a regular job that checks for [REDACTED] activity.
a month ago
by [Shannon \[REDACTED\]](#)

██████████
2023-10-14 18:45 The job was starting to take longer than 15 minutes and may have been running multiple times concurrently, causing issues.

Jeff was apparently considering modifying the frequency from running every 15 minutes.

That process is also running against the primary ██████████ server, and could be run against a secondary instead.

Incident Report

eRoll Application Performance Issues

Incident Date: 14 October 2023

Prepared by: NZ Operations, Catalyst EC team, Katrina [REDACTED]

Date of Report: 19 October 2023

WR: [REDACTED] request_id=419462

1. Purpose

This incident report describes issues that arose in connection with the eRoll application on Polling Day, the steps Catalyst took to resolve these issues in consultation with the Electoral Commission, and Catalyst's recommendations for the Electoral Commission's consideration around by-election readiness and initial recommendations for election readiness for GE2026.

2. Summary

- Diminution in performance for the period of the issue was due to historical code that caused a bottleneck under GE2023 transaction volumes.
- Fixes applied on 14 October will provide sufficient resilience for Port Waikato by-election.
- Recommendations have been identified to provide ongoing resilience for General Election functionality, including review of architecture to align to enhanced technology since initial development of the system, increased load testing across additional scenarios and usage of a secondary database for scheduled tasks.

Shortly after 10:00 on 14 October 2023 issues arose in connection with the eRoll application. Connections to the [REDACTED] database from the eRoll application reached a point where transactions against a particular database table were not processed as fast as they were being received. This resulted in slow process times and timeouts for end users.

An initial action to increase server resources did not resolve the issue. A specific database query was identified as the cause of poor performance. The query was confirmed as non-essential to the operation of eRoll. Accordingly, a code change was applied at 13.21 to disable the code that triggered the query. This returned the system to full operation.

Root cause analysis of the fault has determined that heavier than expected load adversely impacted the database query, coupled with the running of a scheduled back end process which also consumed considerable database resource.

3. Description of events

At 10:15 on Polling day the Catalyst Principal Operations Engineer and Senior Networking Engineer noticed anomalous network traffic and began to investigate. At approximately 10:30 Catalyst were informed by the Electoral Commission that polling place staff were experiencing slow performance, or were unable to access the application.

An initial working theory, that this was a recurrence of a previous [REDACTED] issue, was ruled out and focus shifted to troubleshooting the eRoll application and API interface with the [REDACTED] system.

From 9:00 to 10:00 the eRoll application performed as expected and processed approximately [REDACTED] requests. After 10:00 intermittent requests began returning a 502 - Bad Gateway error code¹. A 502 generally points to an issue with an upstream (back-end) server.

Shortly after 11:00, [REDACTED] connections were exhausted and unable to accept further requests for processing. Queued requests that couldn't be allocated to a [REDACTED] eventually timed out and returned a 504 - Gateway Timeout error code.

An configuration change to provide more resources to the system was approved at 11:31. The issue was unresolved following this change as the upstream [REDACTED] system had insufficient throughput to process the increased volume of requests.

In parallel, continued investigation of the [REDACTED] system's performance showed the database running at high load. One database query, used to track successful logins, was identified as the potential cause.

At 12:40 a code workaround to improve the efficiency of the query was deployed. This resulted in initial immediate resolution of system errors for a short period of time. Resource use ramped up shortly after, as polling booth staff began to use the system, which required a further revision to stabilise. Catalyst obtained EC's approval for a further code customisation to bypass the poorly performing query altogether. This update resolved the performance issues.

A further performance issue occurred from 17:10 to 17:40 which had limited end-user impact. This was again noted as being a combination of a particularly high number of eRoll calls to access electorate information, in combination with the [REDACTED] scheduled task. When the task completed, no further errors were reported and the system ran without incident for the rest of Polling Day.

4. Timeline

Date/Time	Description
Saturday, 2023-10-14, @10:15	Catalyst operations staff notice anomalous network traffic and initiate verification process.
10:30	Catalyst Account Manager informed by EC CIO of another potential [REDACTED] issue. Catalyst Account Manager contacts operations team.

¹ Approximately 25% of total requests between 10:00 and 11:00.

10:52	Operations engineers rule out ██████ as a contributing factor. The issue is confirmed as one with eRoll throwing 502: Bad Gateway errors for staff in polling places.
11:01	Principal Operations Engineer suggests the issue as "insufficiently large ██████" bottlenecking requests to the application.
11:07	"██████████ are not enough" found in ██████ log file on application and web servers
11:18	Catalyst proposes to make changes to increase ██████████ from ██████ to ██████ and increase the scale of the eRoll servers.
11:25	Database load noted as issue
11:31	EC approves increased capacity changes
11:33	██████████ workers also increased
11:39	Increased capacity and connections has not remediated the issues with the application
11:45	Specific at-login database query highlighted as potential issue
12:29	Code change for database query fix suggested by developer
12:31	Fix is proposed to bypass the source IP address of the eRoll client.
12:39	EC approves the change; fix implemented
12:40	Application stops reporting errors.
12:50	Catalyst Project Manager notes that this code unchanged from GE2020, but with far fewer API calls due to more limited eRoll functionality, the load never reached this critical point.
12:56	Approval for the same fix to be applied to the ██████████ application.
Date/Time	Description
13:00	Problems with ██████ recur
13:20	A second application query fix suggested by developer (bypass of code method and thus the query)

13:21	Approval gained, query removed, application restarted. Errors cease.
13:25	Some electorates continue to report similar issues. Approval to remove a database lock sought from EC.
13:36	EC approves the change.
17:10-17:40	eRoll reports some 502 errors
18:45	Root cause posited as query related to a regular job that checks for [REDACTED] [REDACTED] Application errors cease when scheduled job concludes.

5. Diagnosis

A frequently called method in the eRoll application updates the [REDACTED] database to track successful logins and record the source IP address in the [REDACTED] database table.

Around 10:00 on Election Day, the heavy volume of updates to the [REDACTED] table began to slow significantly, in some cases taking several seconds to return. New requests were queued, waiting for previous updates to complete. As a result, all requests began to take longer to process, creating a build up of waiting transactions.

This had a knock-on effect on downstream resources that eventually could not keep up with demand. There was a further spike in web requests after 10:00. This likely relates to end users refreshing or re-requesting information as performance wanes - further exacerbating already suboptimal performance.

As transactions are processed, the high volume of updates to the table would have been increasing the amount of database "bloat" in both the table and its indexes. Over time, this would have increased the time taken to locate the row for updates.

A scheduled job that [REDACTED] was running in the background almost continuously throughout the day. This job runs resource intensive database queries and contributed to heavy load, with performance further adversely affected by database bloat.

Bypassing updates to the [REDACTED] table markedly improved processing speed of requests and stabilised resource usage to a sustainable level.

6. Background

All the [REDACTED] applications are built on shared application framework code. The part of the framework which caused the issue in this report was originally written to handle logins for the main [REDACTED] application. It is a part of a security mechanism for tracking failed login attempts, in order to lock out a user account after threshold number of failures is reached.

While the same method is present in API-driven applications like eRoll and the [REDACTED] application, it is not strictly needed. That is because the true user login is handled in [REDACTED], and the account that the framework is tracking is a single account shared by all users of the application.

The fact that all requests to the eRoll application were updating the same shared user record contributed to the degraded performance. The implementation of this method in eRoll pre-dates the GE2020.

6.1. Changes since the 2020 General Election

While the failed login attempt logic was not identified as an issue in the running of GE2020, a number of factors have changed:

- More extensive overall usage - ██████ transactions per hour in 2023 vs ██████ transactions per hour in 2020
- New functions, including allowing eRoll to be used to make simple data updates as well as additional address search features.

However, as set out under Load testing below, these changes were factored into the load testing completed prior to Polling Day.

6.2. Load testing

Catalyst load tested the eRoll code that updates the ██████ database table prior to both 2020 and 2023 General Elections.

In the previous two General Elections, a ██████ load test plan with throughput requirements was provided by the Electoral Commission. In 2020, EC specified a test plan with targets of ██████ requests per hour – double the expected volume. This is the same level of load that was experienced in the first hour of peak operation when polling places opened in 2023.

While a test plan was not provided for the 2023 GE, Catalyst updated the load test suite. This included new scenarios, including new eRoll functions. Load testing did not uncover any potential performance issues.

These load tests demonstrated eRoll successful throughput well in excess of the ██████ transactions per hour baseline set in 2020. The maximum actual load for eRoll on Polling Day 2020 was ██████ requests per hour.

Load testing replicates real life scenarios as much as possible, but the additional contributing factors on the day – extended heavy load on a database table impacting performance and database intensive additional background jobs - generated resource use over and above expectations.

7. Corrective actions for Port Waikato by-election readiness

Issues experienced on Polling Day were a function of the very high levels of load. A single electorate by-election will only generate a small proportion of the transactions processed on Polling Day. The risk of a recurrence under these circumstances is extremely low. The system was in operation through the advance voting period without issue.

However we recommend that the workaround applied on Election Day is retained permanently.

No other remedial actions for by-election readiness are recommended.

8. Future recommendations / corrective actions

The following recommendations will improve overall performance and provide assurance that the system will function adequately under expected peak loads for future General Elections.

1. Ensure load test targets are agreed between Catalyst and EC that reflect 'on-the-day' usage as closely as possible. There is a comprehensive load test suite, but given the experience on Election Day, this should be reviewed with EC to include additional scenarios and confirm it aligns with the usage patterns and outcomes expected by the business.
2. Run load testing over a longer time period to help identify system components that may degrade under extended peak usage.
3. End-to-end review of resource usage and apply tuning adjustments if needed.
4. Move scheduled tasks to run against the secondary database server so that they do not apply additional load at peak times. Note that Catalyst does not anticipate the [REDACTED] task will adversely affect performance for the by-election.
5. Infrastructure review of system architecture to take advantage of cloud native capabilities, such as parallel processing and auto-scaling of the hosting environment.
6. Review eRoll methods to identify if there is static data that may be cached and reduce database load at peak times.

Item #: 23.17-02
Item: IT incidents during GE23
To: Electoral Commission
For: Board meeting 6 December 2023
Prepared by: Paul [REDACTED], Chief Information Officer

Recommendations

It is recommended that the Board:

1. **note** the findings of the reports relating to eRoll and [REDACTED] drafted in collaboration with the Catalyst team
2. **note** these reports have been presented to and noted by the Chief Electoral Officer and Deputy Chief Executive Enterprise Services
3. **note** the Commission's approach and plan to addressing the underlying focus areas and improvements in our investment decisions and delivery.

Purpose

1. This document provides a Board level summary of the key lessons learned from investigations into major IT outages in the week prior to, and on the day of, the General Election 2023.

Background

2. This document summarises key areas of focus in terms of IT capability maturity for the Board's information. These areas will form the basis of the revised target operating model for IT to be delivered in 2024, after the appointment of the new, permanent Chief Information Officer (incoming CIO).
3. These reports do not include the independent, external assurance review requested by the Chief Electoral Officer. This will be conducted as a separate, independent piece of assurance in 2024.

Discussion

4. There were several lessons learned from both the [REDACTED] and eRoll Incidents, summarised below:
 - a) **Application Design** – While changes made to the eRoll application worked well functionally, they did not work effectively from a performance perspective. The incoming CIO will review the current software development lifecycle to ensure appropriate checks and controls are in place to capture all functional and non-functional requirements by 30 June 2024.
 - b) **Load Testing** – While load testing was completed in July 2023 for the General Election on review these tests were conducted in environments and conditions that were not entirely representative of the operating environment on Election Day. While this is complex to replicate, using specialist resource and tools to aid the testing would have significantly reduced the risk of the eRoll event occurring. By 30 June 2024 the incoming CIO will review how load testing of key business applications is delivered in future, including the use of external third-party specialist providers.
 - c) **Monitoring** – The Commission's time to react could have been significantly improved with effective monitoring and proactive identification of issues. This is difficult with limited visibility of what monitoring is being undertaken by our third-party service providers, like Catalyst. The

incoming CIO will undertake a review of the monitoring in place and produce a plan to address the findings by 30 June 2024.

- d) **Incident management** – The major IT incident management process introduced by Catalyst and EC in late August did not have sufficient time to embed in both organisations and was not followed as intended by either the Commission or Catalyst, and instead was heavily reliant on senior managers. The current CIO has re-communicated the process to the IT team and will continue to work to embed in 2024.
5. The lessons above point to specific areas related to the incidents but are also symptomatic of some of the key capability gaps or low levels of maturity within the Commission. These include better investment decisions including better business cases and connected decision making. Using Treasury’s Better Business Cases approach the five case models outlined below can be ascertained along with ensuring any investment meets our strategic intentions, case for change and successful delivery of projects:
- a compelling case for change – the ‘strategic case’.
 - optimises value-for-money – the ‘economic case’.
 - commercially viable – the ‘commercial case’.
 - financially affordable – the ‘financial case’.
 - achievable – the ‘management case’.

Next steps

6. The DCE Enterprise Services and the incoming CIO will work to address the short-term action plan as outlined in para 4 above.
7. The DCE Enterprise services along with the incoming CIO will review the IT operating model and recommend a future state IT operating model for implementation during 2024.
8. The DCE Enterprise Services will work with ELT and SLG to improve our investment process and decisions as we prioritise our work for GE26.

Appendices

- A. eRoll Incident 141023 report Final – dated 17 November 2023
- B. [REDACTED] Incident 111023 report Final – dated 20 November 2023

Item #: 23.17-02 Appendix A
Item: eRoll Incident 14/10/23 - Report
To: Electoral Commission
For: Board meeting 6 December 2023
Prepared by: Paul [REDACTED], Chief Information Officer

Recommendations

It is recommended that the Board:

1. **note** the findings of the report drafted in collaboration with Catalyst Executive and Senior Management
2. **note** the recommendations produced from the Post Incident Review process
3. **endorse** management's approach to addressing the underlying areas for improvement to prevent such an issue arising in future.

Purpose

1. This document seeks to clarify for the Commission's Executive Leadership Team and Board members the events that occurred on the day of the General Election 2023 in relation to the performance of the eRoll application.

Background

2. This document also sets out the lessons learned and associated recommendations from the Post Incident Reviews conducted internally within Catalyst, with the Commission and then jointly in collaboration with each other.
3. This report precedes but does not preclude the independent, external assurance review requested by the Chief Electoral Officer. This will be conducted as a separate, independent piece of assurance.

Discussion

4. On Saturday 14 October 2023, at approximately 10:15 voting place staff across the country began to raise concerns accessing and using the eRoll application. Voting Services management notified IT senior management on site at the National Office, and investigations by technical staff began and a major IT incident 'bridge' was opened at 10:35 to commence dialogue with the various technical support staff and Catalyst, our service delivery partner for the eRoll application.
5. At approximately 11:00, having validated the issues reported were the cause of unexpected systems performance issues, Catalyst support engineers began to diagnose the potential root cause as an overload of connections on the application, essentially severely degrading performance of the application and user experience.
6. Between 11:20 and 11:35 two changes recommended by Catalyst to increase capacity, were implemented. Firstly [REDACTED] were increased; this had minimal impact and we were able to observe this had not achieved the desired effect quite quickly. Secondly, an increase [REDACTED] was implemented, but unfortunately this again did not resolve the poor performance of the application.
7. At approximately 12:30 after further investigation, Catalyst suggested the root cause may be a specific piece of code within the application that queried the database at each login. Following review and approval by IT senior management a recommended change to this code was made.

Initial results were promising, and a successful test of the Wellington electorate appeared to have suggested the fix had indeed been successful. However, once full load was introduced on the system at 13:00, performance issues returned.

8. Catalyst support engineers proposed bypassing this code section completely and after review and approval by IT senior management the change was made around 13:35. This time the testing with Wellington proved successful and then full load was re-introduced across the country and the eRoll application returned to performing as it had during the Advanced Voting period, during the preceding two weeks.
9. Increased monitoring and vigilance remained in place through the day, and at about 17:10 a small number of errors, like those experienced earlier in the day were observed, however end-user impact was negligible, due to the drop in connections at this time. On investigation it appeared the root cause this time was a regular monitoring routine that was causing database contention. The performance of the eRoll application returned to optimal levels at 17:40, which coincided with the monitoring routine completing. No further issues were observed or experienced.
10. Following the events of 14 October, several meetings and workshops have taken place between the Electoral Commission and Catalyst to better understand the events of the day, to ensure lessons are learned and to ensure that the risk of any future failure especially for the upcoming by-election in Port Waikato.

Lessons learned and recommendations

11. In terms of lessons learned, the approach has been taken to understand the answers to three key questions and to structure the response to those questions by way of explaining the root cause and proposed recommendations associated with each of the areas identified.

12. **How could we have avoided this situation on Election Day?**

- **Application Design** – In 2020 the eRoll application was used as a tool to look-up entries on the Master roll. The code base used in the GE2023 was changed in 2021 to include additional functionality including to perform roll update functions. Whilst functionally this has proven to work effectively, from a performance perspective it is believed this wasn't completely understood, especially in terms of the likely field use cases that may come into play.

It is recommended that the current practices associated with software development are reviewed with Catalyst to ensure appropriate checks and controls are in place to capture all requirements appropriately.

- **Load Testing** – Comprehensive Load testing was completed in July 2023 with the new eRoll code base and whilst [REDACTED] scenarios were tested successfully, this was conducted over a short period of time (6 minutes) and the results extrapolated over an hour. On further review these tests were conducted in an environment that was not representative of the production environment. With the complex end-to-end solution which involves leveraging mobile devices in the field, sometimes with poor connection, full emulation of the election day environment would be complex and costly to replicate. The volumetric assumptions used on GE2023 were based on GE 2020 however the reality in GE2023 was a significantly higher volume of enrolment activities on polling day and [REDACTED] + transactions per hour over [REDACTED] concurrent connections proved too much for the application. In conclusion and with hindsight it is clear this testing did not fully stress the application over high volumes of concurrent device connections as experienced on election day.

I recommend that for future load testing, clear requirements and associated assumptions based on the context at the time documented and agreed. All load/stress testing should be as close to the Production environment as is feasible and conducted by an external 3rd Party to provide additional validation and assurance.

13. Could we have responded better on Election Day?

- **Monitoring** – With the hindsight of looking through operational logs from the ██████ Security Monitoring tool show that 502 (Slow Performance) errors began at 9:59 but it took until 10:15 for the issues to be escalated. Subsequent discussions have clarified to a point what monitoring is in place across the EC system.

In order to provide assurance that all appropriate controls are in place I recommend that a fuller review of the monitoring in place and a plan produced to address any gaps identified.

- **Incident management** – Whilst a major IT incident management process between Catalyst and EC was developed in late August, due to the high turnover of key staff leading up to the election, it had not been effectively implemented and leading up to and including election day was heavily reliant on senior managers driving the process and interaction, which was less than optimal. Once the Incident Bridge had been established on Election Day effective communication and decision making was established, however initial Service Recovery actions could have been more timely had these processes been followed. Effective implementation of the new Incident processes and embedding them within both teams would be mutually beneficial.

I recommend that the IT Major Incident Management process and procedure developed in August are implemented effectively within the Commission and Catalyst and other third-party service providers.

14. How do we ensure these issues do not reoccur?

- **Root Cause** – Following the Post Implementation Review and the detailed technical review conducted between the Commission and Catalyst, we now have a much better understanding of the technical issues and are confident we have identified the root cause, which essentially relates to two factors; an ██████ query' and a ██████ routine' that analyses traffic to public facing apps'. Now we have this clarity it provides both the Commission and Catalyst the ability to state with confidence how these issues can be avoided in future.
- **Problem Repetition avoidance Actions** – Now we understand the technical issues that ultimately caused the performance errors on the day and the testing that was conducted to provide assurance going into the General Election it is important that we act in a timely manner to address the findings and action the recommendations highlighted in this document to ensure similar problems are not experienced in future.

I recommend that the progress is tracked as part of a regular update by the Chief Information Officer to the Executive Leadership Team (ELT).

Conclusion

15. The degradation in the eRoll application performance on Election Day was ultimately avoidable, with clearer and more accurate requirements and thorough load testing that was more representative of the environment and context on the day.
16. Both the Commission's IT team and Catalyst worked very well together to diagnose the problem when it occurred and to deliver service recovery actions once the incident bridge and process was up and running.
17. There are clearly several lessons to be learned from this event and it is important these are addressed as quickly as possible to ensure this situation is not repeated in future.

Next steps

18. Management to work in collaboration with Catalyst to define and schedule the activity recommended in this paper.
19. Produce and publish a plan of action to track and report progress up the ELT.

Item: [REDACTED] **Incident 11/10/23 - Report**

To: Karl [REDACTED] (Chief Electoral Officer), Lucy [REDACTED] (Deputy Chief Executive - Enterprise Services)

Prepared by: Paul [REDACTED] (Chief Information Officer)

Recommendations

It is recommended that the Chief Electoral Officer and DCE – Enterprise Services:

1. **note** the findings of the report drafted, and the lessons learned, actions taken and recommendations produced from the Post Incident Review process
2. **endorse** Managements approach to addressing the underlying areas for improvement to prevent such an issue arising in future.

Purpose

1. This document summarises the events that occurred on 11 October 2023, when parts of the Commission were unable to access key systems due to an IT issue. It also sets out the learnings, actions taken and associated recommendations from the Post Incident Reviews conducted internally within Catalyst and [REDACTED], then with the Commission.

Background

2. On Wednesday, 11 October 2023, at approximately 7:45am, Catalyst cloud operations support staff began noticing network connectivity issues and established an internal incident management process led by the Catalyst Chief Information Officer (CIO).
3. It was established that the issues stemmed from upstream problems with [REDACTED]'s main Auckland 'Point of Presence' (POP) connection.
4. The Electoral Commission CIO contacted the Catalyst Operations Manager to notify him that the Commission was experiencing issues with connectivity to its applications ([REDACTED], [REDACTED] and [REDACTED]) hosted on the Catalyst Cloud.
5. Subsequently, Catalyst Cloud sent a notification at 9:04am to all affected clients to confirm that transient packet loss was being experienced due to an issue with an upstream provider [REDACTED].
6. [REDACTED] engineers confirmed to Catalyst that they had discovered the root cause related to post maintenance related tasks and that the connectivity would soon be stabilised.
7. Catalyst confirmed to the Commission at 10:22am that the network had stabilised at around 10:15am.

Discussion

Lessons learned and recommendations

8. [REDACTED] – Catalyst has used [REDACTED] since 2020 to mitigate against Direct Denial of Service (DDoS) attack in a climate when many major organisations in New Zealand were being targeted. [REDACTED] was selected because of the breadth of their network services, international coverage, and resilient and redundant architecture. The [REDACTED] services have never failed in the three years Catalyst has used their services.

9. The outage was caused by the [REDACTED] Auckland POP not re-establishing effective operation following planned service maintenance. This was caused primarily because of a [REDACTED] engineer re-enabling operational services from Auckland before maintenance tasks had been completed. [REDACTED] have advised that they have made a procedural change to prevent this from happening again in the future.
10. **Service Maintenance Notification** – Catalyst were not subscribed to [REDACTED]’s notification service at the time of the incident, so failed to realise the maintenance was planned and subsequently failed to notify the Commission as per normal practice. Had this been notified, the Commission would have challenged the timing of the maintenance given the Election period change freeze. At a minimum appropriate checks and enhanced monitoring and awareness would have been in place.
11. Catalyst has now subsequently subscribed to maintenance notifications and will review the [REDACTED] service maintenance calendar daily to ensure nothing goes unnoticed in future.
12. **Issue Notification to the Commission** – Catalyst followed their own incident management process by performing the issue Identification process first. The notification step happens next. This initial Identification process requires investigation of the issue, its impact and likely clients that may be affected. According to the incident management process, once this is established, notifications to clients and client account managers is then made via emails, messaging, or text.
13. Catalyst has accepted that notification for incidents to the Commission needs to be much quicker, especially if they may be impacted by an incident before the initial Identification phase is fully completed. Future communication will now be via a phone call by the Incident Manager or Operations Manager to the Catalyst EC Account Manager or Catalyst EC Programme Manager, who will then inform the Commission via a phone call. Catalyst and the Commission will also work together to ensure that the recently developed Incident Management processes are implemented and embedded within both organisations.

Conclusion

14. The connectivity failure was due mainly to [REDACTED] operator error, proceeding prematurely with actions before they were due. We are informed that this has been dealt with by [REDACTED] and assured this cannot be repeated in future.
15. Communications before the change and at the start of the incident can be improved. Catalyst has addressed their awareness of change events within [REDACTED] already and will work with the Commission to address the Incident Management process engagement and communication going forward.

Next steps

16. Management to work in collaboration with Catalyst to re-implement the Incident Management process and ensure communications are effective.

23.17-02 - IT incidents during GE23.pdf

Hi Ian - please see attached Board papers that went to the 6 December meeting.

The draft minutes from 6 Dec quoted below will be approved at the 13 February 2024 Board meeting but have been reviewed and amended so can be treated as near-final.

Ethan

===

IT incidents during GE23

Lucy [REDACTED] & Paul [REDACTED] joined the meeting for the following two items

The Board:

1. **noted** the findings of the reports relating to eRoll and [REDACTED], drafted in collaboration with the Catalyst team
2. **noted** that these reports have been presented to and noted by the Chief Electoral Officer and DCE Enterprise Services
3. **noted** the Commission's approach and plan to address the underlying focus areas and improvements in our investment decisions and delivery

Lucy [REDACTED] and Paul [REDACTED] outlined two reports into IT matters that arose during the election campaign: the temporary eRoll application failure on Election Day and the 11 October incident in which parts of the Commission were unable to access key systems ([REDACTED], [REDACTED] and [REDACTED]) for several hours due to a problem with IT service provider [REDACTED]. The reports conclude that:

- The eRoll problem on election day could have been avoided with clearer and more accurate system requirements, and more thorough and representative load testing. Ideally such testing should be conducted by a different organisation with specialist testing expertise. The Acting CIO has been engaging with Catalyst to produce a well-coordinated and accurate report building on Catalyst's initial reporting.
- The [REDACTED] issue was largely due to [REDACTED] operator error, and the company 'assured [us] this cannot be repeated in future'. Communication and incident management processes will be improved.

The Board discussed the independent external assurance review requested by the CEO on system testing, and whether the Commission has the right expertise in-house or requires external assistance. The Commission's business owners could be better connected to IT systems and decision-making, taking a more proactive stance on quality assurance processes. The Digital Governance Group was a potential vehicle for building a stronger focus on such incident management safeguards, but it is more appropriate for ELT and the Programme office to play a stronger role in digital governance in the upcoming electoral cycle and beyond.

The Commission's systems architecture is relatively complex, and has grown organically since the organisation was formed. IT is establishing the current state of all Commission systems to improve reporting to ELT and the Board. This information will inform the future direction of IT systems development.

Some expertise may be brought in-house over that period, based on the findings of the Commission's planning for how it configures its mix of in-house and third-party suppliers.

The Board discussed whether a separate, external review or advice on testing processes would be useful. The Commission made public statements that this would be examined as part of the GE23 review. A mix of external advice and growing internal capability will be prioritised. A decision will be made based upon Enterprise Services providing an update on the IT operating model, including proposed next steps for IT capability growth, including whether both in-house and external testing approaches are needed.

Importance: High

Hi Ethan,

Could I please have the exact copies that the Board received please – it is for OIA 84 regarding eRoll.
There should be PDF copies and any attachments included?
If I could have a copy of the Board minutes recording any decisions for just this item that'd be much appreciated too.

Thanks and regards,

Ian.

Hi Katrina,

Apologies for not being in touch this week, it has been another rollercoaster as I'm sure you'd understand.

You will also probably have heard that Karl has taken a decision on balance of risk and benefit to EC, not to run with eRoll for the upcoming By Election. This doesn't however mean we take our eye off the ball with completion of the load testing and field testing which should be done by mid next week. We will also continue to focus on completing this part of the review, before working with our assurance team on the TOR for the external assurance.

I am hoping to finish the aligned PIR as agreed by close today and will aim to set up a meeting to run through with you on Monday 13/11 assuming you have some availability. I am currently free 12-1, 2-3 or after 5. Hopefully sometime there works for you. Let me know and I'll book something in.

Regards
Paul

Item #:

Item: eRoll Incident 14/10/23 - Report

To: Electoral Commission

For: Board meeting XX XXX 2023

Prepared by: Paul [REDACTED], Chief Information Officer

Recommendations

It is recommended that the Board:

1. **note** the findings of the report drafted in collaboration with Catalyst Executive and Senior Management.
2. **note** the recommendations produced from the Post Incident Review process.
3. **endorse** Managements approach to addressing the underlying areas for improvement to prevent such an issue arising in future.

Purpose

1. This document seeks to clarify for the Commissions Executive Leadership Team and Board members the events that occurred on the day of the General Election 2023 in relation to the performance of the eRoll Application. It also sets out the learnings and associated recommendations from the Post Incident Reviews conducted internally within Catalyst, with the Commission and then jointly in collaboration with each other.
2. This report precedes but does not preclude the independent, external assurance review requested by the Chief Electoral Officer. This will be conducted as a separate, independent piece of assurance.

Background

3. On Saturday, 14th October 2023, at approximately 10:15 Voting place staff across the country began to raise concerns accessing and using the eRoll application. Voting Services management notified IT senior management on site at the National Office, and investigations by technical staff began and a Major IT incident bridge was opened at 10:35 to commence dialogue with the various technical support staff and Catalyst our Service Delivery Partner for the eRoll application.
4. At approximately 11:00, having validated the issues reported were the cause of unexpected systems performance issues, Catalyst support engineers began to diagnose the potential root cause as an overload of connections on the application, essentially severely degrading performance of the application and user experience.
5. Between 11:20 and 11:35 two changes recommended by Catalyst to increase capacity, were implemented. Firstly "[REDACTED]" were increased, this had minimal impact and we were able to observe this had not achieved the desired effect quite quickly. Secondly an increase "[REDACTED]" was implemented, unfortunately this again did not resolve the poor performance of the application,

6. At approximately 12:30 after further investigation, Catalyst suggested the root cause may be a specific piece of code within the application that queried the database at each login. Following review and approval by IT senior management a recommended change to this code was made. Initial results were promising, and a successful test of the [REDACTED] electorate appeared to have suggested the fix had indeed been successful. However, once full load was introduced on the system at 13:00, performance issues returned.
7. Catalyst support engineers propose bypassing this code section completely and after review and approval by IT senior management the change was made around 13:35. This time the testing with [REDACTED] proved successful and then full load was re-introduced across the country and the eRoll application, returned to performing as it had during the Advanced Voting period, during the preceding 2 weeks.
8. Increased monitoring and vigilance remained in place through the day, and at about 17:10 a small number of errors, like those experienced earlier in the day were observed, however end-user impact was negligible, due to the drop in connections at this time. On investigation it appeared the root cause this time was a regular monitoring routine that was causing database contention. The performance of the eRoll application returned to optimal levels at 1740, which coincided with the monitoring routine completing. No further issues were observed or experienced.
9. Following the events of 14th October, several meetings and workshops have taken place between the Electoral Commission and Catalyst to better understand the events of the day, to ensure lessons are learned and to ensure that the risk of any future failure especially for the upcoming By Election, in Port Waikato.

Lessons Learned and Recommendations

In terms of lessons learned, the approach has been taken to understand the answers to 3 key questions and to structure the response to those questions by way of explaining the root cause and proposed recommendations associated with each of the areas identified.

10. How could we have avoided this situation on Election Day?

- **Application Design** – In 2020 the eRoll application was used as a tool to look-up entries on the Master roll. The code base used in the GE2023 was changed in 2021 to include additional functionality including to perform roll update functions. Whilst functionally this has proven to work effectively, from a performance perspective it is believed this wasn't completely understood, especially in terms of the likely field use cases that may come into play.

It is recommended that the current practices associated with software development are reviewed with Catalyst to ensure appropriate checks and controls are in place to capture all requirements appropriately.

- **Load Testing** – Comprehensive Load testing was completed in July 2023 with the new eRoll code base and whilst 1,000 scenarios were tested successfully, this was conducted over a short period of time (6 minutes) and the results extrapolated over an hour. On further review these tests were conducted in an environment that was not representative of the production environment. With the complex end-to-end solution which involves leveraging mobile

devices in the field, sometimes with poor connection, full emulation of the election day environment would be complex and costly to replicate. The volumetric assumptions used on GE2023 were based on GE 2020 however the reality in GE2023 was a significantly higher volume of enrolment activities on polling day and [REDACTED] per hour over [REDACTED] connections proved too much for the application. In conclusion and with hindsight it is clear this testing did not fully stress the application over high volumes of concurrent device connections as experienced on election day.

I recommend that for future load testing, clear requirements and associated assumptions based on the context at the time documented and agreed. All load/stress testing should be as close to the Production environment as is feasible and conducted by an external 3rd Party to provide additional validation and assurance.

11. Could we have responded better on Election Day?

- **Monitoring** – With the hindsight of looking through operational logs from the [REDACTED] Security Monitoring tool show that 502 (Slow Performance) errors began at 9.59 but it took until 10:15am for the issues to be escalated. Subsequent discussions have clarified to a point what monitoring is in place across the EC system.

In order to provide assurance that all appropriate controls are in place I recommend that a fuller review of the monitoring in place and a plan produced to address any gaps identified.

- **Incident management** – Whilst a major IT incident management process between Catalyst and EC was developed in late August, due to the high turnover of key staff leading up to the election, it had not been effectively implemented and leading up to and including election day was heavily reliant on senior managers driving the process and interaction, which was less than optimal. Once the Incident Bridge had been established on Election Day effective communication and decision making was established, however initial Service Recovery actions could have been more timely had these processes been followed. Effective implementation of the new Incident processes and embedding them within both teams would be mutually beneficial.

I recommend that the IT Major Incident Management process and procedure developed in August are implemented effectively within the Commission and Catalyst and other third-party service providers.

12. How do we ensure these issues do not reoccur?

- **Root Cause** – Following the Post Implementation Review and the detailed technical review conducted between the Commission and Catalyst, we now have a much better understanding of the technical issues and are confident we have identified the root cause, which essentially relates to two factors; an

‘at login database query’ and a ‘scheduled maintenance routine’ that analyses traffic to public facing apps’. Now we have this clarity it provides both the Commission and Catalyst the ability to state with confidence how these issues can be avoided in future.

- **Problem Repetition avoidance Actions** – Now we understand the technical issues that ultimately caused the performance errors on the day and the testing that was conducted to provide assurance going into the General Election it is important that we act in a timely manner to address the findings and action the recommendations highlighted in this document to ensure similar problems are not experienced in future.

I recommend that the progress is tracked as part of a regular update by the Chief Information Officer to the Executive Leadership Team (ELT).

Conclusion

13. The degradation in the eRoll application performance on Election Day, was ultimately avoidable, with clearer and more accurate requirements and thorough Load Testing that was more representative of the environment and context on the day.
14. Both the Commissions IT team and Catalyst worked very well together to diagnose the problem when it occurred and to deliver Service Recovery actions once the Incident Bridge and process was up and running.
15. There are clearly several lessons to be learned from this event and it is important these are addressed as quickly as possible to ensure this situation is not repeated in future.

Next steps

16. Management to work in collaboration with Catalyst to define and schedule the activity recommended in this paper.
17. Produce and publish a plan of action to track and report progress up the ELT.

Appendices

- A. Catalyst Incident Report – dated 19th October 2023
- B. Minutes of the eRoll technical discussion – dated 31st October 2023.
- C. Testing overview for GE2023 - dated 31st July 2023.
- D. Public Applications Load test document – dated September 2023.

Morena,

It was good to meet you over the airwaves yesterday and I am looking forward to working with you to bring the focus agreed.

It would be good to have a quick catch up over Teams today or Monday, just so we can agree our approach and what we need to do to complete our agreed actions.

My diary is packed today, but I could do half hour between 12 and 1pm, alternatively Monday I am available before 0915, 1030-1100, 12-1pm 2:30-3pm or after 4pm.

Let me know what works for you.

Ngā mihi
Paul

Subject: eRoll technical - initial session
Start: Tuesday, 31 October 2023 11:00:00 am
End: Tuesday, 31 October 2023 12:30:00 pm
Location: [REDACTED] Meeting
Attachments: [20231014 - eRoll Incident Report final.pdf](#)

Hi everyone,

As part of preparation for the by-election Godfrey and Paul have jointly tasked us to have a technical session so that we can give the CEO confidence about the performance of eRoll solution in the by-election

Could we please meet to go through the following items:

PIR discussion

- 1 Any questions on the diagnosis on page 4 of the attached PIR
- 2 Performance issues 10:15am to 15:36:

Walk through each of the four changes made intended to fix system performance, to understand more about what each change was and any side-effects (such as [REDACTED] – would this cause [REDACTED] issues for example):

- * [REDACTED]
- * [REDACTED]
- * the first code change
- * the second code change

- 3 The cause of the performance degradation at 17:10 to 17:40 – what was this exactly and how confident are we in the posited issue

- [REDACTED]
- 5 Any other points that people want to cover

By-election preparation

- 1 Is our recommendation to keep with the changes made for the by-election
- 2 Can we load test and if so, how and when should we do so
- 3 What monitoring should we put in place during advance voting and election day itself
- 4 Any other actions we should taking in the group's opinion
- 5 Confidence rating from the group that eRoll will be performant in the by-election

Other

- 1 Are there any consequences from an [REDACTED] perspective that we need to take into account
- 2 I'll take minutes to send around later same day to check for understanding and make sure we've got everything captured

[REDACTED]

[REDACTED]

[REDACTED]

Location	Microsoft Teams Meeting
Time	11am to 12pm.
Chair	Ian [REDACTED] (Senior Manager IT Services EC)
Present	Adam [REDACTED] (Senior Architect EC) Andrew [REDACTED] [REDACTED] Lead Catalyst) Brian [REDACTED] (Security Analyst Catalyst) Godfrey [REDACTED] (Relationship Manager Catalyst) Gregorio [REDACTED] (Security Manager Catalyst) James [REDACTED] (Programme Manager Catalyst) Jason [REDACTED] (Solutions Architect EC) Jeff [REDACTED] (Senior Systems Specialist EC) Morgan [REDACTED] (Analyst EC) Shannon [REDACTED] (Operations Manager)

Introduction

Ian introduced the purpose of the meeting as being to work through any technical questions with the eRoll PIR and being able to give the Chief Electoral Officer confidence about the performance of the eRoll solution in the upcoming by-election.

An agenda had previously been sent through as part of the invitation together with a copy of the eRoll PIR produced by Catalyst.

General Election

1. Any questions on the diagnosis on page 4 of the attached PIR

There were no initial questions on the diagnosis provided.

2. Performance issues 10:15 to 15:36

Walk through each of the four changes made intended to fix system performance, to understand more about what each change was and any side-effects (such as no longer recording what IPs were accessing eRoll – would this cause any security issues for example):

- doubling [REDACTED] connections
- doubling [REDACTED] connections
- the first code change
- the second code change.

Andrew provided a summary of the changes noting the following points:

Doubling the [REDACTED] connections was a first logical step to increase capacity and reduce potential bottlenecks at the [REDACTED] webserver while minimising the change in the operating environment.

Likewise the second change to double the number of [REDACTED] connections was the next logical step to increase capacity in the web server running the backend application and server code.

Andrew's detailed review of [REDACTED] database logs identified a large set of SQL queries taking a long time to complete as a probable cause of slowness. These queries were being made by the connection API which updated a specific row/table database combination with the IP of the system user account each time causing database contention and slowness of response. The code was not required for successful operation and the system user account is only used internally for connecting application and database.

This flaw had been present since GE2020 but the combination of number of concurrent users together with the increases in functionality for the application meant that the SQL queries having resource contention was significantly higher than encountered during GE2020, advance voting for GE2023 or load testing for GE2023.

Shannon noted an additional point that the eRoll system was successfully processing [REDACTED] transactions per hour on election day before volumes rose above that – in comparison advance voting peak was approximately [REDACTED] transactions successful per hour

Andrew noted that the first code change was a change to the update to amend the IP address being stored to 127.0.0.1. When this had little effect the code change was made to remove that particular SQL query code from the connection API completely thereby reducing the database resource contention.

Andrew confirmed that there are other tables which store the unique IP of the endpoint accessing eRoll which were unaffected by the change and therefore a log of events maintained. Andrew also confirmed that if a single IP address had been presented for end-devices that this would have made no difference as evidenced by the first code change of storing 127.0.0.1.

3. The cause of the performance degradation at 17:10 to 17:40 – what was this exactly and how confident are we in the posited issue

Shannon confirmed that this was caused by placing additional load on the Mike database from a regular operational report that checks for IP abuse. Ian confirmed that this had little to no impact on the end user experience in the field.

A change was made to the frequency of the report to run every three hours rather than one hour.

4. Walk through the analysis produced by Catalyst security team who reviewed logs to establish there had been no outside interference on the Mike or eRoll systems on election day

Gregorio confirmed that the Catalyst security team had analysed the end-point IP records that were experiencing performance issues and that these were as expected with no malicious or outside of New Zealand IPs found.

5. Any other points that people want to cover

Shannon confirmed that a separate question regarding failed Mike 502 statuses at 09:59 were unrelated – with two failures at 09:59 in contrast to 2835 successful requests in the same one minute interval.

By-election preparation

6. Is our recommendation to keep with the changes made for the by-election.

The group agreed a recommendation that the changes made should be replicated for the by-election noting that there would be a [REDACTED] release that would incorporate all four changes listed in agenda item 2 and the reporting frequency change in agenda item 3.

This was felt to be lowest risk given that the eRoll solution with changes had been proven in the afternoon of the general election day with the by-election being a fraction of the volumes by comparison.

7. Can we load test and if so, how and when should we do so.

Godfrey led the discussion about load testing for the by-election. The group noted that this was possible but would involve additional work would be required from a requirements, design and implementation perspective that would provide no benefit given that the performance load of the eRoll solution during the by-election was so much smaller than the recent election day and there were no functional changes to the application being made ahead of the by-election.

There was general agreement however that there should be a separate work request raised to specify ongoing and regular load tests for Andrew to carry out in the [REDACTED] environment as eRoll function could be expected to evolve and potentially extend before GE2026. This should include collaboration around requirements and simulation of election day including multiple applications accessing Mike at the same time.

Jeff also noted that the eRoll application had run successfully for two previous by-elections in 2022 without performance issues.

8. What monitoring should we put in place during advance voting and election day itself.

Shannon confirmed that Catalyst was investigating upgrades to their monitoring capability as part of their ongoing approach to operational improvement but these wouldn't be in place for the by-election.

Godfrey confirmed that the existing Catalyst monitoring meant that network performance issues were identified before 10am on election day and the same would be true in the case of any performance issues during another electoral event.

9. Any other actions we should taking in the group's opinion.

Andrew will raise a work request to review the SQL queries of the Mike suspicious session and IP data program being run as part of the report referenced in item 3 of the agenda. It may be possible to optimise this further.

10. Confidence rating from the group that eRoll will be performant in the by-election.

The group across both EC and Catalyst were highly confident that eRoll would be performant in the by-election given the following factors:

- once the necessary fixes had been made on election day the eRoll system was performant with GE2023 volumes
- volumes (and therefore load on the system) were a fraction of GE2023.

Other

11. Are there any consequences from an [REDACTED] app perspective that we need to consider.

None other than ensuring that the [REDACTED] application goes through the same scheduled release as the [REDACTED] release for the by-election.

Closing

Ian thanked the attendees for their time and noted that minutes would be sent to the group for review to check for accuracy before being finalised.

Hi Katrina,

Attached the notes from today's technical meeting as discussed. I haven't had chance to review, but thought I would forward on so as not to delay.

Safe travels tomorrow

Regards

Paul

Hi there

Thank you for the eRoll technical discussion today - could you please review these minutes for accuracy and let me know if you're happy as stated?

Godfrey / James, could I ask you please to coordinate any Catalyst feedback?

Thanks all – let me know if this causes you any issues, ideally I'd like to finalise tomorrow if possible but shout out if that's not possible.

Best regards

Ian.

Kia ora Lucy and Paul

I have asked Katrina [REDACTED] to lead our PIR process. Paul, Katrina is our COO and CEO when I was overseas in September and at times I am otherwise unavailable.

Work on this report has already begun.

Again, if you have any questions or need to contact me please don't hesitate to do so.

Ngā mihi
Don

1.1 Version

Version	Date	Change Reason	Author	Reviewed By
1.0	14/09/2023	Original Version	Andrew [REDACTED]	[REDACTED]
1.1	18/09/2023	Typos and minor edits	Andrew [REDACTED]	James [REDACTED]
1.2	14/11/2023	Additional test methodology added	Andrew [REDACTED]	[REDACTED]

2 Overview

The main goal of the load testing exercise was to provide a baseline of performance of functionality enhancements for the Public applications. A secondary objective was to find any quick wins that would provide increased throughput or response times.

The eRoll application has been recently extended to allow for limited updates to be sent back to [REDACTED] for processing. An additional address search feature has also been added. These new scenarios were incorporated in the eRoll load tests.

3 Summary

For the baseline load test run, the overall time taken to process all the scenarios was 29 minutes. A number of simple parameter changes were made to the [REDACTED] webserver configurations. The same set of scenarios were then run again and the overall time taken to process them. It was found that a single parameter change each to [REDACTED] webserver reduced the overall time to 21 minutes. This provided an increase in throughput of over 25%.

4 Test Environment

4.1 Test hosts

The secondary cluster in [REDACTED] was temporarily reconfigured to act as an independent environment for performing load testing against. This ensured that the load test results would match actual the production environment since the [REDACTED] and [REDACTED] clusters are identically configured.

Three load test runner hosts, in a [REDACTED] configuration, were used to execute the all the test scenarios against the load test environment. One test execution script was configured to use [REDACTED] for the [REDACTED] requests and a second test execution script was configured to use [REDACTED] for eRoll requests. Both these scripts were run on each load test runner host.

4.2 Test scripts

These are the same as used in previous Public Application Load Test exercises. Although the eRoll and [REDACTED] load test scripts were enhanced to incorporate new scenarios:

- eRoll scripts had a new Address search API call added
- eRoll scripts had a person update scenario added

All these load test scripts have the following features:

- The scenario creation script extracts random data from the test database and writes out a set of test scenarios using this data.
- The load test run script performs each test scenario in parallel using a configured number of workers on the load test runner host.
- The load test script uses the [REDACTED] library to drive the application interface.
- The output files containing data about each request of every scenario from every worker are analysed by both a statistics script to generate overall statistics and a script to generate statistical graphs.

4.3 Host Statistics

Each host has data collected from it to read various aspects of the state of the host. This data is visualised through a tool called [REDACTED]. These graphs show the following states: CPU %, Network Requests, Load, Memory, Processes.

Note that this data collection is performed as standard on all Production and UAT hosts as part of standard monitoring by Catalyst.

5 Test Scenarios

5.1 [REDACTED]

5.2 [REDACTED] application

5.3 eRoll application

The test scenarios for Enrol OnLine comprise of a user performing a selection of the following application API calls:

- Get the current set of Electorates with an election
- Perform a Lookup Address operation
- Perform a Person Search (variations include using wildcards, no midname)
- Perform some Address Completion calls
- Submit an Update to generate an MDA2 correspondence
- Perform a user Logout

The percentage of each of the above API calls between July 2022 and August 2023 was obtained from the database.

API route	%
[REDACTED]	11
[REDACTED]	2
[REDACTED]	40
[REDACTED]	43
[REDACTED]	1
[REDACTED]	3
<i>Total</i>	100

The Load test runs consist of 1,000 scenarios for each runner host, with the overall number of API calls for each route matching the above percentage.

5.4 Methodology

Load Test Scenarios

A load test run is in two parts. The first part prepares a mix of all [REDACTED] scenarios for executing against the pubweb server. The second part is the 1,000 eRoll scenarios prepared for executing against the eRoll web server. These are created for all three load test runner hosts. Overall there are 24,000 scenarios executed in each full test run.

Load Test Execution

On each runner host, the [REDACTED] scenarios were started running against the pubweb server. Then, after a few minutes, on each runner host, the 1,000 eRoll scenarios were started running against the eroll web server.

6 Results

The following sections presents details from two Load test runs. The first being the baseline run using existing production configuration settings. The second run evaluates a set of configuration changes made to the public web and application services.

A number of other configuration runs were performed. The data from those are not presented here, but they helped with the choice of configuration changes presented in the second load test run.

6.1 Baseline Run

The baseline run used the existing [redacted] configurations used in production.

The total overall time to execute all 24,000 scenarios, using the three load test runners was 29.5 minutes.

Request Statistics

All responses occur under 10 seconds and generally under [redacted], and under 3s for eRoll.

Step	requests	min	median	mean	95th	max	>10s	Error
eRoll - Address completion	3,227	0.18	1.98	2.20	2.86	9.31	0	0
eRoll - Electorates	2,837	0.21	1.98	2.11	2.52	9.27	0	0
eRoll - Enrol Update MDA2	623	0.70	2.71	2.89	3.75	9.96	0	0
eRoll - Logout	947	0.21	1.97	2.08	2.50	9.22	0	0
eRoll - Lookup Address	279	0.21	1.96	2.17	2.76	9.25	0	0
eRoll - Search	7,561	0.23	2.02	2.19	2.61	9.43	0	0
eRoll - Search - Mononym	277	0.26	2.04	2.24	2.63	9.21	0	0
eRoll - Search - No Midnames	7,486	0.24	2.01	2.17	2.58	9.29	0	0
eRoll - Search - Wild	7,354	0.23	2.03	2.18	2.60	9.33	0	0
eRoll - Search - Wild - No Midnames	7,322	0.25	2.02	2.17	2.58	9.35	0	0

CPU utilisation

The following graphs show the CPU utilisation on the pubweb, pubapp and db servers. The extra processing load of eRoll can be easily seen in these server graphs.

■ User : Min: 0.00 Max: 46.72 Current: 0.00

Public Webserver

6.2 Reconfiguration run

This run included the following configuration changes:

- doubled the number of [REDACTED] on the public web server
- Increased [REDACTED] on the public application server
- Increased [REDACTED] on the application server

The total overall time to execute all 24,000 scenarios, using the three load test runners was 21.5 minutes.

Request Statistics

Almost all responses occur under 10s [REDACTED] and generally under 4s for eRoll.

Step requests min median mean 95th max >10s Error

Step	requests	min	median	mean	95th	max	>10s	Error
eRoll - Address completion	3,276	0.20	2.52	2.85	8.30	9.35	0	0
eRoll - Electorates	2,967	0.25	2.50	2.74	3.62	9.33	0	30
eRoll - Enrol Update MDA2	631	0.80	3.35	3.84	9.53	10.23	3	0
eRoll - Logout	621	0.22	2.49	2.72	3.65	9.25	0	0
eRoll - Lookup Address	327	0.24	2.51	2.71	3.76	9.26	0	4
eRoll - Search	7,473	0.26	2.53	2.81	7.36	9.37	0	82
eRoll - Search - Mononym	249	0.32	2.56	2.84	6.64	9.44	0	3

Public Webserver

6.3 Comparison

The kernel density estimate graph shows time distribution of all the [redacted] response times. The following graphs show the results from the two load test runs.

The large peak shows the majority of the [redacted] related requests and the small peak shows the majority of eRoll related requests.

The Reconfiguration run shows the reduction in response times for the [redacted] related requests with a marginal increase for the eRoll released requests. This shows why the reconfiguration reduces the overall time for all the requests from 29.5 minutes to 21.5 minutes. This is an over 25% improvement in overall response times.

The tail of the density graph (magnified) shows the times of the very small number of longer running requests.

The Reconfiguration run shows just a marginal increase in maximum request time from 10.1 to 10.4 seconds.

6.4 Request performance

The two load test runs each executed a total of over 556,000 requests, of which eRoll contributed over 37,000 requests. The requests per hour are calculated below:

- Baseline (All) tests took 29.5 minutes > 1.1 million requests per hour
- Baseline (eRoll) tests took 6.5 minutes > 340,000 requests per hour
- Reconfiguration (All) tests took 21.5 minutes > 1.5 million requests per hour
- Reconfiguration (eRoll) tool 6.5 minutes > 340,000 requests per hour

There are two large contributors to the overall number of requests. ██████████ requests provide application usage data and the Address Completion and Email validation helper requests are a part of the interactive features of all the applications. Excluding these to leave the 'primary' application functionality, the total 'primary' requests per hour can be calculated.

There were a total of over 154,000 'primary' requests, of which eRoll contributed over 34,000. The 'primary' requests per hour are calculated below:

- Baseline (All) tests took 29.5 minutes > 310,000 requests per hour
- Baseline (eRoll) tests took 6.5 minutes > 310,000 requests per hour
- Reconfiguration (All) tests took 21.5 minutes > 430,000 requests per hour
- Reconfiguration (eRoll) tool 6.5 minutes > 310,000 requests per hour

7 Recommendations

An over 25% reduction in overall time has been shown to be achieved with a few simple configuration changes on the Public Web and Public Application servers. A [REDACTED] ticket was raised to implement these changes prior to the general election: [REDACTED] 98483. These were applied to production in the code migration on 6th September 2023, [REDACTED]
[REDACTED]

A quick investigation into some errors in the eRoll [REDACTED] logs from the Reconfiguration were due to SSL handshaking between the eRoll webserver and the [REDACTED]. There are some [REDACTED] options that may help reduce the SSL processing overhead incurred and minimise these types of errors. A [REDACTED] story has been raised to investigate these options: [REDACTED] 97755.

Kia ora Paul,

I've had feedback from the team, who are in agreement with your description of the event, commentary on the factors at play and recommendations.

There is one small correction in para 13 - "through" should be "thorough".

Thank you for giving us the opportunity to provide input into the report. If you have any further questions or concerns please contact me any time.

Kind regards
Katrina

Hi Paul,

Here are the additional items on my list.

1. IR adoption timeline:

The draft BC and IR plans I sent you this morning were sent to Ian in early June for review and signed off by James [REDACTED] on 25 August. The Security IR plan was sent under separate copy from our Security Manager. I haven't chased him up around when, but could if you think the information is useful.

2. Load testing method elaboration:

Andrew has updated the load test report - there are two copies attached, one with track changes on, so you have the information if you need it in future.

3. Effective communication wording:

Hi Paul,

I'm available between 10am & 1.30pm today. Would it be useful to bring Andrew in on the load testing conversation? If you think so, I'll check if he's free.

Kind regards
Katrina

On 16/11/23 08:28, Paul [REDACTED] wrote:

Hi Katrina,

Thanks for sending the IR documents through. I would appreciate the version control on these documents updated. I have been referenced in all 3 but did not join the Commission until 11/09/23, therefore a misalignment with James approving the documents and me being listed as the CIO? I will discuss with Godfrey at the account meeting today, a time to review these documents and ensure the processes are implemented going forwards. On reflection I will adjust my observations in the relevant section, in the next version.

On the Load Testing, I think this is worthy of a follow-up discussion, so if you have time today when I could call to discuss that would be great.

Thanks and regards
Paul

Subject: Election day

Hi Karl

Just a quick note to congratulate you and your team on running a successful election day and pre-election day processes. Watching the count and media coverage things have seemed to work well and a lot has been processed in the electorates successfully.

At our end the results entry, media feeds and public results all appear to have performed well.

There are a few tired bodies out there but our team, led by Godfrey, remains on call and standby if anything that crops up between now and Monday. I'm also available to take calls and questions.

We will begin a full PIR process for the e-Roll incident on Monday morning.

Cheers
Don

Hi Ian,

I can confirm that Shannon will be attending. He had to reschedule other stuff or ask for a change in time.

Jon was not the author of the report and James is in the midst of asking Gregorio or Brian to attend as they were the primary persons who performed the analysis for the security report. One of them will attend tomorrow's meeting.

I hope that is ok.

Cheers,
Godfrey

Subject: eRoll Incident Follow-up

Kia Ora Katrina,

Thanks for your time today to follow-up on the eRoll PIR and progress the follow-on actions.

In general, I believe we have good alignment on the key aspects of the event on election day and the key items we need to work through over the coming days/weeks to ensure we have a single coherent story on what occurred, how we could avoid such events in the future, specifically to ensure we have taken all practical, reasonable steps to ensure systems will work effectively during the upcoming Port Waikato By election.

In terms of immediate focus, we agreed the following points:

- **Monitoring** – [REDACTED] explained the EC perspective on available/accessible monitoring to give confidence we are tracking system performance effectively. [REDACTED] outlined previous intentions to introduce applications monitoring which would have been beneficial in this situation. **Action K [REDACTED] to provide WR No. to review and understand prioritisation.** *On review it was confirmed that the statement related to additional security monitoring that had been proposed previously. We agreed that it would be good to confirm what monitoring is in place around Health of Infrastructure and Applications performance so we all have the same understanding. Action K [REDACTED] to provide overview of current state monitoring.*
- **Incident Management** – It was acknowledged that once up and running the comms channels between EC and Catalyst worked well, especially decisioning on proposed changes etc. It was agreed that there is an opportunity to improve process and procedure on both sides and this is something we can work through specifically. **Action [REDACTED] to draft initial thoughts on IM and pass to K [REDACTED] for review and feedback within Catalyst.** *We discussed my version of events specifically the discrepancies identified in the timeline in an attempt to understand the delta*

and what was driving this. We agreed that I would combine the two views and highlight the areas of contention for Catalyst to review and refine to ensure alignment. **Action P to combine views and send to K**

- **Root Cause** – Whilst we are reasonably confident that “load” was the ultimate root cause of the issue experienced on election day, it is important that we dig into the known facts and associated changes from a technical perspective to ensure we have a common understanding and agreed position on whether the election day changes should remain in place going forwards, or what else we need to do to ensure we are set-up for success going forwards. ~~Action – (P – Ian to facilitate a meeting with Shannon and Co. from Catalyst to work through the technicalities and report back.~~ P reported that a very constructive technical meeting had taken place and that from an initial verbal update, P had received positive outcomes. Ian was writing up. **Action P to forward the meeting notes to Katrina for information.**
- **Load Testing** – We agreed that we need to repeat the Load testing on eRoll for the by election, but need to ensure we have clear requirements from EC. P also expressed a preference to do some field testing in Waikato, to ensure we test application performance and user experience on location at selected voting places. ~~Actions- P to confirm requirements and timeframes for field testing. K to confirm timeframe for Load testing prior to the start of advanced voting (13/11) for the upcoming by election.~~ *It seemed the recommendation from the technical meeting was not to repeat the tests as nothing extra was likely to be gained from running such tests. This needed to be confirmed. We did agree that the field testing if we could execute effectively would be a useful new test to conduct.* **Action: P to confirm outcome and next steps from the technical meeting, K to confirm availability of Catalyst tech staff to support potential field test next week.**

Let me know if you think I have missed anything, in the meantime I look forward to our next follow-up on Tuesday, at 4:30pm.

In section 2, the comment around advanced voting peak being [REDACTED] transactions per hour is something I'm not sure about. It was said on the call but it is the same number as the 2020 peak which makes me question if Shannon was answering the question he thought he was. Either way it was what was said so the minutes are accurate

Hi Ian,

Thank you Ian for the minutes. Feedback that I have is that the minutes are an accurate description of the meeting except for clarity on one point that I'll describe below.

Point 9. The review was for 'the SQL queries of the [REDACTED] suspicious session and IP data program' as opposed to 'the SQL queries', just to be specific. There is a WR for it:

[https://\[REDACTED\]=420765](https://[REDACTED]=420765)

Cheers,
Godfrey

On 31/10/23 16:24, Ian [REDACTED] wrote:

Hi there

Thank you for the eRoll technical discussion today - could you please review these minutes for accuracy and let me know if you're happy as stated?

Godfrey / James, could I ask you please to coordinate any Catalyst feedback?

Thanks all – let me know if this causes you any issues, ideally I'd like to finalise tomorrow if possible but shout out if that's not possible.

Best regards

Kia ora Lucy

Godfrey has replied to a similar question from Paul in some detail and we certainly understand your interest and concern.

The shorter answer is, we have had a PIR ready for a couple of days but without the PIR from [REDACTED] it is incomplete. Our CIO, Jason, has been in very regular contact with [REDACTED] and has been assured that this is "coming" and a priority. It's pretty frustrating and we are pushing hard on our side.

- Related to Story #98941: Investigate performance of the generate_*_details jobs added

#4 - 12/04/2023 11:51 AM - Jeff

I can't see a way to verify these changes will work on UAT. Any suggestions? Is there a way to simulate the volume of transactions we'd see in an election to check how long the jobs now take?

#5 - 12/06/2023 06:09 PM - Andrew

Hi Jeff,

Yes I can move a number of the session log records to be more recent so that those jobs will process more things.

Let me know when you are available to do the testing and we will update the records accordingly.

Mike Work - Story #97755

Implement eRoll SSL proxy reuse configuration on [REDACTED]

06/13/2023 05:09 PM - Andrew [REDACTED]

Status: Ready	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Story Progress:
WR #:	Size:
Reference:	

Description

The [REDACTED] proxy to https ideally requires verification and reuse parameters to be set. The following parameters will need to be set:

```
proxy_ssl_verify
proxy_ssl_trusted_certificate
proxy_ssl_certificate
proxy_ssl_certificate_key
proxy_ssl_session_reuse
```

History

#1 - 06/13/2023 05:28 PM - Andrew [REDACTED]

This will need some further investigation before being implemented as some initial testing on [REDACTED] does not work with:

[REDACTED]

Even though the pem file is what [REDACTED] uses in its ssl certificate settings on the backend server.

#2 - 12/06/2023 01:38 PM - Andrew [REDACTED]

Hi Andrew

Have spoken to Jason and Jeff - we have a baseline report from 2020 which we have referenced to obtain the following acceptance criteria
95% of response times under 5 seconds and 99% under 10 seconds
let me know if you have any other questions
Cheers, Cindy

2023-11-21 14:24

#14
9 days ago
by Andrew

Hi Cindy & Jason,

Can you confirm what the acceptability criteria are for the required load test requests per hour are.
I am expecting something like "At the given requests per hour, it will be acceptable to have 95% of response times under 10 seconds", for example.

2023-11-20 17:39

Thanks
Andrew

Please note that in the statistics summary for this load test, summary_95pc_10s.csv, the 50 'EOL - Pre submit' errors are due to an issue with the test data only.
It is reporting that no contact number is being supplied, mobile or other.
I will fix that for any future load test run.

2023-11-20 10:14

#11
12 days ago
by Andrew

Please let me know if you would like any further load test runs.
Otherwise, I will start writing the load test report for this run on Monday.

2023-11-17 17:17

See attached statistics summary for this load test: summary_95pc_10s.csv

Thanks
Andrew

#10
12 days ago
by Andrew

Hi,

I have run now our Load testing tool configured to emulate the desired request rates.
Note that I am not making any special distinctions for any requests.
For example, the load test treats the following requests like any other:
1. background requests used for storing ██████████

2023-11-17 17:11

2. address street matching requests, where the user is incrementally adding 1 character at a time, resulting a more refined address result

These are the eRoll stats from this load test run, from 14:25 to 15:28.

As you can see the total number of eRoll requests completed in that 63 minute period was 58,794. All requests completed well within 10 seconds.

These requests were run at the same time as 9329 [redacted] and 1916 [redacted] tests were also running. The [redacted] data jobs were also running too.

Step	requests	min	median	mean	95th	max	>10s	Error		
eRoll - Address completion			6761	0.07	0.10	0.13	0.24	2.06	0	0
eRoll - Electorates	5723		0.07	0.09	0.12	0.21	1.81	0	0	
eRoll - Enrol Update MDA2			1224	0.51	0.62	0.71	1.07	5.20	0	0
eRoll - Logout	462	0.07	0.09	0.12	0.17	1.87	0	0		
eRoll - Lookup Address	417		0.07	0.09	0.12	0.23	1.02	0	0	
eRoll - Search	11128	0.08	0.11	0.14	0.22	1.99	0	0		
eRoll - Search - Mononym			431	0.09	0.12	0.15	0.25	1.21	0	0
eRoll - Search - No Midnames			11064	0.08	0.11	0.14	0.23	1.88	0	0
eRoll - Search - Wild	10780		0.09	0.13	0.15	0.26	1.89	0	0	
eRoll - Search - Wild - No Midnames			10804	0.09	0.13	0.15	0.26	5.13	0	0

Application	Total
eRoll	58794

Load testing is still progressing but I am still aiming to get a report out by Friday.

#8
15 days ago
by Jason

2023-11-14 09:58

Hi Andrew

Increasing the specs for the load test runners as per [note #7](#) is ok with EC.

Jason

#7
15 days ago
by Andrew

2023-11-14 09:51

I am not seeing enough load being generated from the load test runners, in my initial test yesterday. I am asking to increase the specs to [redacted] for today/tomorrow to see if it is the load test runner specs that are the issue. If needed tomorrow as well, I will look into shelving them overnight too to reduce costs.

All the load test runner hosts will be torn down immediately after running the last of the load tests.

Thanks
Andrew

#6
16 days ago
by Andrew

2023-11-13 11:42

Apologies, it is taking longer to set up the data and test environment.

I am expecting to start running the load tests today, Monday and tomorrow, Tuesday. With a report expected on Thursday/Friday

FYI: Added [WR421187](#) to request temporary upgrade of UAT Maint hosts to production levels for Load Testing eRoll.

#2
23 days ago
by Cindy
[redacted]
2023-11-06 19:58

This approach has been confirmed by EC Mgmt - Paul and Ian
Confirmed load test to be undertaken in UAT Maint env that is already upgraded to production levels
Requirements confirmed as:

Port Waikato Load testing
≈ there are approx 60 thousand voters in Port Waikato
≈ assume 60 thousand voters on By-Election Day
≈ assume 30 thousand requests in the first 3 hours
≈ assume max 20,000 requests per hour
then spec up to 60 thousand requests in an hour
≈ assume 0% have EasyVote Cards

Number of voting places = 42
Number of phones available for use = 105
x2 contingency on voting places up to 84

assuming a GE turnout for an Electorate - not typical by-election

[redacted] = 2,000 requests per hour
[redacted] = 10,000 requests per hour

running the [redacted] and [redacted] jobs at the same time continuously

#1
24 days ago
by Cindy
[redacted]
2023-11-05 14:30

Requirements for load test - still to be accepted by EC but to give you an indication of what is required.

Still to confirm if undertake in UAT (up speed) or DR

Port Waikato Load testing
≈ there are approx 60 thousand voters in Port Waikato
≈ assume 60 thousand voters on By-Election Day
≈ assume 30 thousand voters in the first 3 hours
≈ assume max 20,000 voters per hour
then spec up to 60 thousand in an hour
≈ assume 0% have EasyVote Cards

Number of voting places = 42
Number of phones available for use = 105
x2 contingency on voting places up to 84

assuming a GE turnout for an Electorate - not typical by-election

[redacted] = 2,000 votes per hour
[redacted] = 10,000 requests per hour

running the [redacted] and [redacted] jobs at the same time continuously

WR #420471: Investigate [REDACTED] spikes at 09:59 on Polling Day

Notes (6)

[Reverse display order](#)

#6 I have looked at the [REDACTED] Webserver and application logs at 09:59.

a month ago

by [Andrew \[REDACTED\]](#)

2023-10-30 17:56

There are only 2 failed requests reported as 502 at that time by the webserver. However, the application server does perform these 2 requests. But it is not clear why the result was not sent back to the webserver and on back to the user.

During that 1 minute interval at 09:59, 2835 requests were successfully processed.

#5

a month ago

by [Andrew \[REDACTED\]](#)

2023-10-30 17:51

The polling-day-mike-stats-requests.png graph shows the total number of requests, stacked by HTTP status throughout polling day. This graph shows the number of MIKE requests received in 10 minute intervals, with an average of 23,000 between 08:00 and 19:00.

This graph does show the numbers of the other HTTP statuses, but they are almost invisible due to the large number of successful requests in comparison.

Successful requests are Status 200, 302 (redirect) and 304 (Cached)

Failed requests are Timeout 408, Client Ended 499, Other (e.g. 502)

#4

a month ago

by [Andrew \[REDACTED\]](#)

2023-10-30 17:41

The polling-day-mike-stats-percentage.png graph shows the percentage of request HTTP status throughout polling day. This graph shows the overall MIKE request success rate at over 99% during the day.

The anomaly at 20:40 showing a large number of cached responses and errors is due to the very small number of requests received during that time, 8 requests, 7 cached, 1 error.

Successful requests are Status 200, 302 (redirect) and 304 (Cached)

Failed requests are Timeout 408, Client Ended 499, Other (e.g. 502)

Not also, that there were 3 requests at ~9:40, 4 at ~9:05 and 4 at around ~8:55.

I don't believe the spikes were a contributor to the outage.

Kia ora team,

Details read

Indicating work on these hosts have already been done?

Please can you let us know what is required from us (is it create 9 test runner hosts?)

Cheers
Adri
